environment to hiring and firing policies More than half of all startups that fail in the first year do so not because they produce inferior products or neglect to analyze the competition but because they do not understand the regulatory environment in which they operate In *What Entrepreneurs Need to Know about Government* Wesley Truitt presents the most comprehensive overview of government regulation and its impact on business management to date Covering all levels of regulation federal state and local municipal and all stages in a firm's growth cycle establishment expansion and liquidation Truitt shows entrepreneurs and managers of established business alike how to navigate the minefield of rules and policies that oversee business activity Drawing from a wide variety of primary data sources and his own extensive experience in the public and private sectors Truitt clearly explains how government regulation of business has evolved and analyzes its positive and negative implications for management Featuring descriptions of all the key agencies and summaries of major laws Truitt offers practical guidance through a huge array of issues including intellectual property protection legal incorporation product safety and liability taxes mergers and acquisitions employee benefit programs divestiture and much more He identifies common pitfalls to avoid ways to benefit through government assistance programs and methods for influencing the policymaking process Including practical checklists and extensive listings of informational resources *What Entrepreneurs Need to Know about Government* is an essential guide for any business competing in the not so free market Cross-Sector Leadership for the Green Economy A. Marcus,P. Shrivastava,S. Rivera,2010-08-05 It is increasingly common for businesses to face public policies and government regulation that demand some form of environmental or social protection These protective public policies have grown in number complexity and stringency over the last few decades not only in industrialized countries but also in the developing world In this 2010 book Jorge Rivera presents a theoretical framework for understanding the relationship between protective public policies and business compliance This framework explains different levels of business compliance in terms of three different factors the link between the stages of protective public policies and different levels of business resistance the effect of country context and the effect of firm level characteristics The second part of the book supports and elaborates on this framework by presenting empirical studies that examine two voluntary environmental programs the US ski industry's Sustainable Slopes Program and the Certification for Sustainable Tourism in Costa Rica *Corporate Political Agency* Barry M. Mitnick,1993-07-07 How do business firms decide on their strategies for political advocacy What agents do they use to influence the business and governmental environments Should a corporation use an outside agent such as a trade association or rely on an in house public affairs manager This book represents the first ever comprehensive overview of the burgeoning phenomenon of corporate political agency Beginning with the basic

theoretical concerns of understanding the competitive nature of the democratic system this collection moves on to the practical considerations of whether the various chosen forms of public affairs activity actually work as intended
