Scale, Governance and Change in Zambezi Teak Forests Michael Musgrave, 2016-02-22 The Zambezi Teak forests of western Zambia have been exploited for their timber for over 80 years The record of this exploitation and the subsequent collapse of the timber industry provide a unique insight into problems around land use change governance and the interaction between ecology society and forest management in south central Africa A wide ranging study this book is as much an examination of methodology for sustainability research as it is a review of land use change forest management and rural livelihoods It explores the problem of scale and how using explicit

considerations of scale may contribute to an integration between the life sciences and the social sciences that a holistic assessment of sustainable development problems demands. Specific details of land use change in the region are examined over a 30 year period including the first detailed mapping of changes to the Zambezi Teak forests since logging ceased in the early 1970s. Forest management practices and fire emerge as important drivers of land use change and the book provides examples of how forest management and governance are important to sustainable development in this sparsely populated and inaccessible region. For readers interested in a detailed understanding of the problems of deforestation, land use change and governance in the dry forests of Africa, this book is essential reading. It also provides insights into wider questions of how multidisciplinary studies may be integrated in a holistic synthesis. African dry forests have been widely studied but few publications examine the problems of land use change and deforestation in this level of detail. The author draws on 20 years of experience in south central Africa to combine historical records with research on current political, social and governance issues. The result is a landmark publication which covers a depth and breadth that is seldom achieved in studies of African sustainable development.

The Future of Ecocriticism Serpil Oppermann, Ufuk Özdağ, Nevin Özkan, 2011-05-25. As we enter the second decade of the twenty-first century, environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations. How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society's environmentally and socially destructive behaviors? The field of ecocriticism, also sometimes called environmental criticism, attempts to grapple with such issues. A branch of literary and cultural studies that essentially began in North America in the 1970s, ecocriticism is currently one of the most quickly developing areas of environmental research and teaching. *The Future of Ecocriticism: New Horizons* brings together thirty-two of the latest articles in the field, including work by some of the leading scholars from around the world. Although ecocriticism has been particularly active in North America, Western Europe and East Asia, important studies of traditional environmental thought, environmental communication strategies and environmental aesthetics have begun to emerge in every region of this world. This new book, co-edited by three prominent Turkish scholars and a leading American ecocritic, offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia. Another unique feature of *The Future of Ecocriticism: New Horizons* is the concluding dialogue among the four editors about the current state of the field.

The Beast in the Garden David Baron, 2010-10-04. The true tale of an Edenic Rocky Mountain town and what transpired when a predatory species returned to its ancestral home. When in the late 1980s residents of Boulder, Colorado suddenly began to see mountain lions in their yards, it became clear that the cats had repopulated the land after decades of persecution. Here, in a riveting environmental fable that recalls Peter Benchley's thriller *Jaws*, journalist David Baron traces the history of the mountain lion and chronicles Boulder's effort to coexist with its new neighbors. A parable for our times, *The Beast in the Garden* is a scientific detective story and a real-life drama, a tragic

conservation industrial complex promoted a development oriented brand of conservation that aided the rise of large scale capital intensive agriculture which continues today It also reshaped the physical and political landscapes of the country leading to impressive conservation victories and spectacular failures by privileging some environments degrading others and intensifying farm depopulation In the name of environmental protection agricultural conservation made rural America less equal

Everyday Aesthetics Yuriko Saito, 2008-01-03 Everyday aesthetic experiences and concerns occupy a large part of our aesthetic life However because of their prevalence and mundane nature we tend not to pay much attention to them let alone examine their significance Western aesthetic theories of the past few centuries also neglect everyday aesthetics because of their almost exclusive emphasis on art In a ground breaking new study Yuriko Saito provides a detailed investigation into our everyday aesthetic experiences and reveals how our everyday aesthetic tastes and judgments can exert a powerful influence on the state of the world and our quality of life By analysing a wide range of examples from our aesthetic interactions with nature the environment everyday objects and Japanese culture Saito illustrates the complex nature of seemingly simple and innocuous aesthetic responses She discusses the inadequacy of art centered aesthetics the aesthetic appreciation of the distinctive characters of objects or phenomena responses to various manifestations of transience and the aesthetic expression of moral values and she examines the moral political existential and environmental implications of these and other issues
