Institutional Innovation and Change in Value Chain Development Holly A. Ritchie,2016-03-02 George Bernard

Shaw once said that reasonable people adapt themselves to the world but unreasonable people adapt the world to themselves. In a sense, this book explores how these so-called unreasonable people may interact to refashion the world around them in fragile economic development. Drawing on empirical research in the volatile and traditional context of Afghanistan, the study investigates the challenge of poor women's participation in business and diverse outcomes for local development. Institutional Innovation and Change in Value Chain Development takes a unique look at nuanced institutional phenomena through the lens of social institutions with a subtle appreciation of the interaction of structure and agency. Drawing on in-depth qualitative research in Afghanistan, the case studies specifically investigate the transformation of the women's norm of purdah and the subsequent development of new market institutions in three women's enterprises. Shedding new light on the opaque process of institutional change, the research shows that external actors such as NGOs can both initiate and guide institutional development in fragile environments. Yet there may be limitations to their endeavours with strong resistance from local power holders. Meanwhile, dominant entrepreneurs are shown to play a major role in fostering institutional development pathways. This influences the scope of inclusion and exclusion in enterprise and value chains and broader streams of socio-economic development.

Government Foresighted Leading Yunxian Chen, Jianwei Qiu, 2016-12-08. Over the past several decades of reform and opening up to the outside world remarkable economic growth has been achieved in China and has drawn considerable world attention. The question of how to explain that phenomenon and the road China has taken towards its modernization have been the focus of attention from worldwide economists and experts. This book attempts to explore China's economy from the perspective of government foresighted leading which gives full play to government functions particularly those of regional governments. On the one hand government foresighted leading enables government to exercise foresighted leading by means of foundations mechanisms and regulations of market economy. On the other hand it could reduce government malfunction and minimize the cost of remedying defects. Government foresighted leading theory is an important innovation and contribution to the theoretical configuration of economics. It not only offers an explanation of China's continuous economic growth but further classifies economics into microeconomics macroeconomics and mezzoeconomics which includes regional economics industrial economics or structural economics supplementing the traditional microeconomics and macroeconomics.
