The African American Experience during World War II Neil A. Wynn, 2010-05-16 Drawing on more than thirty years of teaching and research Neil A. Wynn combines narrative history and primary sources as he locates the World War II years within the long term struggle for African Americans equal rights It is now widely accepted that these years were crucial in the development of the emerging Civil Rights movement through the economic and social impact of the war as well as the military service itself Wynn examines the period within the broader context of the New Deal era of the 1930s and the Cold War of the 1950s concluding that the war years were neither simply a continuation of earlier developments nor a prelude to later change Rather this period was characterized by an intense transformation of black hopes and expectations encouraged by real socio economic shifts and departures in federal policy Black self consciousness at a national level found powerful expression in new

movements from the demand for equality in the military service to changes in the shop floor to the Double V campaign that linked the fight for democracy at home for the fight for democracy abroad As the nation played a new world role in the developing Cold War the tensions between America s stated beliefs and actual practices emphasized these issues and brought new forces into play More than a half century later this book presents a much needed up to date short and readable interpretation of existing scholarship Accessible to general and student readers it tells the story without jargon or theory while including the historiography and debate on particular issues

Philosophy of Religion and the African American Experience John H. McClendon III, 2017-07-03 Most white philosophers of religion generally presume that philosophy of religion is based on what is a false universality whereby the white Western experience is paradigmatic of humanity at large The fact remains that Howard Thurman James H Cone and William R Jones among others have produced a substantial amount of theological work quite worthy of consideration by philosophers of religion Yet this corpus of thought is not reflected in the scholarly literature that constitutes the main body of philosophy of religion Neglect and ignorance of African American Studies is widespread in the academy By including chapters on Thurman Cone and Jones the present book functions as a corrective to this scholarly lacuna
