The Education of a University President Marvin Wachman,2005 The remarkable story of how a Milwaukee newsboy rose to university president **The Great Rip-Off in American Education** Mel Scarlett,2012-04-30 This hard hitting critique will serve as a wake up call to university administrators and faculty as well as to the average parent or prospective college student facing ever increasing tuition costs While reports of poor teaching at the elementary and secondary school level have unleashed widespread public outcry for reform little attention has been paid to the quality of teaching in colleges and universities Yet according to the National Commission on Educating Undergraduates in the Research University universities have too often failed and continue to fail their undergraduate populations and the students paying the tuition get in all too many cases less than their money's worth Citing this report and other similar studies experienced university administrator Dr Mel Scarlett criticizes the deficits of the current undergraduate educational system and suggests improvements that would ensure that college students get the education they're paying for Among his suggestions for reform are Renewed emphasis on teaching skills in Ph D programs to ensure that those who do teach have some pedagogical training besides their special expertise The more active role of experienced professors in the teaching of undergraduates to reverse the current trend of using graduate assistants or part time faculty to teach lower level courses Encouraging students active participation in the learning process as opposed to the passive learning model of the lecture method An adjustment of the university's publish or perish reward system which stresses research and ignores teaching Dr Scarlett lists a total of 20 deadly sins committed by universities against undergraduates and 80 improvements that would help to reform the current inadequate higher educational system *Higher Education* ,1981 *Message of the President of the United States on Economy and Efficiency in the Government Service* United States. Perspectives on the History of Higher Education Roger L. Geiger,2017-07-05 Volume Twenty Five of Perspectives on the History of Higher Education the silver anniversary edition offers three fresh contributions to the understanding of American higher education in the nineteenth century and three historical perspectives on topics of contemporary concern The divergent paths of antebellum colleges in the North and South have long been recognized Stephen Tomlinson and Kevin Windham discuss Alva Woods who moved from Calvinist New England to preside over the new University of Alabama Woods personified the commitment to evangelical Protestantism and rigid student discipline that prevailed in northern colleges of that era but in Tuscaloosa confronted the sons of planters raised to respect mainly independence power and the Southern

code of honor Adam Nelson considers geology a crucially important science in early America that existed on the periphery of higher education but eventually exerted pressure for intellectual modernization He portrays the small community of scientific pioneers who sought the latest scientific knowledge from Europe surveyed the mineral wealth of American states and advocated for science in the college curriculum Beginning in the 1930s the National Research Council waged an organized campaign to encourage academic patenting and centralize it within one organization Jane Robbins explains the crosscurrents of interests that plagued and eventually scuttled that effort but that set the stage for the contemporary practice of university patenting Robert Hampel examines how for more than four decades students at Yale University took a major responsibility for learning into their own hands by publishing a Critique of courses He analyzes these documents to determine if their aims were to identify easy or challenging offerings and finds that this effort produced highly responsible articles A review essay by Doris Malkmus sheds new light on the experience of co eds in *Interim Presidents in Higher Education* Gregory Paul Trudeau,2001 Perspectives on the History of Higher Education ,2007 *The Instrumental University* Ethan Schrum,2019-06-15 In *The Instrumental University* Ethan Schrum provides an illuminating genealogy of the educational environment in which administrators professors and students live and work today After World War II research universities in the United States underwent a profound mission change The Instrumental University combines intellectual institutional and political history to reinterpret postwar American life through the changes in higher education Acknowledging but rejecting the prevailing conception of the Cold War university largely dedicated to supporting national security Schrum provides a more complete and contextualized account of the American research university between 1945 and 1970 Uncovering a pervasive instrumental understanding of higher education during that era The Instrumental University shows that universities framed their mission around solving social problems and promoting economic development as central institutions in what would soon be called the knowledge economy In so doing these institutions took on more capitalistic and managerial tendencies and as a result marginalized founding ideals such as pursuit of knowledge in academic disciplines and freedom of individual investigators The technocratic turn eroded some practices that made the American university special Yet as Schrum suggests the instrumental university was not yet the neoliberal university of the 1970s and onwards in which market considerations trumped all others University of California president Clark Kerr and other innovators in higher education were driven by a progressive impulse that drew on an earlier tradition grounded in a concern for the common good and social welfare *Planning For Higher Education* Allan O. Pfnister,2019-06-10 This book focuses on some of the last decade s more significant writing about developments in higher education planning organizing the wide ranging commentaries and studies to show the administrator the faculty member and the informed layman what the current status of higher education appears to be *Strengthening Community in Higher Education* John David Millett,1975 **The Power of Collegiality** Nadja Bieletzki,2017-12-16 Nadja Bieletzki explores how university presidents lead universities She provides insights into the

upper echelons of higher education management and focuses especially on university presidents in Germany Special attention is given to the career background of university presidents and the way they conduct reform projects Based on the results from semi structured expert interviews and their qualitative analysis the author shows that university presidents do not use all their formal power although their position has been strengthened by law This can be explained by the collegial characteristics of universities which drive and restrict presidential actions Nadja Bieletzki was awarded the Ulrich Teichler Prize for Excellent Dissertations 2016 **The Great Transformation in Higher Education, 1960-1980** Clark

Kerr,1991-02-12 Clark Kerr former President of the University of California and a leader in higher education policymaking offers his views of the turbulent decades when colleges and universities scrambled to provide faculty and facilities for the burgeoning student population only to be faced later with economic depression and subsequent conservatism From his unique vantage point Kerr offers insights into the role of higher education its performance under pressure its changing climate its efforts to serve the multiplicity of demands made upon it and its success or failure in meeting those demands

The Journal of Negro Education Charles Henry Thompson,1978 **Clark Kerr's University of California** Cristina Gonzalez,2012-12-31 This volume provides an intellectual history of Kerr s vision of the multiversity as expressed in his most famous work The Uses of the University and in his greatest administrative accomplishment the California Master Plan for Higher Education Building upon Kerr s use of the visionary hedgehog shrewd fox dichotomy the book explains the rise of the University of California as due to the articulation and implementation of the hedgehog concept of systemic excellence that underpins the master plan Arguing that the university s recent problems flow from a fox culture characterized by a free for all approach to management including excessive executive compensation this is a call for a new vision for the university and for public higher education in general In particular it advocates re funding and re democratizing public higher education and renewing its leadership through thoughtful succession planning with a special emphasis on diversity Gonz lez s work follows the ups and downs of women and minorities in higher education showing that university advances often have resulted in the further marginalization of these groups Clark Kerr s University of California is about American public higher education at the crossroads and will be of interest to those concerned with the future of the public university as an institution as well as those interested in issues relating to leadership diversity and succession planning *AAHE-ERIC/higher Education Research Report* ,1978
