Strategic management involves formulation and implementation of the major goals and initiatives taken by a company's top management on behalf of owners based on consideration of resources and an assessment of the internal and external environments in which the organization competes. Strategic management provides overall direction to the enterprise and involves specifying the organization's objectives, developing policies and plans designed to achieve these objectives, and then allocating resources to implement the plans. Academics and practicing managers have developed numerous models and frameworks to assist in strategic decision making in the context of complex environments and competitive dynamics. Strategic management is not static in nature; the models often include a feedback loop to monitor execution and inform the next round of planning.

Cases in Strategic Management is the softcover collection of cases component of this market leading strategic management package. Over the years this author team has developed a network of case authors and is able to select from the cream of the crop. And having taught the course themselves for many years, they are very experienced in selecting the types of cases that will spark student interest and generate lively classroom discussions. Many of the cases reflect high profile companies, products, and people that students will have heard of, know about from personal experience, or can easily identify with. The case line up features a collection of dot com, New Economy companies such as America Online, Wingspan Bank, com, drkoop.com, Intel, eBay, CDNow, Dell, and Competition in the Electronic Brokerage industry. Cases are further selected to highlight other critical types of business and trends such as non-US companies, globalization, cross-cultural situations, relatively small entrepreneurial firms, non-profit organizations, and more.
