Pamela Laird demolishes the popular American self-made story as she exposes the social dynamics that navigate some people toward opportunity and steer others away. Who gets invited into the networks of business opportunity? What does an unacceptable candidate lack? The answer is social capital: all those social assets that attract, respect, generate confidence, evoke affection, and invite loyalty. In retelling success stories from Benjamin Franklin to Andrew Carnegie to Bill Gates, Laird goes beyond personality, upbringing, and social skills to reveal the critical common key: access to circles that control and distribute opportunity and information. She explains how civil rights activism and feminism in the 1960s and 1970s helped demonstrate that personnel practices violated principles of equal opportunity. She evaluates what social privilege actually contributes to business success and analyzes the balance between individual characteristics, effort, innovation, talent, and social factors such as race, gender, class, and connections. In contrasting how Americans have prospered

or not with how we have talked about prospering Laird offers rich insights into how business really operates and where its workings fit within American culture From new perspectives on entrepreneurial achievement to the role of affirmative action and the operation of modern corporate personnel systems Pull shows that business is a profoundly social process and that no one can succeed alone

Library,1978 **WomanProphet** Elizabeth Love,2019-04-30 Most women are raised in a context of feminine values whether they are aware of those values or not Some of the values specific to this feminine culture are interdependence caring and relationality In our time many women cross over into a masculine value culture when they take on what were traditional male roles in male evolved institutions Eventually women become aware that their own values conflict with some assumed male values They then have to compromise and adjust in order to be productive in those environments The women I have focused on in this study have because of a significant external event or events and an emerging inner vision left both structures They then however lack others around them whose values structures can reinforce adherence When these women are by themselves they experience something like a dark night of the soul Once they get beyond the pain and a sense of meaninglessness they begin to realize that they can move the constructs of reality that they can write history as well as read it An essential concern is to deter mine what their values are After this process their own personal vision becomes clear But the cycle isn t complete until they bring

that new vision back to their people And bringing it back in a holistic sense helps to raise the moral sights of others who are influenced by that experience **The Successful Woman** Barbara Patterson,Nancy Meadows,Carol Dreger,1982 **The Sisterhood** Marcia Cohen,2014-04-01 In this epic drama of personality and politics passion and ambition courage and betrayal Marcia Cohen tells the fascinating inside story of the feminist revolution through the lives of the women who made it and were sometimes unmade by it Focusing on Betty Friedan Gloria Steinem Germaine Greer and Kate Millett The Sisterhood is a revealing group portrait of the women whose ideas and actions have so profoundly transformed us all This classic account traces the women s movement from its quiet birth in the 1960s through its startling triumphs in the 1970s and its troubled legacy in the 1980s Today everything seems possible for women as they function on an equal plane with men in nearly every walk of life But the revolution was hard won Now the irreverent entertaining chronicle that reveals all the well kept secrets of feminism with a thoughtful new foreword by the author appears in a special edition that serves as a riveting social history casting light on an entire era so important for women as well as men
