Music as Philosophy Michael Spitzer, 2021-08-31 Beethoven's late style is the language of his ninth symphony the Missa Solemnis the last piano sonatas and string quartets the Diabelli Variations the Bagatelles as well as five piano sonatas five string quartets and several smaller piano works Historically these works are seen as forging a bridge between the Classical and Romantic traditions in terms of their musical structure they continue to be regarded as revolutionary Spitzer's book examines these late works in light of the musical and philosophical writings of the German intellectual Theodor Adorno and in so doing attempts to reconcile the conflicting approaches of musical semiotics and critical theory He draws from various approaches to musical linguistic and aesthetic meaning relating Adorno to such writers as Derrida Benjamin and Habermas as well as contemporary music theorists Through analyses of Beethoven's use of specific musical techniques including neo Baroque fugues and counterpoint Spitzer suggests that the composer's last works offer a philosophical and musical critique of the Enlightenment and in doing so created the musical language of premodernism

Bending the Rules of Music Theory Timothy Cutler, 2019-02-04 For students learning the principles of music theory it can often seem as though the tradition of tonal harmony is governed by immutable rules that define which chords tones and intervals can be used where Yet even within the classical canon there are innumerable examples of composers diverging from these foundational rules Drawing on examples from composers including J S Bach Mozart Beethoven Schubert Mendelssohn Chopin Brahms and more Bending the Rules of Music Theory seeks to take readers beyond the basics of music theory and help them to understand the inherent flexibility in the system of tonal music Chapters explore the use of different rule breaking elements in practice and why they work introducing students to a more nuanced understanding of music theory

The Symphonic Repertoire, Volume IV A. Peter Brown, 2024-03-29 Central to the repertoire of Western art music since the 18th century the symphony has come to be regarded as one of the ultimate compositional challenges Surprisingly heretofore there has been no truly extensive broad based treatment of the genre and the best of the existing studies are now several decades old In this five volume series A Peter Brown explores the symphony from its 18th century beginnings to the end of the 20th century Synthesizing the enormous scholarly literature Brown presents up to date overviews of the status of research discusses any important former or remaining problems of attribution illuminates the style of specific works and their contexts and samples early writings on their reception The Symphonic Repertoire provides an unmatched compendium of knowledge for the student teacher performer and sophisticated amateur The series is being launched with two volumes on the Viennese symphony Volume IV The Second Golden Age of the Viennese Symphony Brahms Bruckner Dvor k Mahler and Selected Contemporaries Although during the mid 19th century the geographic center of the symphony in the Germanic territories moved west and north from Vienna to Leipzig during the last third of the century it returned to the old Austrian lands with the works of Brahms Bruckner Dvor k and Mahler After nearly a half century in hibernation the sleeping Viennese giant awoke to what some viewed as a reincarnation of Beethoven with the first hearing of Brahms's Symphony No 1 which was premiered at Vienna in December 1876 Even though Bruckner had composed some gigantic symphonies prior to Brahms's first contribution their full impact was not felt until the composer's complete texts became available after World War II Although Dvor k was often viewed as a nationalist composer in his symphonic writing his primary influences were Beethoven Schubert and Brahms For both Bruckner and Mahler the symphony constituted the heart of their output for Brahms and Dvor k it occupied a less central place Yet for all of them the key figure of the past remained Beethoven The symphonies of these four composers together with the works of Goldmark Zemlinsky Schoenberg Berg Smetana Fibich Jan cek and others are treated in Volume IV The Second Golden Age of the Viennese Symphony covering the period from roughly 1860 to 1930

From the Ruins of Enlightenment

Richard Kramer, 2022-10-20 Richard Kramer follows the work of Beethoven and Schubert from 1815 through to the final months of their lives when each were increasingly absorbed in iconic projects that would soon enough inspire notions of late style Here is Vienna hosting a congress in 1815 that would redraw national boundaries and reconfigure the European community for a full century A snapshot captures two of its citizens each seemingly oblivious to this momentous political environment Franz Schubert not yet twenty years old and in the midst of his most prolific year some 140 songs four operas and much else and Ludwig van Beethoven struggling through a midlife crisis that would yield the song cycle *An die ferne Geliebte* two strikingly original cello sonatas and the two formidable sonatas for the Hammerklavier opp 101 and 106 In Richard Kramer's compelling reading each seemed to be composing against Beethoven against the Enlightenment Schubert against the looming presence of the older composer even as his own musical imagination took full flight *From the Ruins of Enlightenment* begins in 1815 with the discovery of two unique projects Schubert's settings of the poems of Ludwig H lty in a fragmentary cycle and Beethoven's engagement with a half dozen poems by Johann Gottfried Herder From there Kramer unearths previously undetected resonances and associations illuminating the two composers in their lonely and singular journeys through the rich solitude of their music

The Beethoven Syndrome Mark Evan Bonds, 2019-11-11 The Beethoven Syndrome is the inclination of listeners to hear music as the projection of a composer's inner self This was a radically new way of listening that emerged only after Beethoven's death Beethoven's music was a catalyst for this change but only in retrospect for it was not until after his death that listeners began to hear composers in general and not just Beethoven in

their works particularly in their instrumental music The Beethoven Syndrome Hearing Music as Autobiography traces the rise fall and persistence of this mode of listening from the middle of the eighteenth century to the present Prior to 1830 composers and audiences alike operated within a framework of rhetoric in which the burden of intelligibility lay squarely on the composer whose task it was to move listeners in a calculated way But through a confluence of musical philosophical social and economic changes the paradigm of expressive objectivity gave way to one of subjectivity in the years around 1830 The framework of rhetoric thus yielded to a framework of hermeneutics concert goers no longer perceived composers as orators but as oracles to be deciphered In the wake of World War I however the aesthetics of New Objectivity marked a return not only to certain stylistic features of eighteenth century music but to the earlier concept of expression itself Objectivity would go on to become the cornerstone of the high modernist aesthetic that dominated the century s middle decades Masterfully citing a broad array of source material from composers critics theorists and philosophers Mark Evan Bonds s engaging study reveals how perceptions of subjective expression have endured leading to the present era of mixed and often conflicting paradigms of listening *Adolf Busch* ,
