tenses to locate a situation e.g. when we choose between the past tense and the present perfect to locate a situation before speech time and the book examines the difference that a choice of one or the other tense may make within a discourse context. The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets and finally to a detailed examination of tenses in and tenses interacting with temporal adverbials. Original data is used frequently throughout the book to illustrate the theory discussed.
