Professionalizing Your English Language Teaching Christine Coombe, Neil J Anderson, Lauren Stephenson, 2020-10-22 Written by leading experts in the field of TESOL this book explores the literature on various topic

areas and demonstrates how teachers can increase their levels of professionalism by acquiring some general and field specific strategies Being a teaching professional is not simply about having the right teaching qualifications and good academic standing it involves a commitment to being innovative and transformative in the classroom and helping both students and colleagues achieve their goals A dictionary definition of professionalism reads as follows professionalism is the conduct aims or qualities that characterize or mark a profession or a professional person and it defines a profession as a calling requiring specialized knowledge and often long and intensive academic preparation Merriam Webster 2013 However according to Bowman 2013 professionalism is less a matter of what professionals actually do and more a matter of who they are as human beings Both of these views imply that professionalism encompasses a number of different attributes and together these attributes identify and define a professional The book is primarily intended for teachers at all levels and in all contexts who are interested in improving their professionalism and developing strategies that can take them to higher levels in the field of TESOL ELT

Stress and the Classroom Teacher Kevin J. Swick, Patricia E. Hanley, 1980 In the past decade increased demands on teachers have often resulted in situations conducive to stress Teacher stress is defined as the occurrence of perceived negative situations that result in adverse teacher reactions or behaviors Teacher stress can result from situations in three areas 1 environmental stressors encompassing living conditions job security scheduling pressures and federal programs and regulations 2 interpersonal stressors resulting from relationships with family friends students parents and colleagues and 3 intrapersonal stress arising from personal or professional feelings of inadequacy role conflict or ambiguity lack of influence or a sense of alienation The results of stress can be positive or negative Some stress management techniques are organizing the environment to prevent unnecessary stress using teaching teams establishing personal and professional priorities and providing for self renewal FG

Stress in Teachers Jack Dunham, Ved Prakash Varma, 1998-08-10 Examines the stress in teaching multidisciplinary concept broad enough to include physiological psychological organisational and legal perspectives The editors see stress in teaching as an interactionist concept a complex and sometimes precarious balance between perceived work pressures coping strategies and stress reactions The early chapters in the book reflect this view and make contributions to understanding the causes and costs of stress in teaching The authors of these chapters come collectively to the conclusion that there is an alarmingly low level of job satisfaction in teaching and that turnover intentions appear to be on the increase This pessimistic view is challenged in later chapters by professionals working in the field of stress management These contributions highlight the danger of focusing stress research and management These contributions highlight the danger of focusing stress research and management strategies on the individual rather than the organization and report the authors hands on knowledge of teacher support teams and workshop and whole school approaches to diminishing the causes and costs of teacher stress and improving training and career development The concluding chapters demonstrate the editors belief that useful insights for workers in the education service can be gained from studies of workplace stress in other occupations
