Swift, 2016-12-05 Religion in the USA manifests itself in many forms and this book examines them from religion in the early republic to early African American religion reform nativism movements and fundamentalism up to the contemporary culture wars in a study that spans almost 250 years *Dancing Till Dawn* Julie Malnig, 1995-05 Malnig examines exhibition ballroom dance as both a theatrical genre and a cultural and social phenomenon promoting new cultural standards including the emancipation of women and a new casualness and spontaneity between the sexes A lively and thorough account of a dance form that has found renewed popularity in recent years Evangelicals at a Crossroads Benjamin L. Hartley, 2011-01-11 The story of Boston revivalism and social reform World's Fairs in a Southern Accent Bruce G. Harvey, 2014-10-30 The South was no stranger to world's fairs prior to the end of the nineteenth century Atlanta first hosted a fair in the 1880s as did New Orleans and Louisville but after the 1893 World's Columbian Exposition in Chicago drew comparisons to the great exhibitions of Victorian era England Atlanta's leaders planned to host another grand exposition that would not only confirm Atlanta as an economic hub the equal of Chicago and New York but usher the South into the nation's industrial and political mainstream Nashville and Charleston quickly followed suit with their own exhibitions In the 1890s the perception of the South was inextricably tied to race and more specifically racial strife Leaders in Atlanta Nashville and Charleston all sought ways to distance themselves from traditional impressions about their respective cities which more often than not conjured images of poverty and treason in Americans barely a generation removed from the Civil War Local business leaders used large scale expositions to lessen this stigma while simultaneously promoting culture industry and economic advancement Atlanta's Cotton States and International Exposition presented the city as a burgeoning economic center and used a keynote speech by Booker T. Washington to gain control of the national debate on race relations Nashville's Tennessee Centennial and International Exposition chose to promote culture over mainstream success and marketed Nashville as a Centennial City replete with neoclassical architecture drawing on its reputation as the Athens of the

south Charleston's South Carolina Inter State and West Indian Exposition followed in the footsteps of Atlanta's exposition. Its new class of progressive leaders saw the need to reestablish the city as a major port of commerce and designed the fair around a Caribbean theme that emphasized trade and the corresponding economics that would raise Charleston from a cotton exporter to an international port of interest. Bruce G. Harvey studies each exposition beginning at the local and individual level of organization and moving upward to explore a broader regional context. He argues that southern urban leaders not only sought to revive their cities but also to reinvigorate the South in response to northern prosperity. Local businessmen struggled to manage all the elements that came with hosting a world's fair, including raising funds, designing the fair's architectural elements, drafting overall plans, soliciting exhibits, and gaining the backing of political leaders. However, these businessmen had defined expectations for their expositions not only in terms of economic and local growth but also considering what an international exposition had come to represent to the community and the region in which they were hosted. Harvey juxtaposes local and regional aspects of world's fairs in the South and shows that nineteenth-century expositions had grown into American institutions in their own right.

Anthropologists and the Rediscovery of America, 1886-1965 John S. Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established. Five chapters trace the development within academic anthropology of the concepts of culture, social class, national character, value, and civilization and their dissemination to non-anthropologists. As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's "the best which has been thought and said," so too did they come to see American communities as stratified into social classes distinguished by their subcultures, to attribute the making of the American character to socialization rather than birth, to locate the distinctiveness of American culture in its unconscious canons of choice, and to view American culture and civilization in a global perspective.

The Presidencies of James A. Garfield & Chester A. Arthur Justus D. Doenecke, 1981 This is the first single volume to focus on the presidencies of both James A Garfield and Chester A Arthur Drawing from a host of studies on the foreign and domestic policies of the nation during the Gilded Age as well as from his own primary research the author presents a somewhat revisionist look at Garfield and Arthur revisionist in that he gives the reader a renewed appreciation of both men Far from being cynical spoilsmen or naive incompetents individuals whose presidencies provide studies in ineptitude Garfield and Arthur emerge as men of considerable ability While making no claims of greatness Doenecke maintains that each was a significant transitional figure playing a crucial role as the institution of the presidency moved from the weak leadership of Andrew Johnson to the forceful direction of Theodore Roosevelt According to Doenecke Garfield saw the office of chief executive primarily in administrative terms and his great battle was over keeping the power of appointment in his own hands His victory over the Stalwarts enhanced both the power and prestige of the office His knowledge of how government worked was unmatched long before Woodrow Wilson made his mark Garfield was the scholar in politics The diplomacy of Secretary of State James G Blaine comes under critical scrutiny Doenecke evaluates his performance in the Chile Peru War War of the Pacific the Guatemala Mexico dispute the isthmian canal issue Irish American activities in Britain and efforts to secure markets in Korea br Garfield was assassinated less than six months after he entered office he had yet to be tested on major issues of public policy Chester A Arthur was ill prepared to be chief executive was in poor health much of the time while he was in office and was faced with a hopelessly divided party Nevertheless he was one of the nation s great political surprises His administration pioneered in the development of the navy sought foreign markets for American surpluses fostered civil service reform and pressed for a scientific tariff Doenecke devotes one chapter to the spoils system and the background to the Pendleton Act one to Arthur s strategy regarding the South and then offers an in depth analysis of diplomacy during Arthur s tenure During the presidencies of Garfield and Arthur the United States attempted to intervene in a war between Chile and Peru sought to turn

Nicaragua into a protectorate supplied leading advisers to Madagascar and Korea and took a major part in the Congo conference of 1884 In examining these activities even while pointing to uncoordinated statecraft and inept diplomacy Doenecke challenges the long held view that from 1881 to 1885 the nation was withdrawn and insular His fresh perspective on the Garfield and Arthur years will be of considerable interest to historians of the Gilded Age William James, Public Philosopher George Cotkin,1994-01-15 Cotkin provides a gracefully written and consistently intelligent defense of James and pragmatism that deserves a wide audience among intellectual historians and their students Robert C Bannister American Historical Review The Recovered Life of Isaac Anderson Alicia K.
