The Alien Native:

Conference of Superintendents of Natives and Native Commissioners of the Colony of Southern Rhodesia, Held in Salisbury, Commencing the 12th Day of December, 1927 ,1928 The Alien Native Etienne Noir,1986-01-01 Report of the Chief Native Commissioner Southern Rhodesia. Department of Native Affairs,1914 Native Shakespeares Parmita Kapadia,2016-04-22 Explored in this essay collection is how Shakespeare is rewritten reinscribed and translated to fit within the local tradition values and languages of the world s various communities and cultures Contributors show that Shakespeare regardless of the medium theater pedagogy or literary studies is commonly rooted in the local customs of a people in ways that challenge the notion that his drama promotes a Western idealism Native Shakespeares examines how the persistent indigenization of Shakespeare complicates the traditional vision of his work as a voice of Western culture and colonial hegemony The international range of the collection and the focus on indigenous practices distinguishes Native Shakespeares from other available texts Invasive and Introduced Plants and Animals Ian D. Rotherham,Robert A. Lambert,2012-12-06 There have been many well publicized cases of invasive species of plants and animals often introduced unintentionally but sometimes on purpose causing widespread ecological havoc Examples of such alien invasions include pernicious weeds such as Japanese knotweed an introduced garden ornamental which can grow through concrete the water hyacinth which has choked tropical waterways and many introduced animals which have out competed and displaced local fauna This book addresses the broader context of invasive and exotic species in terms of the perceived threats and environmental concerns which surround alien species and ecological invasions As a result of unprecedented scales of environmental change combined with rapid globalisation the mixing of cultures and diversity and fears over biosecurity and bioterrorism the known impacts of particular invasions have been catastrophic However as several chapters show reactions to some exotic species and the justifications for interventions in certain situations including biological control by introduced natural enemies rest uncomfortably with social reactions to ethnic cleansing and persecution perpetrated across the globe The role of democracy in deciding and determining environmental policy is another emerging issue In an increasingly multicultural society this raises huge questions of ethics and choice At the same time in order to redress major ecological losses the science of reintroduction of native species has also come to the fore and is widely accepted by many in nature conservation However with questions of where and when and with what species or even species analogues reintroductions are acceptable the topic is hotly debated Again it is shown that many decisions are based on values and perceptions rather than objective science Including a wide range of case studies from around the world his book raises critical issues to stimulate a much wider debate
