## **Strikes In Politicisation:**

*Strikes in Politicisation* Jacqueline E. Briggs, 2019-01-22 First published in 1998 this book through a combination of theoretical and empirical research tries to advance beyond the available literature to an understanding of the links between strike activity and the political process Although its primary focus is upon the long term impact of the 1984 85 Miners Strike it discusses other industrial settings and political disputes By linking the political socialisation process with strike activity in a refreshing and thought provoking manner this book provides an insight into why some people are more interested and involved in political activity in comparison with the population at large

**The NUM and British Politics** Andrew Taylor, 2017-03-02 This book is the second of two volumes examining the place of the National Union of Mineworkers in post war British politics Covering the years 1969 to 1995 it charts reactions to the pit closures programme of the late 1950s and 1960s and the development of the NUM's reputation as the union that could topple governments This reputation influenced profoundly the relationship between the NUM and successive Labour and Conservative administrations underpinning changes in the state's approach to industrial disputes so vividly manifested in the strike of 1984 85 Following the same intellectual path as volume one this book concentrates on high politics and the relationship between the NUM the government and the National Coal Board It highlights many of the same the key themes of the first volume particularly the internal political process whereby the mineworkers tendency to fragmentation was managed and which was to eventually lead to the breakdown of this internal political process and the fragmentation of the NUM Volume two explores how these fractures impacted upon such key issues as the formation of the Broad Left the election of Joe Gormley as NUM President in 1971 and the strikes of 1972 and 1974 and relations with the Wilson and Heath governments It then examines the election of Arthur Scargill in 1981 and the subsequent shifting of the union's political centre of gravity together with the Conservative government's determination to use the power of the state to destroy the power of the NUM The myths and legends surrounding the NUM and its power to bring down governments is still strong today yet this book challenges many of the notions surrounding its strength militancy and cohesiveness Instead what emerges is a more complex picture as the union struggled to translate local loyalties into national solidarity Whilst nationalisation initially helped this process growing frustration exploded at the end of the 1960s ushering in a period of

**Industrial Conflict in Modern Britain** James E Cronin, 2024-10-02 First Published in 1979 *Industrial Conflict in Modern Britain* examines the unique rhythm of British strikes since the 1880s and suggests that the explosive pattern of recurring strike waves provides the key to understanding both the evolution of British industrial relations and the major changes that have taken place in working class culture and behaviour Two major themes emerge from this analysis to explain how and why strikes themselves occur and the association between industrial conflict and social relations This thorough critique of prevailing research and concept within labour history provides insight into the cause of strike waves the varying propensity of workers in different industries to engage in

strike action and into the general history of British trade unionism This is a must read for scholars and researchers of British labour history British trade unionism and Industrial sociology      **Laws against strikes. The South African Experience in an international and Comparative Perspective** AA. VV., Bob Hepple, Rochelle le Roux, Silvana Sciarra, 2015-05-28 Laws against Strikes comprising contributions from South African Italian and British legal scholars examines the right to strike in periods of socio economic crisis The book aims to contribute to the debates on this issue by comparing where a      **Politics and Suicide** Nicholas Michelsen, 2015-10-08 Politics and Suicide argues that whilst the historical lineage of suicidal politics is recognised the fundamental significance of autodestruction to the political remains under examined It contends that practices like suicide bombing do not simply embody a strange or abnormal suicidal articulation of the political but rather that the existence of suicidal politics tells us something fundamental about the political as such and thinking about political violence more broadly Recent world events have emphatically shown our need for tools with which to develop better understandings of the politics of suicide Through the exploration of several arresting case studies including the Kamikaze bombers of World War Two Jan Palach's self immolation in 1969 Cold War nuclear deterrence and the suicide terrorist attacks of 9 11 Michelsen asks how we might talk of a political suicide in any of these contexts The book charts how political processes go suicidal and asks how we might still consider them to be political in such a case It investigates how suicide can function as politics A strong contribution to the fields of philosophy and international relations theory this work will also be of interest to students and scholars of political theory and terrorism political violence      **Strikes, Social Conflict, and the First World War** Leopold H. Haimson, Giulio Sapelli, 1992      **Political Economy of Industrial Relations** Richard Hyman, 1989-01-05 This collection of essays attempts to demonstrate how an adequate analysis of trade unions strikes and collective bargaining must be rooted in a broader understanding of their political and economic context The second part of the book deals with the central problems of trade unionism      *BRICS and the New American Imperialism* Vishwas Satgar, Ferriat Adam, Samir Amin, Patrick Bond, William K Carroll, Christopher Chase-Dunn, Alexander Gallas, Ana Garcia, Karina Kato, Nivedita Majumdar, Keamogetswe Seipato, 2020-03-01 Challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism BRICS is a grouping of the five major emerging economies of Brazil Russia India China and South Africa Volume five in the Democratic Marxism series BRICS and the New American Imperialism challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism It offers novel analyses of BRICS in the context of increasing US induced imperial chaos deepening environmental crisis tendencies such as climate change and water scarcity contradictory dynamics inside BRICS countries and growing subaltern resistance The authors revisit contemporary thinking on imperialism and anti imperialism drawing on the work of Rosa Luxemburg one of the leading theorists after Marx who attempted to understand the expansionary nature of capitalism from the heartlands to the peripheries The richness of Luxemburg's pioneering work

inspires most of the volume's contributors in their analyses of the dangerous contradictions of the contemporary world as well as forms of democratic agency advancing resistance. While various forms of resistance are highlighted among them water protests, mass worker strikes, anti corporate campaigning and forms of cultural critique, this volume grapples with the challenge of renewing anti imperialism beyond the NGO driven World Social Forum and considers the prospects of a new horizontal political vessel to build global convergence. It also explores the prospects of a Fifth International of Peoples and Workers.

*Politics* Barrie Axford, 1997. Designed to meet the needs of those taking introductory courses in politics.

The Politics of the Yorkshire Miners Andrew Taylor, 2021-11-30. First published in 1984. The Politics of the Yorkshire Miners examines all aspects of political activity of the Yorkshire Area of the NUM. The book was written using original research from the archives of the Yorkshire Area combined with the author's personal experience. It explores developments from 1945 onwards and looks at internal politics within the Area, discussing the nature of policies on both industrial bargaining and wider political aims. It considers the role of sponsored MPs and their relationship to the Area as well as the NUM's special relationship with the Labour Party. The structure of the Area and its role within the NUM nationally are also discussed and detailed analysis is given to the strikes of 1972 and 1974.
