China in Latin America: Political and Economic Implications of Beijing's Involvement in the Region Niccolo

Locatelli, 2011-02-15 Relations with Latin America have never been and will probably never be a priority for the People's Republic of China PRC as they will be a dependent variable of domestic economic needs and other more important foreign policy goals among all the ties with the United States During the first forty years of existence geopolitical and economic considerations Latin America was considered to be Washington's backyard and the economies of the region were not complementary with that of China were keeping the PRC away from the area nevertheless things have changed ever since the end of the Cold War and more so since the new millennium The PRC finds in Latin America a market of 500 million people and an almost infinite source of commodities it currently gets from here around 17% of its overall agricultural products imports and 11% of its fuel and mining ones It is a big buyer of three of the four Latin American commodities soy copper and oil and it's increasing its purchases of the fourth coffee The region is also a valuable partner in the struggle for a new world order more democratic and more concerned with the stakes of the developing countries it is a 33 wide voting block whose consensus is useful whenever the human rights policy of the PRC comes under the scrutiny of the United Nations or any of its agencies Finally Latin America is a pawn in the battle for the sovereignty over Taiwan since 12 of the 23 countries that recognize the Republic of China ROC are in the area mainly in Central America and the Caribbean plus Paraguay alone in South America For Latin America the PRC is a huge 1.3 billion people market and a potential source of much needed Foreign Direct Investment which in actuality turns out to be smaller than expected and mostly concentrated in the fiscal heavens of the Caribbean Politically besides the partnership in the struggle for a new world order the mere existence of a China option is itself a source of leverage when Latin American countries have to deal with the United States who now have to face a competitor on trade and political issues in what used to be their backyard Apparently deepening ties with Latin America is a winning solution for the PRC The same is not completely true for Latin America whose relationship with Beijing can be beneficial but with some caveats As far as bilateral trade is concerned the problem is that of export concentration in 2006 62.5% of the region's exports to China were in the commodity sector it was just 35% in 1995 This leaves Latin America especially South America exposed to the price volatility of its resources which is historically more elevated than that of the

manufactured goods and breeds macroeconomic uncertainty in a region that has always struggled with that issue Furthermore export concentration in the commodity sector as far as the terms of trade are favorable as in the years before the ongoing global crisis might hinder the upgrading of the industrial structure of those countries who find in it an easy and quick source of revenues A positive effect on the welfare of the people and the fight against poverty and inequality is not automatically related to the blossoming of exports of natural resources but depends on economic policy choices A more recent less studied aspect of Sino Latin American trade is the increasing penetration of Chinese manufactured goods in the domestic markets of the region while initially outplacing foreign competitors the flow is becoming a source of concern for businesses in the textile sector of countries like Argentina Brazil and Mexico who find it hard to compete with the minimum cost of labor that makes Chinese goods so cheap That explains why the region has tariffs on imports from the Middle Kingdom that are 10% above world average 20% in the case of South America Competition with Chinese manufactures in the third markets is also Central America s main problem in its re

Re-mapping the Americas W. Andy Knight, Julián Castro-Rea, Hamid Ghany, 2016-04-01 Since the end of the Second World War the map of the Americas has changed dramatically Not only were many former European colonies turned into sovereign states there was also an ongoing process of region making recognizable throughout the hemisphere and obvious through the establishment of several regional agreements The emergence of political and economic regional integration blocs is a very timely topic analyzed by scholars in many disciplines worldwide This book looks at remapping the recent trends in region making throughout the Americas in a way that hasn t been at the center of academic analyses so far While examining these regionalisation tendencies with a historical background in mind the authors also answer fundamental questions such as What influences does globalization have on region making both on normative regionalism plans as well as on actual economic political cultural military and social regionalization processes driven by state and non state actors What ideas or interests lead states in the Americas to cooperate or compete with one another and how is this power distributed How do these regional agreements affect trade relations and have there been trade barriers set up to protect national economies What agreements exist or have existed and how did they change with regard to contents and for what reason The book informs

academic as well as non academic audiences about regional developments in the Americas in particular those dating back to the last twenty years Beyond the primary purpose of summarizing the hemisphere s recent trends the book also brings clarification in a detailed but easy to understand way about timely issues regarding the institutionalisation or lack thereof of the plethora of regional and sub regional bodies that have emerged in this hemisphere over the past couple of decades

How China is Reshaping the Global Economy Rhys Jenkins,2022-06-16 China s growing economic involvement in Sub Saharan Africa and Latin America has been a source of major controversy The official Chinese position maintains that the growth of bilateral relations is of mutual benefit and provides a good example of South South cooperation Critics on the other hand see the economic relations between China and other developing countries as highly unequal with most of the benefits accruing to China and a few local elites They also point to negative socio economic political and environmental consequences How China is Reshaping the Global Economy Development Impacts in Africa and Latin America throws more light on these controversies through a comparative study of China s impact on the two regions It looks not just at bilateral relations between China and the two regions but also analyses the changes in the global economy brought about as a result of the shift in economic activity from North America and Western Europe to Asia This book looks at the factors which led to rapid economic growth in China and the way in which this has affected global manufacturing commodity markets the international presence of Chinese companies and financial flows It examines the different forms of Chinese economic involvement in Sub Saharan Africa and Latin America the main drivers and economic social political and environmental consequences It ends with a comparison of the two regions that highlights the importance of different histories and political and institutional contexts in determining the impacts of China Since the first edition of How China is Reshaping the Global Economy Development Impacts in Africa and

Latin America China's role in the global economy has continued to expand and the Chinese government's foreign policy has become more assertive. The global presence of China has been marked by the expansion of the Belt and Road Initiative to almost 150 countries and the trade war between the US and China as well as increased Western concerns over the activities of major Chinese companies such as Huawei. This new edition documents these changes and their implications for SSA and LAC.

Dragonomics Carol Wise, 2020-03-24. An insightful examination of the political and economic ties between China and Latin America from the 1950s to the present. This book explores the impact of Chinese growth on Latin America since the early 2000s. Some twenty years ago, Chinese entrepreneurs headed to the Western Hemisphere in search of profits and commodities specifically those that China lacked and that some Latin American countries held in abundance: copper, iron ore, crude oil, and soybeans. Focusing largely on Argentina, Brazil, Chile, Costa Rica, Mexico, and Peru, Carol Wise traces the evolution of political and economic ties between China and these countries and analyzes how success has varied by sector, project, and country. She also assesses the costs and benefits of Latin America's recent pivot toward Asia. Wise argues that while opportunities for closer economic integration with China are seemingly infinite, so are the risks. She contends that the best outcomes have stemmed from endeavors where the rule of law, regulatory oversight, and a clear strategy exist on the Latin American side.
