meaning of Chinese revolution and Chinese reforms Using the key concept two worlds of life Experiencing World and Meaning World the author argues that there is a sharp discrepancy between the two worlds of life in all the self claimed socialist countries Although the Meaning World is socialist the Experiencing World cannot be adequately understood as being socialist Socialism has become an ideational veil which masks the true nature of the Experiencing World After the socialist revolution the chain of the concept of socialism awaits the proletariat Only through Entborgenheit can we understand the true nature of the Experiencing World of all socialist states It is argued that the concept real socialism is still misleading for such a socialism is still unreal that the concept state socialism is no more than a confusing concept and needs also to be rejected for there is not such a thing as state socialism in our experiencing world We had neither real socialism nor state socialism we had only statism in our experiencing world The Maoist Chiina was a schizophrenic case of socialism due to the inherent conflict between statism in the Experiencing World and socialism in the Meaning World All the Communist states created a Janus faced creature with one face being statism and the other face being socialism This is caused by the pathology of treating statization of means of production as socialization of means of production Dengist China initiated a de statization process but this process is not socialization either Economic Books ,1980 **Soviet Studies in Philosophy** ,1980
