Clark,1987-01-01 *The American Academic Profession* Talcott Parsons,Gerald M. Platt,1968 *Scholars in the Changing American Academy* William K. Cummings,Martin J. Finkelstein,2011-12-02 As the nature of education generally and higher education in particular changes irrevocably it is crucial to understand the informed opinions of those closest to the institutions of learning This book based on a survey of academics in 19 nations and conducted by leading global scholars is a thorough sounding of the attitudes of academics to their working environment As the post WWII liberal consensus crumbles higher education is increasingly

viewed as a private and personal investment in individual social mobility rather than as a public good and ipso facto a responsibility of public authorities. The incursion of corporate culture into academe with its stakeholders performance pay and obsession with competitiveness is a matter of bitter debate with some arguing that short termism is obviating epoch making research which by definition requires patience and persistence in the face of the risk of failure. This book highlights these and many other key issues facing the academic profession in the US and around the world at the beginning of the 21st century and examines the issues from the perspective of those who are at the front line of change. This group has numerous concerns not least in the US where government priorities are shifting with growing budget pressures to core activities such as basic education health and welfare. Drawing too on comparable surveys conducted in 1992 the book charts the actual contours of change as reflected in the opinions of academics. Critically the volume explicitly compares and contrasts the situation of American academics with that of academics in other advanced and developing economies. Such an assessment is critical both for Americans to chart the future of their indigenous tertiary enterprise but also for shaping the response of the nations around the world who contemplate applying the American model to their own national systems.

The Faculty Factor Martin J. Finkelstein, Valerie Martin Conley, Jack H. Schuster, 2016-11

In an academy squeezed hard by formidable pressures what is the future of the faculty. Over the past 70 years the American university has become the global gold standard of excellence in research and graduate education. The unprecedented surge of federal research support of the post World War II American university paralleled the steady strengthening of the American academic profession itself which managed to attract the best and brightest educators from around the world while expanding the influence of the faculty factor throughout the academic realm. But in the past two decades escalating costs and intensifying demands for efficiency have resulted in a wholesale reshaping of the academic workforce one marked by skyrocketing numbers of contingent faculty members. Extending Jack H Schuster and Martin J Finkelstein s richly detailed classic *The American Faculty: The Restructuring of Academic Work and Careers* this important book documents the transformation of the American faculty historically the leading global source of Nobel laureates and innovation into a diversified and internally stratified professional workforce. Drawing on heretofore unpublished data the book provides the most comprehensive contemporary depiction of the changing nature of academic work and what it means to be a college or university faculty member in the second decade of the twenty first century. The rare higher education study to incorporate multinational perspectives by comparing the status and prospects of American faculty to teachers in the major developing economies of Europe and East Asia. *The Faculty Factor* also explores the redistribution of academic work and the ever more diverse

pathways for entering into maneuvering through and exiting from academic careers Using the tools of sociology anthropology and demography the book charts the impact of waves of technological change mass globalization and the severe financial constraints of the last decade to show the impact on the lives and careers of those who teach in higher education The authors propose strategic policy recommendations to extend the strengths of American higher education to retain leadership in the global economy Written for professors adjuncts graduate students and academic political business and not for profit leaders this data rich study offers a balanced assessment of the risks and opportunities posed for the American faculty by economic market driven forces beyond their control **The Academic Profession** Burton R.
