The Epidemiological Transition James N. Gribble, Samuel H. Preston, 1993-01-01 The Epidemiological Transition , 1993

The Epidemiological Transition National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, 1993-02-01 This book examines issues concerning how developing countries will have to prepare for demographic and epidemiologic change Much of the current literature focuses on the prevalence of specific diseases and their economic consequences but a need exists to consider the consequences of the epidemiological transition the change in mortality patterns from infectious and parasitic diseases to chronic and degenerative ones Among the topics covered are the association between the health of children and adults the strong orientation of many international health organizations toward infant and child health and how the public and private sectors will need to address and confront the large scale shifts in disease and demographic characteristics of populations in developing countries **The Epidemiological Transition** James N. Gribble, Samuel H. Preston, 1993

Health Futures Martha J. Garrett, 1999 **The Oxford Handbook of Global Health Politics** Colin McInnes, Kelley Lee, Jeremy R. Youde, 2020 Controlling a major infectious disease outbreak or reducing rising rates of diabetes worldwide is not just about applying medical science Protecting and promoting health is inherently a political endeavor that requires understanding of who gets what where and why The Oxford Handbook of Global Health Politics presents the most comprehensive overview of how and why power lies at the heart of global health determinants and outcomes The chapters are written by internationally recognized experts working at the intersection of politics and global health The wide ranging chapters provide key insights for understanding how advances in global health cannot be achieved without attention to political actors processes and outcomes *Reproductive Health in Developing Countries* National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Reproductive Health, 1997-07-02 Sexually transmitted diseases unintended pregnancies infertility and other reproductive problems are a growing concern around the world especially in developing countries Reproductive Health in Developing Countries describes the magnitude of these problems and what is known about the effectiveness of interventions in the following areas Infection free sex Immediate priorities for combating sexually transmitted and reproductive tract diseases are identified Intended pregnancies and births The panel reports on the state of family planning and ways to provide services Healthy pregnancy and delivery The book explores the myths and substantive socio economic problems that underlie maternal deaths Healthy sexuality Such issues as sexual violence and the practice of female genital mutilation are discussed in terms of the cultural contexts in which they occur Addressing the design and delivery of reproductive health services this volume presents lessons learned from past programs and offers principles for deciding how to spend limited available funds Reproductive Health in Developing Countries will be of special interest to policymakers health care professionals and

researchers working on reproductive issues in the developing world *The Demography of Forced Migration* Committee on Population, Commission on Behavioral and Social Sciences and Education, Division of Behavioral and Social Sciences and Education, National Research Council, 1998-07-24 Because forced migration situations are often physically dangerous and politically complicated estimates of these populations are often difficult to make Estimates of forced migration vary but it is probable that there are about 23 million refugees and more than 30 million internally displaced people In order to assist specific groups of forced migrants and also to better understand the general plight of forced migrants good demographic data are needed However collecting data on forced migration presents tremendous challenges for normal data collection processes and standards To explore a range of issues about internally displaced persons and refugees the Committee on Population of the National Research Council organized a Workshop on the Demography of Forced Migration in Washington D C in November 1997 The purpose of the workshop was to investigate the ways in which population and other social scientists can produce more useful demographic information about forced migrant populations and how they differ This report summarizes the background papers prepared for the meeting the presentations and the general discussion A Social History of Twentieth- Century Europe Béla Tomka, 2013 A Social History of Twentieth Century Europe offers a systematic overview on major aspects of social life including population family and households social inequalities and mobility the welfare state work consumption and leisure social cleavages in politics urbanization as well as education religion and culture It also addresses major debates and diverging interpretations of historical and social research regarding the history of European societies in the past one hundred years Organized in ten thematic chapters this book takes an interdisciplinary approach making use of the methods and results of not only history but also sociology demography economics and political science Béla Tomka presents both the diversity and the commonalities of European societies looking not just to Western European countries but Eastern Central and Southern European countries as well A perfect introduction for all students of European history Handbook of Sustainability Science and Research Walter Leal Filho, 2017-10-03 This multidisciplinary handbook explores concrete case studies which illustrate how sustainability science and research can contribute to the realization of the goals of the 2030 Agenda for Sustainable Development It contains contributions from sustainability researchers from across the world Commentary on the Global Burden of Disease Study Gonghuan Yang, 2025-05-30 This book intends to promote and assist professionals to better understand the global burden of disease methodology It introduces the GBD research thinking and work framework for most public health professionals and to systematically review the development history and characteristics of the GBD method It focuses to what questions to be answered and how to answer in GBD study For each topic the representative literatures and works of GBD are introduced in the book these representative literatures were selected by the authors on the basis of reading a large amount of the literature Based on these representative literature this book describes how GBD study uses a wide range of source of data sources to achieve its

research goals This way not only makes sure the accuracy of the introduced perspectives and methodology but also provides a shortcut to the key GBD literature relevant to the topic for people who are unfamiliar with GBD study As an introduction to the methodology of GBD study this book interprets the basic methods of GBD study and helps readers to further read the corresponding literature understand the methodology and main findings of GBD study and uses these methods in their own work Taking China as a case this book set a special chapter to introduce the estimated results of on the disease burden of the Chinese population and discuss the experience and lessons of GBD study in promoting national policy action **The**

Demography and Epidemiology of Human Health and Aging Jacob S. Siegel,2011-09-30 With this book Siegel an internationally known demographer and gerontologist has made a unique contribution to the fledgling fields of health demography and the demography and epidemiology of aging The book represents a felicitous union of epidemiology gerontology and demography and appears to be the first and only comprehensive text on this subject now available Drawing on a wide range of sciences in addition to demography gerontology and epidemiology including medical sociology biostatistics public policy bioethics and molecular biology the author treats theoretical and applied issues links methods and findings covers the material internationally nationally and locally and while focusing on the elderly treats the entire life course The methods materials and perspectives of demography and epidemiology are brought to bear on such topics as the prospects for future increases in human longevity the relative contribution of life style environment genetics and chance in human longevity the measurement of the share of healthy years in total life expectancy the role of population growth in the rising costs of health care and the applications of health demography in serving the health needs of local communities The separate chapters systematically develop the topics of the sources and quality of health data mortality life tables and the measurement of health status the interrelationships of health on the one hand and mortality fertility migration and age structure on the other health conditions in the less developed countries the concepts and theories of aging and projections of the aged population and local health applications public health policy and bioethical issues in health demography Given its comprehensiveness clarity interdisciplinary scope and authenticity this book appeals to a wide range of users from students and teachers of medical sociology the demography of aging and public health studies to practitioners in these areas both as a text in health demography and the demography epidemiology of aging and as a reference work in these fields **Our**

Common Journey National Research Council,Policy and Global Affairs,Policy Division,Board on Sustainable Development,1999-11-09 World human population is expected to reach upwards of 9 billion by 2050 and then level off over the next half century How can the transition to a stabilizing population also be a transition to sustainability How can science and technology help to ensure that human needs are met while the planet s environment is nurtured and restored Our Common Journey examines these momentous questions to draw strategic connections between scientific research technological development and societies efforts to achieve environmentally sustainable improvements in human well being

The book argues that societies should approach sustainable development not as a destination but as an ongoing adaptive learning process. Speaking to the next two generations it proposes a strategy for using scientific and technical knowledge to better inform future action in the areas of fertility reduction, urban systems, agricultural production, energy and materials use, ecosystem restoration and biodiversity conservation and suggests an approach for building a new research agenda for sustainability science. Our Common Journey documents large scale historical currents of social and environmental change and reviews methods for what if analysis of possible future development pathways and their implications for sustainability. The book also identifies the greatest threats to sustainability in areas such as human settlements, agriculture, industry and energy and explores the most promising opportunities for circumventing or mitigating these threats. It goes on to discuss what indicators of change from children's birth weights to atmosphere chemistry will be most useful in monitoring a transition to sustainability. *Rapport Trimestriel de Statistiques Sanitaires Mondiales* World Health Organization, 1997

EBOOK: New Themes In Palliative Care David Clark, Jo Hockley, Sam Ahmedzai, 1997-09-16 Palliative care is moving through an important period of expansion and development spreading beyond its original hospice base to encompass care in the community in hospitals, health centres, clinics and nursing homes. It can now be found in over 70 countries of the world. What challenges does this multidisciplinary speciality face as it seeks to combine high grade pain and symptom control with sensitive psychological, spiritual and social care? What are the implications of current constraints on health policy and planning? How do ethical issues about resource allocation and end of life care impinge? Can palliative care be further extended to include conditions other than cancer? *New Themes in Palliative Care* addresses these and many related issues in ways which will be readily accessible to students of health and social care as well as to those involved in purchasing or providing palliative care services and to social scientists interested in chronic illness, death and dying. Its editors are respected experts in the field with backgrounds in the social sciences, nursing and medicine and the book's contributors include leading international figures from a wide range of palliative care and academic disciplines. *Bibliographie Internationale D'anthropologie Sociale Et Culturelle* 1994, 1995 The IBSS is the essential tool for librarians, university departments, research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences. *SDG1 - No Poverty* Katarzyna Cichos, Amanda Lange Salvia, 2018-11-13 This work provides a new look at global problems of poverty and presents applicable solutions to show that the global community can eliminate poverty today and achieve its global promise Sustainable Development Goal 1 SDG 1. *Index of Conference Proceedings* British Library. Document Supply Centre, 1998. *Public Health in the 21st Century* Madelon L. Finkel, 2010-12-13 This extensive cutting edge compilation of essays on key public health topics is a must read for professionals, students and researchers with topics focusing on the effects of climate change on health, global issues including treatment and prevention of diseases, health care policy issues, health care needs of special populations, gender based violence and current issues in ethics and human

rights The three volumes of Public Health in the 21st Century are comprised of timely essays on a wide variety of public health issues that affect the world today and those that may do so tomorrow The essays gathered here are the work of a team of top researchers that includes behavioral scientists medical officials environmental scientists administrators educators and health education experts Volume one covers history developments and current issues in public health Volume two is about disease treatment and prevention and volume three discusses health disparities and policies that affect public health The last volume also looks at cutting edge research to show what the future may hold discussing how we will deal with for example emerging threats to public health stemming from global warming the mismanagement of natural resources multidrug resistant diseases and the explosion of chronic disease Each chapter presents an up to date scholarly review of a specific issue and discusses the challenges that nations communities and individuals must address to create a healthier world
