Educating Oneself in Public Michael S. Moore, 2000 The eleven essays in *Educating Oneself in Public* Critical Essays in Jurisprudence constitute an education in the Anglo American jurisprudence of the second half of the twentieth century The book examines both the thought of major figures such as H L A Hart Joseph Raz Ronald Dworkin Lon Fuller and Richard Rorty and the general themes of major movements such as legal realism post modernism and pragmatism Despite this focus on the thoughts of others the book is not a survey but is a critical probing of particular ideas often attributed to such figures Detailed depth of understanding is sought about Hart's conception of a general jurisprudence that describes law in general Dworkin's conception of an internal jurisprudence that interprets the concept of law of our legal culture Fuller's ideal of a functional jurisprudence that seeks the essence of law in the values it serves the place of rules in legal and moral reasoning Raz's idea that laws give exclusionary reasons to legal actors subject to such laws how judges should reason according to the legal realists whether there are right answers to all disputed law cases whether behind the obvious law of legal rules there can exist an unobvious law of legal principles Finnis's conception of the common good as the function law uniquely serves in what sense law practice and legal theory are interpretive activities whether all knowledge or some discrete realm of knowledge is peculiarly interpretive in character Michael Moore's views on each of these topics are detailed and original even if the springboards for each discussion are the writings of those who introduced such topics into modern discussions The introductory chapter includes responses by many of the figures examined in the other essays together with the author's rejoinders

Pragmatism, Logic, and Law Frederic Kellogg, 2020-12-10 *Pragmatism Logic and Law* offers a view of legal pragmatism consistent with pragmatism writ large tracing it from origins in late 19th century America to the present covering various issues legal cases personalities and relevant intellectual movements within and outside law It addresses pragmatism's relation to legal liberalism legal positivism natural law critical legal studies CLS and post Rorty neopragmatism It views legal pragmatism as an exemplar of pragmatism's general contribution to logical theory which bears two connections to the western philosophical tradition first it extends Francis Bacon's empiricism into contemporary aspects of scientific and legal experience and second it is an explicitly social reconstruction of logical induction Both notions were articulated by John Dewey and both emphasize the social or corporate element of human inquiry Empiricism is informed by social as well as individual experience which includes the problems of conflict and consensus Rather than following the Aristotelian model of induction as immediate inference from particulars to generals a model that assumes a consensual objective viewpoint pragmatism explores the actual and extended process of corporate inference from particular experience to generalization in law as in science This includes the necessary process of resolving disagreement and finding similarity among relevant particulars
