Adventures in Archaeology P.J. Capelotti, 2018-09-12 Remnants of the curious and peculiar ways humankind has marked the archaeological landscape are abundant but often ignored wrecked aircraft abandoned airfields old highway billboards derelict boats movie props and deserted mining operations In this book archaeologist P J Capelotti explores places and things that people do not typically think of as archaeological sites and artifacts introducing readers to the most extreme fieldwork taking place today Capelotti shows that even seemingly ordinary objects from the recent past hold secrets about the cultural history of humans He investigates the site where a stunt copy of the Orca the fishing boat used in the movie Jaws was stripped to pieces by fans a revelation of the ways humans relate to popular culture He takes readers to abandoned base camps near the North Pole that are now used as destinations for Arctic tourism Retelling the story of Thor Heyerdahl s research expedition across the Pacific Ocean on a balsa log raft Capelotti shows how experimental archaeology attempts to reveal cultural connections between continents And he doesn't stop at the limits of the planet. He discusses debris floating through outer space and equipment left behind on the surface of the moon highlighting current efforts to preserve artifacts that exist beyond the Earth's atmosphere These discarded materials says Capelotti help archaeologists piece together the sweeping story of human cultural expansion and exploitation He explains how the unusual sites of shorelines sea air and space represent the farthest reaches of human civilization His enthusiasm will inspire readers to set out on their own to investigate the secret meanings of treasures hiding in plain sight Archaeology Is a Brand! Cornelius Holtorf, 2016-07 Possessors of a widely recognized positively valued and well underpinned brand archaeologists need to take more seriously the appeal of their work and its relationship to society and popular culture The Adventures of Archaeology, 1985

Archaeological Method and Theory Linda Ellis,2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications. It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research. Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials. Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis. The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources. Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively. The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodologi.

enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology The Johns Hopkins Alumni Magazine Lawrence Counselman Wroth, 1928 The Stones Cry Out Randall Price, 1997 This survey of archaeological discoveries in Bible lands includes testimonies and interviews from leading archaeologists and exciting pictures featuring the latest finds made in the lands of the Bible A Research Guide to the Ancient World John M. Weeks, Jason de Medeiros, 2014-11-25 The archaeological study of the ancient world has become increasingly popular in recent years A Research Guide to the Ancient World Print and Electronic Sources is a partially annotated bibliography The study of the ancient world is usually although not exclusively considered a branch of the humanities including archaeology art history languages literature philosophy and related cultural disciplines which consider the ancient cultures of the Mediterranean world and adjacent Egypt and southwestern Asia Chronologically the ancient world would extend from the beginning of the Bronze Age of ancient Greece ca 1000 BCE to the fall of the Western Roman Empire ca 500 CE This book will close the traditional subject gap between the humanities Classical World Egyptology and the social sciences anthropological archaeology Near East in the study of the ancient world This book is uniquely the only bibliographic resource available for such holistic coverage The volume consists of 17 chapters and seven appendixes arranged according to the traditional types of library research materials bibliographies dictionaries at lases etc The appendixes are mostly subject specific including graduate programs in ancient studies reports from significant archaeological sites numismatics and paleography and writing systems These extensive author and subject indexes help facilitate ease of use Handbook of Archaeological Methods Herbert D. L. Molyneaux, P. G. Stone, 2003-09-02 The Presented Past is concerned with the differences between the comparatively static well understood way in which the past is presented in schools museums and at historic sites compared to the approaches currently being explored in contemporary archaeology It challenges the all too frequent representation of the past as something finished understood and objective

rather than something that is constructed and therefore open to co existing interpretations and constant re interpretation. Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non documentary sources derived from archaeological study and oral histories. The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught. The Presented Past will be of interest to teachers archaeologists cultural resource managers in fact anyone who is concerned with how the past is presented.
