Coughlin, 2012-09-27 Since World War II there have been many changes in our nation due to shifts in our philosophy of man and moral law The Soul of a Nation is a series of essays on these critical transformations in our society This book will be of interest to citizens and scholars who question our society's political drift in recent years The Soul of a Nation was written not only for scholars and students but for their parents and elders as well **Writing Effective Course Assignments** Elia

Shabani Mligo, 2017-05-11 Non degree and undergraduate students are both inexperienced essay writers who need close guidance to become effective writers One of the puzzles which they encounter at the college and university after reporting for studies is the course assignments offered to them by their lecturers which demand them to be critical thinkers and argumentative essay writers In most colleges and universities lecturers provide to students broad questions to answer in the form of essays either in group or individual assignments How should they turn the broad assignment questions provided to them by their lecturers into specific researchable topics for essays How should they handle literature in order to obtain valuable information to answer the provided question How should they construct an informed and convincing argument using the collected information as evidence This book concerns these and other related questions With its clear illustrations the book is designed to be a self study guide and to offer solutions to many struggling students in colleges and universities At the same time the book can be helpful for lecturers to instruct their students how to write effective course assignments in their respective courses Aims of Argument: Text and Reader Timothy Crusius, Carolyn Channell, 2008-04-23 The Aims of

Business sees writing as an essential tool for creating personal and organizational strategies for managing an increasingly complex workplace To help students use their writing to attain these goals the authors have employed a powerful heuristic GRACE GRACE represents five essential kinds of generative questions Goals Readers Arguments Conventions and Expression for analyzing a writing situation and generating specific questions leading to effective written documents Grounded in rhetoric The Writing of Business contextualizes traditional sentence and paragraph conventions within the realities of the business world such as globalization outsourcing and constantly changing technology A business writing text that is reader friendly in both content and voice The Writing of Business equips students for a radically changed workplace This book presents a vision of writing as an activity that is central and essential to doing business in the 21st Century The Rhetoric of Reason James Crosswhite,2012-11 Responding to skeptics within higher education and critics without James Crosswhite argues powerfully that the core of a college education should be learning to write a reasoned argument A trained philosopher and director of a university wide composition program Crosswhite challenges his readers teachers of writing and communication philosophers critical theorists and educational administrators to reestablish the traditional role of rhetoric in education To those who have lost faith in the abilities of people to reach reasoned mutual agreements and to others who have attacked the right or wrong model of formal logic this book offers the reminder that the rhetorical tradition has always viewed argumentation as a dialogue a response to changing situations an exchange of persuading listening and understanding Crosswhite s aim is to give new purpose to writing instruction and to students writing to reinvest both with the deep ethical interests of the rhetorical tradition In laying out the elements of argumentation for example he shows that claiming questioning and giving reasons are not simple elements of formal logic but communicative acts with complicated ethical features Students must learn not only how to construct an argument but the purposes responsibilities and consequences of engaging in one Crosswhite supports his aims through a rhetorical reconstruction of reason offering new interpretations of Plato and Aristotle and of the concepts of reflection and dialogue from early modernity through Hegel to Gadamer And in his conclusion he ties these theoretical and historical underpinnings to current problems of higher education the definition of the liberal arts and especially the teaching of written communication *The Cumulative Book Index* ,1998 A world list of books in the English language **Forthcoming Books** Rose Arny,2002 **The Reader's Figure** Richard Lockwood,1996
