Imperial Institutions in Ancient Rome and Early China Michael Loewe,Michael Nylan,T. Corey Brennan,2025-05-15
Written by the eminent sinologist Michael Loewe and edited for publication by T Corey Brennan and Michael Nylan this book gives an overview of the considerations and practices of two major world empires that together ruled half of the earth s population in the first centuries BCE ancient Rome and Han China Approaching the historical material with a comparative perspective Loewe examines the strengths and weaknesses and the successes and failures which can be seen in the organisation and government of these two political systems Though each empire was largely ignorant of the other the problems they faced were similar given the rudimentary transportation and communication facilities of the time the high mortality rates and the low levels of literacy Yet each empire ruled its people in distinctly different ways with the Roman empire governed largely by military officials in contrast to the Chinese empire whose administration was well stocked with roughly 130 000 highly trained professionals The ten chapters of this book set out to compare the ways that these two contemporary regimes similar in size and population sought to control human activities and impose a set of regulated discipline over those who were ruled Each chapter concerns the degrees and methods of forming a united people the assumptions that lay behind such attempts the reliance that imperial authority placed on religious practices legal impositions and the structure of institutions and the bases of social cohesion and economic co operation The result is an engaging study of two remarkable empires whose rise and fall are contrasted in a way that deepens our understanding of empire and civilisation **The Protection of Traditional Knowledge at the Frontiers of Drug Discovery** Peter S

Harrison,2024-09-19 This book concerns the often fractious interface between drug discovery and commercialisation environmental degradation the biodiversity crisis the exploitation of indigenous peoples and the destruction of their culture the right to health inequalities of power and the ability of the law to protect knowledge For millennia medicinal plants have provided a trove of treatments for human ailments and the key to that treasure has been the traditional knowledge of the indigenous peoples who have lived alongside these plants More recently that knowledge has been taken often without consent or recompense by Western science as a springboard for the development of pharmaceutical agents As a response to

threats to biodiversity and indigenous culture international mechanisms have created or are creating enforceable rights for indigenous peoples to control such knowledge With a background in pharmacology and molecular biology and significant experience as a lawyer in pharmaceutical and biotech patent litigation the author brings a fresh perspective to understanding the difficulties of enforcing such rights and in particular examines whether there is a philosophically justifiable limit to the downstream scope of such rights This book is aimed at all those with an interest in the control of indigenous genetic knowledge and the protection of indigenous culture whether academics anthropologists or pharmaceutical researchers and those seeking to make indigenous rights work as activists legislators or practising lawyers Religious Books and Serials in Print ,1982
