APPROACHES TO INTERNATIONAL RELATIONS

--Karuna Kar Patra

International relations as a discipline is relatively new. After the end of the First World War, it was emerged seriously as a branch of study. The discipline developed during the 1930's, as a predominantly idealistic spectrum, that is, many practitioners were explicitly working along the lines which assumed the world peace would be preserved by strengthening the League of Nations and collective security. However, with the break of Second World War some of the eminent thinkers like E. H. Carr and Hans Morgenthau emerged in the scene, who were popularly known as the realists. Morgenthau's path breaking work "Politics among Nations" (1948) took the centre stage arguing that the struggle for power was the dominant feature of international politics. The substantive arguments were immensely important, relating to a world which looked as though it might well destroy itself, and it is not surprising that some of the central scholars in the discipline did not interest themselves directly in methodological questions. Around the middle of the 1950's, when cold war fully established, a group of scholars arose who, impressed by the apparent success of other disciplines such as economics, etc. began to apply the techniques of social sciences to its study.

However, writers on international relations agree that the structure of international society is becoming increasingly complex, but they disagree violently about the most helpful way of looking at it. The traditional way was to concentrate upon the states as the historically prominent units and to ignore other agents which lack the basic character of states -their sovereignty and territoriality. The influence of post-war evolution of the behavioural sciences has led to a greater or lesser acceptance of a behavioural analysis of international system as consisting of numerous, more or less, autonomous interacting actors.

It is very important why theories are required to understand international relations. Theories are interesting less for the substantive explanations they offer about political conditions in the modern world than as expressions of the limits of the contemporary political imagination when confronted with persistent claims about and evidence of

The Development of Political Science David Easton, Luigi Graziano, John Gunnell, 2002-03-11 In recent years the history of political science has become recognised as an important but neglected area of study The Development of Political Science is the first comprehensive discussion of the subject in a comparative international perspective Offering a wide ranging account of the development of the subject and its dissemination across national borders and cultural divides the book begins with a study of the historiography of the discipline in the United States a country which has been at the forefront of the field Widening its discussion to emphasise Western Europe as a focus for comparison the contributors provide studies of further areas of interest such as China and Africa This particular approach emphasises the book's vision of political science as a growing transnational body of knowledge In presenting critical analysis of the state of the field this vigorous study aims to further the development of the discipline in the countries discussed and to provide a work that is interesting not only to political scientists but to all those concerned with the development of the social sciences

Politics and the Life Sciences

Hines Jr., Odelia Funke, Joseph Losco, Patrick Stewart, 2014-10-21 This book examines the development of biopolitics as an academic perspective within political science It reviews the work of the leading proponents of this perspective and presents a comprehensive view of biopolitics as a framework to structure political inquiry

Political Science in Europe Thibaud Boncourt, Isabelle Engeli, Diego Garzia, 2020-05-28 The last half century has been a defining period for the development of political science in Europe disciplinary norms have become institutionalized in professional organizations training units and research centres the scholarly community has dramatically grown in size across the continent the analytical and methodological tools of the discipline are increasingly sophisticated and the knowledge disseminated under the label political science is bigger than it has ever been Political Science in Europe takes stock of these developments and reflects on the achievements of the discipline and the challenges it faces Is there a distinctive European blend of political science Is the European political science community cohesive and inclusive How does the discipline cope with the neoliberalisation of academia and the diffusion of illiberal politics Leading and up and coming political scientists answer these questions by discussing the discipline's key concepts and intellectual trends its professional structures and its relationship with its social economic and political environment

Democracy and Political Culture in Eastern Europe

Hans-Dieter Klingemann, Dieter Fuchs, Jan Zielonka, 2006-11-22 What is the relationship between democracy and political culture in countries undergoing major systemic change Have subjective political orientations of citizens been important in shaping the development of democracy in central and eastern Europe after the fall of communism These core questions are tackled by an impressive range of twenty political scientists sixteen of which are based in the central and eastern European countries covered in this essential new book Their analyses draw on a unique set of data collected and processed by the contributors to this volume within the framework of the World Values Survey project This data enables these authors to

establish similarities and differences in support of democracy between a large number of countries with different cultural and structural conditions as well as historical legacies The macro level findings of the book tend to support the proposition that support of democracy declines the further east one goes In contrast micro level relationships have been found to be astonishingly similar For example support of democracy is always positively related to higher levels of education no matter where an individual citizen happens to live This new book builds a clear understanding of what makes democracies strong and resistant to autocratic temptation

Political Communication in Real Time Dan Schill, Rita Kirk, Amy E. Jasperson, 2016-10-04 Much has been made of the speed and constancy of modern politics Whether watching cable news retweeting political posts or receiving news alerts on our phones political communication now happens continuously and in real time Traditional research methods often do not capture this dynamic environment Early studies that guided the study of political communication took place at a time when transistors and FM radio television and widely distributed films technologically changed the way people gained information and developed knowledge of the world around them Now the environment has transformed again through digital innovations This book provides one of the first systematic assessment of real time methods used to study the new digital media environment It features twelve chapters authored by leading researchers in the field using continuous or real time response methods to study political communication in various forms Moreover the authors explain how viewer attitudes can be measured over time message effects can be pin pointed down to the second of impact behaviors can be tracked and analyzed unobtrusively and respondents can naturally respond on their smartphone tablet or even console gaming system Leading practitioners in the field working for CNN Microsoft and Twitter show how the approach is being innovatively used in the field Political Communication in Real Time is a welcome addition to the growing field of interest in big data and continuous response research This volume will appeal to scholars and practitioners in political science and communication studies wishing to gain new insights into the strengths and limitations of this approach Political communication is a continuous process so theories applications and cognitive models of such communication require continuous measures and methods
