The American Farmer and the New Deal Theodore Saloutos, 1982      *The Rise and Fall of the Southern Tenant Farmers Union in Arkansas* James D. Ross, 2024-01-12

Founded in eastern Arkansas during the Great Depression the Southern Tenant Farmers Union (STFU) has long fascinated historians who have emphasized its biracial membership and the socialist convictions of its leaders while attributing its demise to external factors such as the mechanization of agriculture the repression of wealthy planters and the indifference of New Dealers. However as James Ross notes in this compelling revisionist history such accounts have largely ignored the perspective of the actual sharecroppers and other tenant farmers who made up the union's rank and file. Drawing on a rich trove of letters that STFU members wrote to union leaders government officials and others Ross shows that internal divisions were just as significant if not more so as outside causes in the union's ultimate failure. Most important the STFU's fatal flaw was the yawning gap between the worldviews of its leadership and those of its members. Ross describes how early on STFU secretary H. L. Mitchell promoted the union as one involving many voices sometimes in harmony sometimes in discord but later pushed a more simplified narrative of a few people doing most of the union's work. Struck by this significant change Ross explores what the actual goals of the rank and file were and what union membership meant to them. While the white leaders may have expressed a commitment to racial justice white members often did not he writes. While the union's socialist and communist leaders may have hoped for cooperative land ownership the members often did not. Above all the poor farmers who made up the membership wanted their immediate needs for food and shelter met and they wanted to own their own land and thus determine their own futures. Moreover while the leadership often took its inspiration from Marx the membership's worldview was shaped by fundamentalist Pentecostal Christianity. In portraying such tensions and how they factored into the union's implosion Ross not only offers a more nuanced view of the STFU he also makes a powerful new contribution to our understanding of the Depression era South. James D. Ross Jr is an associate professor of history at the University of Arkansas at Little Rock. He is a specialist in the interaction of race class and religion in twentieth century United States history.

*The Farm Security Administration and Rural Rehabilitation in the South* Charles Kenneth Roberts, 2024-01-12

This book fills an important void in the historical literature on New Deal reform and significantly updates Sidney Baldwin's 1968 book on the FSA. Through the lens of the programs of the FSA Charles Kenneth Roberts does an excellent job of relating how New Deal programs attempted to rehabilitate poor rural southerners. Aaron D. Purcell author of *Arthur Morgan: A Progressive Vision for American Reform* As the roaring twenties turned into the depressed thirties southern farmers far removed from the urban prosperity Americans had enjoyed during the 1920s heyday found already difficult farming conditions greatly intensified by the onset of the Great Depression. Agricultural incompetence plagued the rural South through the misuse of land depletion of natural resources and a system of single crop farming that failed to adequately provide for growing families on small farms especially

in the cotton producing Southeast Poverty and desperation came to define the farming communities of the rural South both in reality and in Americans collective conscious In *The Farm Security Administration and Rural Rehabilitation in the South* Charles Kenneth Roberts traces the administrative and political history of the Farm Security Administration FSA and reconciles the administration's goals with Franklin D Roosevelt's overall vision for the New Deal Roberts takes a grassroots approach to dissecting the FSA's history While other studies have focused on FSA photography or community building or even policy making in terms of top down government directives Roberts focuses on the people and state governments who faced an immediate need to aid southern farmers within their own borders and to boost their states crumbling agricultural economic bases Roberts focuses on rural rehabilitation as a key aspect of the FSA and defines the agency's legacy not in terms of its failures but rather in terms of an idealistic program whose modest successes were ultimately too few to effect real change for southern farmers Though Roosevelt failed to adequately recognize the plight of the southern farmer and political infighting hindered many of the administration's goals the creation of the FSA stands as one of the first efforts to provide sustained relief to struggling southern farmers In light of other federal programs of the era the FSA may seem like a mere footnote to the New Deal outside of its small but revered photography program But as Roberts shows the FSA's legacy has endured to the present day Charles Kenneth Roberts is a lecturer in history at Georgia Perimeter College His articles have appeared in the *Alabama Review* *Southern Historian* and *Agricultural History*

**Between Citizens and the State** Christopher P. Loss,2014-04-07 This book tracks the dramatic outcomes of the federal government s growing involvement in higher education between World War I and the 1970s and the conservative backlash against that involvement from the 1980s onward Using cutting edge analysis Christopher Loss recovers higher education s central importance to the larger social and political history of the United States in the twentieth century and chronicles its transformation into a key mediating institution between citizens and the state Framed around the three major federal higher education policies of the twentieth century the 1944 GI Bill the 1958 National Defense Education Act and the 1965 Higher Education Act the book charts the federal government s various efforts to deploy education to ready citizens for the national bureaucratized and increasingly global world in which they lived Loss details the myriad ways in which academic leaders and students shaped and were shaped by the state s shifting political agenda as it moved from a preoccupation with economic security during the Great Depression to national security during World War II and the Cold War to securing the rights of African Americans women and other previously marginalized groups during the 1960s and 70s Along the way Loss reappraises the origins of higher education s current day diversity regime the growth of identity group politics and the privatization of citizenship at the close of the twentieth century At a time when people s faith in government and higher education is being sorely tested this book sheds new light on the close relations between American higher education and politics

**Fighting Foreclosure** John A. Fliter,Derek S. Hoff,2012-09-05 In the depths of the Great Depression when foreclosure rates skyrocketed across the United States more than two dozen states passed mortgage extension or adjustment laws to help farmers and homeowners keep their properties One such statute in Minnesota led to the most important property law case of its time and still casts a long shadow upon constitutional debates and our own era s severe economic downturn Fighting Foreclosure marks the first book

length study of the landmark 1934 Supreme Court decision in Home Building and Loan Association v Blaisdell which by a 5 4 vote upheld the Minnesota Mortgage Moratorium Act On the one hand Blaisdell validated efforts by states to offer legislative relief to citizens struggling to keep their farms and homes On the other it caused an outcry among banking interests and conservative legal theorists who argued that these laws violated the Contract Clause of the Constitution and interfered with our free market system In his majority opinion Chief Justice Charles Evans Hughes argued that the reasonable and limited nature of the law and the unusual severity of the emergency it addressed placed it firmly within the police powers of the states to protect the health and safety of the people In a strongly worded dissent Justice George Sutherland argued for a consistent and strict interpretation of the Contract Clause regardless of economic exigency John Fliter and Derek Hoff provide a concise history and analysis of not only this landmark case and the reasoning behind its sharply divided decision but also of the entire history of the Contract Clause They trace closely the agricultural crisis political pressures and farmer protest movement that produced the Minnesota law And their study contributes to scholarly debate about the origins of the Constitutional Revolution of 1937 by which the Supreme Court accepted the New Deal as well as to public debates about constitutional interpretation and the role that government should play in providing relief to distressed citizens In the midst of our nation s ongoing suffering from massive foreclosures and bankruptcies Fighting Foreclosure also offers a potent reminder that the High Court s decisions often revolve around lives at risk as much as abstract legal debates The Presidency of Franklin Delano Roosevelt George T. McJimsey,2000 Concise and refreshingly balanced this history portrays FDR as he confronted crises of epic proportions during his record 12 year tenure as our nation s chief executive McJimsey gives a fresh account of Roosevelt s landmark administration and offers a new perspective on the New Deal 12 photos

The Rise of the Agricultural Welfare State Adam D. Sheingate,2003-07-22 A long dominant reading of American politics holds that public policy in the United States is easily captured by special interest groups Countering this view Adam Sheingate traces the development of government intervention in agriculture from its nineteenth century origins to contemporary struggles over farm subsidies His considered conclusion is that American institutions have not given agricultural interest groups any particular advantages in the policy process in part because opposing lobbies also enjoy access to policymakers In fact the high degree of conflict and pluralism maintained by American institutions made possible substantial retrenchment of the agricultural welfare state during the 1980s and 1990s In Japan and France two countries with markedly different institutional characters than the United States powerful agricultural interests and a historically close relationship between farmers bureaucrats and politicians continue to preclude a roll back of farm subsidies This well crafted study not only puts a new spin on agricultural policy but also makes a strong case for the broader claim that the relatively decentralized American political system is actually less prone to capture and rule by subgovernments than the more centralized political systems found in France and Japan Sheingate s historical comparative approach also demonstrates in a

widely useful way how past institutional developments shape current policies and options      Next Year Country H. Craig Miner, 2006 A richly textured history of the resilience and adaptability of western Kansans to survive two major depressions and the epic Dust Bowl years separated only by a brief golden age of war related prosperity Miner known as the dean of Kansas history vividly relates the people's negotiation with the high plains environment which happens to teach harsh lessons of mutability and perseverance better than most places      *American Studies International*, 1993      *The Era of Franklin D.
