The Almanac Of Higher Education 199:

The NEA ... Almanac of Higher Education, 1984 **History of Higher Education Annual: 1999: Southern Higher Education in the 20th Century** Roger Geiger, 1999-01-01 Universities in Change Andreas Altmann, Bernd Ebersberger, 2012-09-13 Universities find themselves in dynamic change They are confronted with growing expectations from their stakeholders increasing international competition and new technological challenges Featuring insights and in depth case studies from leading researchers and university decision makers from around the world this book argues that institutions of higher education in order to be successful have to actively reflect on circumstances visions and strategies to master the future Drawing from their experiences across a diverse array of institutions in Europe Asia and the Americas the authors explore the pressures on today s universities and the opportunities for excelling in the contest for resources They discuss operational issues such as strategic management IT governance leadership development and entrepreneurial culture and broader concerns such as the roles and responsibilities of universities in promoting technology transfer and economic and social development The result is a resource that not only reveals and analyzes universities from an organizational perspective but presents best practice models and concrete inspiration for management and policymaking *The Faculty Factor* Martin J. Finkelstein, Valerie Martin Conley, Jack H. Schuster, 2016-11 In an academy squeezed hard by formidable pressures what is the future of the faculty Over the past 70 years the American university has become the global gold standard of excellence in research and graduate education The unprecedented surge of federal research support of the postWorld War II American university paralleled the steady strengthening of the American academic profession itself which managed to attract the best and brightest educators from around the world while expanding the influence of the faculty factor throughout the academic realm But in the past two decades escalating costs and intensifying demands for efficiency have resulted in a wholesale reshaping of the academic workforce one marked by skyrocketing numbers of contingent faculty members Extending Jack H Schuster and Martin J Finkelstein s richly detailed classic *The American Faculty* *The Restructuring of Academic Work and Careers* this important book documents the transformation of the American faculty historically the leading global source of Nobel laureates and innovation into a diversified and internally stratified professional workforce Drawing on heretofore unpublished data the book provides the most comprehensive contemporary depiction of the changing nature of academic work and what it means to be a college or university faculty member in the second decade of the twenty first century The rare higher education study to incorporate multinational perspectives by comparing the status and prospects of American faculty to teachers in the major developing economies of Europe and East Asia *The Faculty Factor* also explores the redistribution of academic work and the ever more diverse pathways for entering into maneuvering through and exiting from academic careers Using the tools of sociology anthropology and demography the book charts the impact of waves of technological change mass globalization and the severe financial constraints of the last decade to show the impact

on the lives and careers of those who teach in higher education The authors propose strategic policy recommendations to extend the strengths of American higher education to retain leadership in the global economy Written for professors adjuncts graduate students and academic political business and not for profit leaders this data rich study offers a balanced assessment of the risks and opportunities posed for the American faculty by economic market driven forces beyond their control

Oliver & Boyd's new Edinburgh almanac and national repository. [With] Western suppl Oliver and Boyd's new Edinburgh almanac,1871 **Structuring Mass Higher Education** David Palfreyman,Ted Tapper,2012-10-12 Undoubtedly the most important development in higher education in recent years has been the seemingly inexorable expansion of national systems In a comparatively short time period many countries have moved from an elite to a mass model Furthermore expansion has invariably changed the whole experience of higher education for all the interested parties from presidents rectors and vice chancellors to first term undergraduates Structuring Mass Higher Education examines the impact of this change upon the existing national structures of higher education It also defines and highlights what makes an elite university something which institutions must strive for in order to gain their position as global players With case studies and contributions from a wide range of international authors the book explores questions such as Do higher education institutions retain a national significance even though the vestiges of an international reputation have long faded Has expansion undermined the quality of higher education because governments sought to expand on the cheap Is the elite institutional response to mass higher education perceived as a threat to be responded to with purposeful action that sustains their elite status Does the emergence of the international league tables pose a challenge to those responsible for governing elite institutions These are critical issues with which both policy makers and institutional leaders will have to grapple over the next ten years making Structuring Mass Higher Education a timely relevant and much needed text It will appeal to policy makers and practitioners within higher education as well as student and scholars worldwide *The Lutheran World Almanac for ... and Encyclopedia ...* ,1926 **Financing American Higher Education in the Era of Globalization**
