The Fallacy Of Social Science Research A Critical Examination And New Qual:

The Fallacy of Social Science Research Pablo González Casanova, 1981 **Rethinking Race and Ethnicity in Research Methods** John H Stanfield II, 2016-06-03 This collection of original work demonstrates the new ways in which particular research methodologies are used valued and critiqued in the field of race and ethnic studies Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers They then provide the intellectual histories strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical practical and epistemological issues that have influenced and challenged their methodological principles and applications Through these rigorous self examinations this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics This volume is a successor to Stanfield s landmark *Race and Ethnicity in Research Methods* Knowledge, Power and Dissent Guy R. Neave, 2006-01-01 This publication is based on the discussions of the 2004 Global Colloquium on Research and Higher Education Policy of the UNESCO Forum for Higher Education Research and Knowledge held in Paris in December 2004 It contains contributions from 17 international experts in the field of higher education which explore the global rise of the knowledge society and its implications for higher education and for sustainable human development in the future **The Texas-Mexican Conjunto** Manuel Peña, 2010-07-05 Around 1930 a highly popular and distinctive type of accordion music commonly known as conjunto emerged among Texas Mexicans Manuel Peña s *The Texas Mexican Conjunto* is the first comprehensive study of this unique folk style The author s exhaustive fieldwork and personal interviews with performers disc jockeys dance promoters recording company owners and conjunto music lovers provide the crucial connection between an analysis of the music itself and the richness of the culture from which it sprang Using an approach that integrates musicological historical and sociological methods of analysis Peña traces the development of the conjunto from its tentative beginnings to its preeminence as a full blown style by the early 1960s Biographical sketches of such major early performers as Narciso Martínez El Huracán del Valle Santiago Jiménez El Flaco Pedro Ayala Valerio Longoria Tony de la Rosa and Paulino Bernal along with detailed transcriptions of representative compositions illustrate the various phases of conjunto evolution Peña also probes the vital connection between conjunto s emergence as a powerful symbolic expression and the transformation of Texas Mexican society from a pre industrial folk group to a community with increasingly divergent socioeconomic classes and ideologies Of concern throughout the study is the interplay between ethnicity class and culture and Peña s use of methods and theories from a variety of scholarly disciplines enables him to tell the story of conjunto in a manner both engaging and enlightening This important study will be of interest to all students of Mexican American culture ethnomusicology and folklore *Three Latin American Sociologists* Joseph A. Kahl, 2024-12-06 Originally published in 1976 under the title *Modernization Exploitation and Dependency in Latin America* and again in 1988 under the current title the

author describes examines and introduces the life and work of three of the most important figures in the development of comparative politics and political sociology Gino Germani Argentina Pablo Gonzales Casanova Mexico and Fernando Henrique Cardoso Brazil At the time of its first publication the book introduced those three Latin American sociologists to the North American social and political science community However as Peter Evans points out in his introduction the book had not lost its importance in the intervening years Rather the subsequent developments in comparative scholarship have only highlighted the influence of the three Latin Americans The developments in comparative and political social science can virtually only be understood in the light of the influence that the thought of Germani Gonzales Casanova and Cardoso had on the discussions in North America

Technologies of Knowing John Willinsky, 2000-02-15 In this age of ever more powerful computers our ability to collect and spread knowledge is growing at an exponential rate Far from liberating humanity our information exasperation as John Willinsky describes it in this pathbreaking book has made our ability to reach conclusions about the world around us all the more difficult With little order to guide us through the mountains of new information in the Internet the public as well the sciences that have amassed such knowledge has little confidence in its potential to change the world for the better For example the overload of conflicting new findings in breast cancer research has so paralyzed progress that some researchers now recommend that women stop examining themselves to avoid the psychological burden of monthly searches for this deadly disease While some critics have condemned computers and the Internet for putting us in this age of overflow and still others have praised them for their own sake Willinsky takes a middle ground Using the fictitious Automata Data Corporation as the vehicle for an ingenious thought experiment he plays out what would happen if all information collected from social science research were centralized catalogued and processed by one company serving the public interest Willinsky describes in great detail how such an entity could work to fulfill the promises of the human sciences and technology Sure to stir debate *Technologies of Knowing* offers a starting point from which to rethink our understanding of our emerging wired world and adds new insight into how to make the uses of knowledge more democratic

Cultural Capital Lane Ryo Hirabayashi, 2022-04-05 This book shows how Zapotec peasants migrating to Mexico City utilize paisanazgo which prescribes solidarity among people from the same locale as the basis for cooperation and mutual aid within a new environment This study focuses on three groups of Mountain Zapotecs to explain why migrant associations were created and why they took different forms citing regional variations in ethnicity solidarity occupational pursuits and sociopolitical articulation to the nation in the three points of origin

Transfigurations Asbjørn Grønstad, 2008 In many senses viewers have cut their teeth on the violence in American cinema from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes to the 1970s masterpieces of Martin Scorsese Sam Peckinpah and Francis Ford Coppola to our present day undertakings in imagining global annihilations through terrorism war and alien grudges *Transfigurations* brings our cultural obsession with film violence into a renewed dialogue with contemporary theory Gr nstad argues that the use of violence in Hollywood films

should be understood semiotically rather than viewed realistically Transfigurations thus alters both our methodology of reading violence in films and the meanings we assign to them depicting violence not as a self contained incident but as a convoluted network of our own cultural ideologies and beliefs

White Logic, White Methods Tukufu Zuberi, Eduardo Bonilla-Silva, 2008-05-02 Examines how the racial lenses of the social sciences and the subscription of social scientists to whites racial common sense have limited their understanding of racial matters and handicapped their capacity to appreciate the significance of the race effect they call it the racial stratification effect With an assemblage of leading scholars White Logic White Methods explores the possibilities and necessary dethroning of current social research practices and demands a complete overhaul of current methods towards a multicultural and pluralist approach to what we know think and question Readers in various social sciences will find useful the chapters in the collection but all will agree that the introductory and concluding chapters to the volume Towards a Definition of White Logic and White Methods and Telling the Real Tale of the Hunt Towards a Race Conscious Sociology of Racial Stratification are likely to become classics in the field of racial and ethnic relations

The Use and Abuse of Social Science Frank A. Heller, 1986 Expectations about the use of social science research vary from the near euphoric to the downright cynical The Use and Abuse of Social Science looks at the outcomes of such research in order to give a realistic appraisal of what our expectations should be The authors describe a number of successful and unsuccessful applications of social science research and highlight some outright abuses Within a realistic framework they provide impressive arguments and supporting data to show that social science research can lead to important developments in policy and to changes in practice Their evidence also demonstrates that there are many equally valid research philosophies and methods The authors come from a wide variety of disciplines including systems science economics criminology sociology political science organizational studies psychology and government administration Their experience covers the United States France Germany Great Britain Sweden the Netherlands and Australia

Data Analysis in Qualitative Research Stefan Timmermans, Iddo Tavory, 2022-06-06 From two experts in the field comes an accessible how to guide that will help researchers think more productively about the relation between theory and data at every stage of their work In Data Analysis in Qualitative Research Iddo Tavory and Stefan Timmermans provide a how to guide filled with tricks

of the trade for researchers who hope to take excellent qualitative data and transform it into powerful scholarship. In their previous book *Abductive Analysis: Theorizing Qualitative Research*, Timmermans and Tavory offered a toolkit for innovative theorizing in the social sciences. In this companion they go one step further to show how to uncover the surprising revelations that lie waiting in qualitative data in sociology and beyond. In this book they lay out a series of tools designed to help both novice and expert scholars see and understand their data in surprising ways. Timmermans and Tavory show researchers how to stack the deck of qualitative research in favor of locating surprising findings that may lead to theoretical breakthroughs whether by engaging with theory, discussing research strategies, or walking the reader through the process of coding data. From beginning to end of a research project, *Data Analysis in Qualitative Research* helps social scientists pinpoint the most promising paths to take in their approach.

The SAGE Encyclopedia of Social Science Research Methods Michael Lewis-Beck, Alan E. Bryman, Tim Futing Liao, 2004. This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels. LIBRARY JOURNALS. SAGE Reference is proud to announce *The SAGE Encyclopedia of Social Science Research Methods*, a three-volume resource that is a first of its kind, developed by the leading publisher of social science research methods books and journals. This unique multi-volume reference set offers readers an all-encompassing education in the ways of social science researchers. Written to be accessible to general readers, entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods. The Encyclopedia features two major types of entries: definitions consisting of a paragraph or two that provide a quick explanation of a methodological term and topical treatments or essays discussing the nature, history, application, example, and implication of using a certain method. Also included are suggested readings and references for future study. To help provide a more complete explanation than is often achieved within the scope of a single article, key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere. In addition to epistemological issues that influence the nature of research questions and assumptions, *The SAGE Encyclopedia of Social Science Research Methods* tackles topics not normally viewed as part of social science research methodology, from philosophical issues such as poststructuralism to advanced statistical techniques. In covering the full range of qualitative and quantitative data analyses, this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way, stimulating both interest and new perspectives. One example is the entry *Econometrics* by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process: from economic theory to data and models to analysis, once in principle and a second time

with an example In using the ordinary process of economic research to achieve an extraordinary impact he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics Topics Covered Analysis of Variance Association and Correlation Basic Qualitative Research Basic Statistics Causal Modeling Structural Equations Discourse Conversation Analysis Econometrics Epistemology Ethnography Evaluation Event History Analysis Experimental Design Factor Analysis Related Techniques Feminist Methodology Generalized Linear Models Historical Comparative Interviewing in Qualitative Research Latent Variable Model Life History Biography Loglinear Models Categorical Dependent Variables Longitudinal Analysis Mathematics and Formal Models Measurement Level Measurement Testing Classification Multiple Regression Multilevel Analysis Qualitative Data Analysis Sampling in Surveys Sampling in Qualitative Research Scaling Significance Testing Simple Regression Survey Design Time Series Key Features Over 900 entries arranged A to Z Each entry is written by a leading authority in the field covering both quantitative and qualitative methods Covers all disciplines within the social sciences Contains both concise definitions and in depth essays Three volumes and more than 1500 pages

Beyond the Case Corey M. Abramson, Neil Gong, 2020 The social sciences have seen a substantial increase in comparative and multi sited ethnographic projects over the last three decades Yet at present researchers seeking to design comparative field projects have few scholarly works detailing how comparison is conducted in divergent ethnographic approaches In *Beyond the Case* Corey M Abramson and Neil Gong have gathered together several experts in field research to address these issues by showing how practitioners employing contemporary iterations of ethnographic traditions such as phenomenology grounded theory positivism and interpretivism use comparison in their works The contributors connect the long history of comparative and anti comparative ethnographic approaches to their contemporary uses By honing in on how ethnographers render sites groups or cases analytically commensurable and comparable *Beyond the Case* offers a new lens for examining the assumptions payoffs and potential drawbacks of different forms of comparative ethnography

Kuleana and Commitment Kathleen L. Kawelu, 2015-08-31 The sociopolitical climate of Hawai i has changed substantially in recent decades and archaeologists working to decipher the islands past are increasingly faced with a complexity of issues involving Kanaka Maoli Native Hawaiian concerns Among these are the push for sovereignty cultural perpetuation and revitalization legal challenges to Kanaka Maoli programs such as Hawaiian Home Lands and the Office of Hawaiian Affairs and compliance with the Native American Graves Protection and Repatriation Act NAGPRA In *Kuleana and Commitment* Kathleen L Kawelu examines the entangled interactions between Kanaka Maoli and archaeologists in Hawai i by conducting an ethnographic investigation of the discipline of archaeology itself She explores the development of Hawaiian archaeology discusses important cases of the recent past and focuses on the interpersonal relationships between these two key groups involved in heritage management in Hawai i By revealing and understanding the contemporary attitudes of Kanaka Maoli and archaeologists toward each other Kawelu suggests a change in trajectory toward a more collaborative

approach in practicing Hawaiian archaeology Through interviews with individuals from both communities Kawelu taps into collective narratives that reveal two overarching themes The first narrative speaks about the continuation of Kanaka Maoli cultural practices and beliefs for example kuleana responsibility the second speaks about the kind of commitment to Hawaiian archaeology and Kanaka Maoli descendants that is desired from archaeologists Requests for respect communication and partnership are heard in the narratives These same qualities also serve as the foundation for community based archaeology which challenges the exclusive access of archaeologists to the past and places the discipline and its practitioners among a broader group of stakeholders particularly descendant communities
