The Age Of Structuralism Levi Strauss To Foucault:

The Age of Structuralism, 1996-01-01 Structuralism began in linguistics and was enlarged by Claude Levi Strauss into a new way of thinking that views our world as consisting of relationships between structures we create rather than of objective realities The Age of Structuralism examines the work of seven writers who either expanded upon or reacted against Levi Strauss In a panoramic overview of the origins of deconstructionism and its critics Edith Kurzweil offers a lucid and penetrating portrait of the movement that dominated French intellectual life for much of the postwar era and which continues to influence the French intellectual milieu She explains Levi Strauss s strikingly original contributions then proceeds to illuminate the ideas of crusaders and critics The key figures dealt with include Louis Althusser who reinterpreted Marxism through a rereading of Marx s texts with the help of structuralist techniques Henri Lefebvre who remained faithful to Marx s humanism and was one of the earliest and most vehement critics of structuralism Paul Ricoeur whose phenomenology sought to reconcile ethical theory and intellectual pursuits Alain Touraine a socialist whose sociology of political action led him to dismiss structuralist concerns Jacques Lacan who criticized ego oriented psychoanalytic theory and practice and whose own work emphasized linguistic structures in psychoanalysis Roland Barthes whose literary criticism in its determination to reject all false notions and systems led to a highly idiosyncratic approach that drew upon all systems and finally Michel Foucault whose social histories of deviance medicine psychology grammar language sexuality criminology have reexamined every facet of social theory Placing these major figures in the context of political historical and psychoanalytic currents of the time *The Age of Structuralism* is a commanding and far reaching study of a decisive epoch in intellectual history Kurzweil s new opening essay explains how these towering figures prefigured current emphasis on semiotics post structuralism deconstruction and post postmodernism Kurt H Wolff called it lucid splendid and unobtrusive when the book first appeared It remains a central work in the appreciation of the French giants upon whose shoulders the new crop of thinkers expect to stand

The Age of Structuralism Edith Kurzweil, 2017-11-30 Structuralism began in linguistics and was enlarged by Claude Levi Strauss into a new way of thinking that views our world as consisting of relationships between structures we create rather than of objective realities The Age of Structuralism examines the work of seven writers who either expanded upon or reacted against Levi Strauss In a panoramic overview of the origins of deconstructionism and its critics Edith Kurzweil offers a lucid and penetrating portrait of the movement that dominated French intellectual life for much of the postwar era and which continues to influence the French intellectual milieu She explains Levi Strauss s strikingly original contributions then proceeds to illuminate the ideas of crusaders and critics The key figures dealt with include Louis Althusser who reinterpreted Marxism through a rereading of Marx s texts with the help of structuralist techniques Henri Lefebvre who remained faithful to Marx s humanism and was one of the earliest and most vehement critics of structuralism Paul Ricoeur whose phenomenology sought to reconcile ethical theory and intellectual pursuits Alain

Touraine a socialist whose sociology of political action led him to dismiss structuralist concerns Jacques Lacan who criticized ego oriented psychoanalytic theory and practice and whose own work emphasized linguistic structures in psychoanalysis Roland Barthes whose literary criticism in its determination to reject all false notions and systems led to a highly idiosyncratic approach that drew upon all systems and finally Michel Foucault whose social histories of deviance medicine psychology grammar language sexuality criminology have reexamined every facet of social theory Placing these major figures in the context of political historical and psychoanalytic currents of the time *The Age of Structuralism* is a commanding and far reaching study of a decisive epoch in intellectual history Kurzweil's new opening essay explains how these towering figures prefigured current emphasis on semiotics post structuralism deconstruction and post postmodernism Kurt H Wolff called it lucid splendid and unobtrusive when the book first appeared It remains a central work in the appreciation of the French giants upon whose shoulders the new crop of thinkers expect to stand

The Age of Structuralism Edith Kurzweil, 1980 This book includes chapters on the most representative structuralists in anthropology Marxism psychoanalysis literature and history as well as on their opponents in Marxism hermeneutics and sociology so that this book about structuralism also put structuralism in its intellectual and political milieu

Marxism and Totality Martin Jay, 1984 Totality has been an abiding concern from the first generation of Western Marxists most notably Lukács Korsch Gramsci and Bloch through the second exemplified by the Frankfurt School Lefebvre Goldmann Sartre Merleau Ponty and Della Volpe up to the most recent typified by Althusser Colletti and Habermas Yet no consensus has been reached concerning the term's multiple meanings expressive decentered longitudinal latitudinal normative or its implications for other theoretical and practical matters By closely following the adventures of this troublesome but central concept Marxism Totality offers an unconventional account of the history of Western Marxism

The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century Peter E. Gordon, Warren Breckman, 2019-08-29 The Cambridge History of Modern European Thought is an authoritative and comprehensive exploration of the themes thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century Representing both individual figures and the contexts within which they developed their ideas each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight This second volume surveys twentieth century European intellectual history conceived as a crisis in modernity Comprised of twenty one chapters it focuses on figures such as Freud Heidegger Adorno and Arendt surveys major schools of thought including Phenomenology Existentialism and Conservatism and discusses critical movements such as Postcolonialism Structuralism and Post structuralism Renouncing a single master narrative of European thought across the period Peter E Gordon and Warren Breckman establish a formidable new multi faceted vision of European intellectual history for the global modern age

[The Cambridge Companion to Foucault](#) Gary Gutting, 2005-07-18 For Michel Foucault philosophy was a way of questioning the allegedly necessary truths that underpin the practices and

institutions of modern society He carried this out in a series of deeply original and strikingly controversial studies on the origins of modern medical and social scientific disciplines These studies have raised fundamental questions about the nature of human knowledge and its relation to power structures and have become major topics of discussion throughout the humanities and social sciences The essays in this volume provide a comprehensive overview of Foucault's major themes and texts from his early work on madness through his history of sexuality Special attention is also paid to thinkers and movements from Kant through current feminist theory that are particularly important for understanding his work and its impact This revised edition contains five new essays and revisions of many others and the extensive bibliography has been updated

Michel Foucault's Archaeology of Scientific Reason Gary Gutting, 1989-09-29 An introduction to the critical interpretation of the work of Michael Foucault

Superstructuralism Richard Harland, 2013-10-08 First Published in 2002 It is easy to see that we are living in a time of rapid and radical social change It is much less easy to grasp the fact that such change will inevitably affect the nature of those disciplines that both reflect our society and help to shape it Yet this is nowhere more apparent than in the central field of what may in general terms be called literary studies New Accents is intended as a positive response to the initiative offered by such a situation Each volume in the series will seek to encourage rather than resist the process of change To stretch rather than reinforce the boundaries that currently define literature and its academic study

From the Later Roman Empire to Late Antiquity and Beyond Averil Cameron, 2023-05-23 Averil Cameron is one of the leading historians of late antiquity and Byzantium This collection Cameron's third in the Variorum series discusses the changing approach among historians of the later Roman empire from the 1960s to the present and the articles reproduced have been chosen to reflect both these wider changes in treatments of the subject as well as Cameron's own development as a historian over many decades It provides a revealing and important survey of some profound historiographical changes Her volume contains fundamental papers and reviews that tell a story in which she has played a leading part They move from her early days as an ancient historian to her important contribution in the establishment of the field of late antiquity and point to her later work as a Byzantinist a trajectory rivalled by few other scholars The book will be important for scholars and students of the later Roman empire and late antiquity and for anyone interested in the inheritance of Edward Gibbon the perennial questions about the end of the Roman empire and its supposed decline or the emergence of Islam in the early seventh century and its relation to the late antique world CS 1113

Foucault 2.0 Eric Paras, 2020-01-14 A dramatically new interpretation of the development of the thought of Michel Foucault one of the 20th century's most influential thinkers In this lucid and groundbreaking work Eric Paras reveals that our understanding of the philosophy of Michel Foucault must be radically revised Foucault's critical axes of power and knowledge which purposefully eradicated the concept of free will reappear as targets in his later work Paras demonstrates the logic that led Foucault to move from a microphysics of power to an aesthetics of individual experience He is the first to show a transformation that not only placed

Foucault in opposition to the archaeological and genealogical positions for which he is renowned but aligned him with some of his fiercest antagonists Foucault 20 draws on the full range of the philosopher's writing and of the work of contemporaries who influenced and sometimes vehemently opposed his ideas To fill the gaps in Foucault's published writings that have so far limited our conception of the arc of his thought Paras analyzes the largely untapped trove of lectures Foucault delivered to teeming Paris audiences as Professor of the College de France for more than a decade At the same time Foucault 20 highlights the background against which Foucault carried out his most foundational work the unrest of 1968 the prison reform movement of the early 1970s and the Iranian Revolution of 1979 Carefully assembling the fragments of a thinker who remains but half understood Eric Paras has composed a seminal book essential reading for novices and initiates alike

Rethinking Infrastructure Across the Humanities Aaron Pinnix, Axel Volmar, Fernando Esposito, Nora Binder, 2023-10-02 Infrastructure comprises a combination of sociotechnical political and cultural arrangements that provide resources and services The contributors to this volume show in their respective fields how infrastructures are both generative forces and the materialized products of quotidian practices that affect and guide people's lives Organized via shared conceptual foci this volume demonstrates infrastructuralist perspectives as an important transdisciplinary approach within the humanities

The Sixties Arthur Marwick, 2011-09-28 If the World Wars defined the first half of the twentieth century the sixties defined the second half acting as the pivot on which modern times have turned From popular music to individual liberties the tastes and convictions of the Western world are indelibly stamped with the impact of this tumultuous decade Framing the sixties as a period stretching from 1958 to 1974 Arthur Marwick argues that this long decade ushered in nothing less than a cultural revolution one that raged most clearly in the United States Britain France and Italy Marwick recaptures the events and movements that shaped life as we know it the rise of a youth subculture across the West the sit ins and marches of the civil rights movement Britain's surprising rise to leadership in fashion and music the emerging storm over Vietnam the Paris student uprising of 1968 the growing force of feminism and much more For some it was a golden age of liberation and political progress for others an era in which depravity was celebrated and the secure moral and social framework subverted The sixties was no short term era of ecstasy and excess On the contrary the decade set the cultural and social agenda for the rest of the century and left deep divisions still felt today

The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century Warren Breckman, Peter E. Gordon, 2019-08-29 An authoritative and comprehensive survey of the major themes thinkers and movements in modern European intellectual history

Edinburgh Companion to Poststructuralism Benoit Dillet, 2013-11-18 Written by experts in their field this Companion surveys the challenges and provocations raised by the major voices of poststructuralism Foucault Deleuze Derrida Cixous Lyotard Guattari Kristeva Irigaray Barthes and Baudrillard Thematically organised and clearly written it will guide students and researchers in philosophy literature art geography politics sociology law film and cultural studies around the nature and
