Abstract

Acting is a challenging and complex field requiring performers to possess unique skills and qualities. To portray a character successfully on stage or screen, actors must be able to step into the role while still being aware of their presence during the performance. Additionally, actors must maintain a connection with their audience to engage them in the performance. This paper explores the idea that an actor is three people in one: the character, the actor, and the spectator. The paper examines various theories, methodologies and field experiences and argues that this three-fold personhood is essential for a successful performance. It also analyzes the internal and external processes involved in acting, including character development, emotional connection, and physical embodiment as well as the importance of maintaining a connection with the audience throughout the performance. Ultimately, the paper aims to provide insight into the intricacies of acting as well as highlight the crucial role which balancing character, actor and spectator play in achieving a successful performance.

Keywords: *Actor, character, nature, spectator, synergy, triune*

Introduction

Acting is an art form that requires individuals to take on different identities and exceed their limits. Actors must embody multiple personas to bring a character to life, including that of the character, the performer, and the observer. This triadic nature of an actor's existence is the foundation of their craft, allowing them to achieve a balance that captivates audiences and resonates with their emotions. The character persona is the gateway to exploring the depths of human experience. It demands that the actor delves into the characters' psyche, empathizes with their struggles, and authentically portray their emotions. On the other hand, the performer persona utilizes the actor's unique skills, training, and artistic choices to infuse the character with vitality and bring a personalized interpretation to the role. Finally, the observer persona enables the actor to step back, evaluate their performance, and continuously refine their approach to improve. The study aims to uncover the intricacies of the actor's triune nature and shed light on the interplay between the character, performer, and observer personas. By embracing and understanding this trinity, actors can achieve perceptive mastery beyond simply playing a role. The researcher will explore each persona, revealing the techniques,

The Actor And The Spectator:

The Actor and the Spectator Lewis White Beck, 1998 Can a machine think More pointedly if I am a machine can I think Beck answers these questions by analyzing two clusters of metaphors one of which dramatizes human beings as spontaneous agents actors and the other sees them as observers attempting to explain causally their own behavior and that of the actor spectators Using a hypothetical scene with two spectators each explaining an action and each representing a different way of viewing the world Beck points up the central philosophical problems raised by the varieties of ways in which we explain our own actions and those of others

The Actor and the Spectator Lewis White Beck, 1975 **'The spectator and not the actor is the central focus of Brecht's stagecraft'** Reni Ernst, 2008-01-03 Seminar paper from the year 2005 in the subject English Language and Literature Studies Literature grade 1.0 University College Dublin Faculty of Arts School of English and Drama course Brecht and Political Theatre language English abstract The most important principle of Brecht's epic theatre is its aim of representing conditions rather than developing actions This theatre is designed to show attitudes in the sense of relationships between people their connections to the environment and their roles in politics and society Thus the human being is the focus the object of inquiry of Brecht's plays but not as an individual but as a social being which is shaped and changed through interactions with society through life Furthermore each scene has its own value and is in itself determined through beginning and end Therefore it is possible to connect only the most important scenes one after another whereas in a completed action such as the case in dramatic theatre defined by Aristotle one scene results out of another In Brecht's plays the focus lies on the process of the story on the how and why rather than on the product and the ending on the what Combining these two main principles of Brechtian theatre the human being and the process the overall aim is to study the human being in the process of society raising the question if changes can be made in order to alter present conditions In order to achieve changes in society the spectators have to be made aware of situations that need to be changed Brecht attains this purpose by evoking the spectator's astonishment with the support of the basic concepts of epic theatre Verfremdung and Gestus and Haltung Accordingly there has to be closer look taken at the way in which these two elements have an impact on the spectator's attitude towards society and how they are used on stage in order to make the audience act itself

The Actor's Way Erik Exe Christoffersen, 2023-05-09 Can stage presence be acquired? Why do some actors appear more dynamic in performance than others? In *The Actor's Way*, four experienced actors talk about the secrets and the practical realities of over twenty-five years of theatre training with Odin Teatret. Under the unique direction of Eugenio Barba, director of Odin Teatret, they have explored issues such as the connections between physical and mental work on stage, how to gain and control the spectator's attention, and intercultural performance techniques. *The Actor's Way* is a fascinating account of personal and professional development in the theatre. The Actor in Costume Aoife Monks, 2009-12-10 How do audiences look at actors in costume on stage? How does costume shape theatrical identity and form bodies? What do audiences wear to the theatre? This lively and cutting-edge book explores these questions and engages with the various theoretical approaches to the study of actors in performance. Aoife Monks focuses in particular on the uncanny ways in which costume and the actor's body are indistinguishable in the audience's experience of a performance. From the role of costume in Modernist theatre to the actor's position in the fashion system, from nudity to stage ghosts, this wide-ranging exploration of costume and its histories argues for the centrality of costume to the spectator's experience at the theatre. Drawing on examples from paintings, photographs, live performances, novels, reviews, blogs, and plays, Monks presents a vibrant analysis of the very peculiar work that actors and costumes do on the stage.
