Inside the Bauhaus presents the story of an idea about how people might live It is also the story of a school the Bauhaus whose life span coincided with the Weimar Republic s and whose history mirrors German history between the two world wars Through mass production the Bauhaus like the German Werkbund hoped to change the quality of the designed object and the designed environment for everyone Quality of life was an important design consideration in the housing schemes developed by Walter Gropius and Hannes Meyer respectively the first and second directors of the school and Ludwig Hilberseimer whose teaching responsibilities at the Bauhaus included the planning curriculum Howard Dearstyne the author of the present work was one of a handful of Americans to study at the Bauhaus and the only one to earn a diploma in architecture His account of life and education at the Bauhaus is drawn chiefly from contemporary sources from his letters from journals and letters kept by members of the Bauhaus faculty from newspaper articles and from the recollections of others Dearstyne also includes historical background of the structure of the curriculum of the Bauhaus as well as discussions of the various workshops and how they functioned prior to his admission to the school      Life in Berlin Cherese Cartlidge,Charles Clark,2001 Describes life in Berlin since the reunification      *Photographic Architecture in the Twentieth Century* Claire Zimmerman,2014-05-01 One hundred years ago architects found in the medium of photography so good at representing a building s lines and planes a necessary way to promote their practices It soon became apparent however that photography did more than reproduce what it depicted It altered both subject and reception as architecture in the twentieth century was enlisted as a form of mass communication Claire Zimmerman reveals how photography profoundly influenced architectural design in the past century playing an instrumental role in the evolution of modern architecture Her picture anthropology demonstrates how buildings changed irrevocably and substantially through their interaction with photography beginning with the emergence of mass printed photographically illustrated texts in Germany before World War II and concluding with the postwar age of commercial advertising In taking up photographic architecture Zimmerman considers two interconnected topics first architectural photography and its circulation and second the impact of photography on architectural design She describes how architectural photographic protocols developed in Germany in the early twentieth century expanded significantly in the wartime and postwar diaspora and accelerated dramatically with the advent of postmodernism In modern architecture she argues how buildings looked and how photographs made them look overlapped in consequential ways In architecture and photography the modernist concepts that were visible to the largest number over the widest terrain with the greatest clarity carried the day This richly illustrated work shows for the first time how new ideas and new buildings arose from the interplay of photography and architecture transforming how we see the world and how we act on it      *A Life with*

*History* John Morton Blum, 2004 The author of such classic works as *The Republican Roosevelt* *V Was for Victory* and *Years of Discord* John Morton Blum is one of a small group of intellectuals who for more than a quarter of a century dominated the writing of American political history Writing now of his own career Blum provides a behind the scenes look at Ivy League education and political power from the 1940s to the 1980s Blum insightfully recounts a long and distinguished journey that began at Phillips Academy where he first realized he could make a career of teaching and writing history He tells how young men were socialized to the values of the Northeastern establishment in those years before World War II and how as a non practicing Jew he learned to overcome bigotry both at Andover and at Harvard which then had no Jewish professors In 1957 Blum joined the faculty of Yale University's history department widely regarded as the nation's best where he became both influential and popular and where his students included one future U S president as well as others who aspired to the office He reveals much about the inner workings of Ivy League education and tells of controversies over the Vietnam War and the Black Panthers his role in Eugene McCarthy's presidential campaign and how he searched for common ground between reactionary faculty and radical students More than a recounting of a singular life Blum's story explains how political history was researched and written during the second half of the twentieth century describing how the discipline evolved gained ascendancy and was challenged as historical fashions changed It also offers revealing glimpses of such prominent academics as Kingman Brewster Arthur Schlesinger Jr C Vann Woodward and William Sloan Coffin Over a distinguished career Blum witnessed considerable change in elite educational institutions where minorities and women were grossly underrepresented when he first entered academia In a memoir brimming with insight and laced with humor he looks back at the academy not a refuge from reality but an alternative reality as he reflects upon his intellectual journey and his contributions to the study and writing of twentieth century American history
