David,2007 For undergraduate graduate level courses in Strategic Management Strategy and Business Policy Communicating both the excitement and value of strategic management this popular lively and conversational text reflects the effect our rapidly changing world has on strategic management theory and practice **Strategic Management Concepts, Skills And Practices** Dr. Bharat Singh Rawat , Ms. Shweta Singh,Ms. Manuha Nagpal,Dr. Sanghmitra Sharma, A company cannot function or expand without access to sufficient financial resources Without money running a company is very difficult As a result it s not optional to have a firm grasp of how corporate finances function The stability of an enterprise rests on its financial foundation Capital is the sum of money and credit available to a company The acquisition of properties products and raw materials as well as the carrying out of all the other economic operations necessitates the use of financial resources Indeed it is essential for carrying out all

economic activities Business finance refers to the practice of raising and preserving money to satisfy an enterprise's immediate and long term financial requirements and goals The fact that it takes business financing to carry out any commercial function at all demonstrates the centrality of business financing The money an entrepreneur invests in his or her firm is usually insufficient to cover all of the company's bills In this context the administration of a company's finances takes on even more significance As a result company owners and their staff constantly hunt for new revenue streams to exploit The goal of a company's financial planning should be to maximize shareholder value Realize that maximizing wealth is not the same as maximizing profits The maximization of wealth is an all encompassing goal that guarantees a company's success
