With a Foreword by

Derek de S. Price

Avalon Professor of History of Science

Gloria Robinson

Research Associate in History of Medicine

Yale University, New Haven, Connecticut

"In this many-faceted account of the biological sciences as they have developed in America over four centuries, [Doctor Hughes] takes a broad view and tells of the character of science, of individuals in science and of collaborative efforts, of the founding and growth of educational and scientific institutions in the New World, and in his narrative treats of the growth of each of the life sciences. Placing his subjects against the background of all of Western science and in the context of history, he follows individual influences and connections between scientists and between European and American science. He presents a picture of how science was pursued and of the American endeavors particularly, to the present, in which he sees American science as merged into world science, with the implications for the future."

Medicine (U.S.),1982 First multi year cumulation covers six years 1965 70 *Encyclopedia of Library and Information Science* Allen Kent,Harold Lancour,1997-09-16 The Biological Literature to An Uncertainty Principle for Information Seeking A Qualitative Approach Four Centuries of Clinical Chemistry Louis Rosenfeld,2018-10-08 The origin and early years of any rapidly changing scientific discipline runs the risk of being forgotten unless a record of its past is preserved In this the first book length history of clinical chemistry those involved or interested in the field will read about who and what went before them and how the profession came to its present state of clinical importance The narrative reconstructs the origins of clinical chemistry in the seventeenth century and traces its often obscure path of development in the shadow of organic chemistry physiology and biochemistry until it assumes its own identity at the beginning of the twentieth century The chronological development of the story reveals the varied roots from which modern clinical chemistry arose *Beyond History of Science* Elizabeth Garber,1990 This collection focuses on the intellectual development of the sciences their relationships with technology and their place in culture in general including a proposed realignment of science technology and art **Bibliography of the History of Medicine** ,1984 *Four Centuries of Special Geography* O.F.G. Sitwell,2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula Four Centuries of Geological Travel Patrick Wyse Jackson,Geological Society of London,2007 Four Centuries of Geological Travel The Search for Knowledge on Foot Bicycle Sledge and Camel focuses on the complexities of geological exploration and will be of particular interest to earth scientists historians of science and to the general reader interested in science *The Artificial disc* Mario Brock,Heinz-Michael Mayer,Klaus Weigel,1991-05-01 *Joseph Leidy* ,1998-10-11 **The Ends of Knowledge** Rachael Scarborough King,Seth Rudy,2023-06-01 Bringing together an exciting group of knowledge workers scholars and activists from across fields this book revisits a foundational question of the Enlightenment what is the last or furthest end of knowledge It is a book about why we do what we do and how we might know when we are done In the reorganization of knowledge that characterized the Enlightenment disciplines

were conceived as having particular ends both in terms of purposes and end points As we experience an ongoing shift to the knowledge economy of the Information Age this collection asks whether we still conceptualize knowledge in this way Does an individual discipline have both an inherent purpose and a natural endpoint What do an experiment on a fruit fly a reading of a poem and the writing of a line of code have in common Focusing on areas as diverse as AI biology Black studies literary studies physics political activism and the concept of disciplinarity itself contributors uncover a life after disciplinarity for subjects that face immediate threats to the structure if not the substance of their contributions These essays whether reflective historical eulogistic or polemical chart a vital and necessary course towards the reorganization of knowledge production as a whole

How Old is Time? Saso Dolenc, 2024 I travel a lot around the world I regularly follow the world's most notable news sources and I often socialize with prominent intellectuals in various parts of the world but the best short stories about science I encounter are those I find at home in my native Slovenia The essays on science by my colleague Saso Dolenc are not only fresh exciting and entertaining but also very diverse as they cover various topics from the social sciences and philosophy as well as technology mathematics and the natural sciences His books come closest to what we could call the royal road to knowledge Renata Salecl philosopher and author of *The Tyranny of Choice*

New York Magazine, 1994-02-28 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea

End the Biggest Educational and Intellectual Blunder in History Norman W. Edmund, 2005 This book discusses misunderstandings related to the scientific method of creative problem solving and decision making The author has conducted extensive research in this field for more than 15 years and shows that the misunderstandings have created great harms in the educational field and in most other fields This book will be important reading for all those interested in better education better thinking and a better society

Building the Worlds That Kill Us David Rosner, Gerald Markowitz, 2024-11-05 Across American history the question of whose lives are long and healthy and whose lives are short and sick has always been shaped by the social and economic order From the dispossession of Indigenous people and the horrors of slavery to infectious diseases spreading in overcrowded tenements and the vast environmental contamination caused by industrialization and through climate change and pandemics in the twenty first century those in power have left others behind Through the lens of death and disease *Building the Worlds That Kill Us* provides a new way of understanding the history of the United States from the colonial era to the present David Rosner and Gerald Markowitz demonstrate that the changing rates and kinds of illnesses reflect social political and economic structures and inequalities of race class and gender These deep inequities determine the disparate health experiences of rich and poor Black and white men and women immigrant and native born

boss and worker Indigenous and settler This book underscores that powerful people and institutions have always seen some lives as more valuable than others and it emphasizes how those who have been most affected by the disparities in rates of disease and death have challenged and changed these systems Ultimately this history shows that unequal outcomes are a choice and we can instead collectively make decisions that foster life and health
