

THEORIES OF THE ETIOLOGY OF ELDER ABUSE

- “Psychopathology of the abuser”
 - Caregivers who have preexisting conditions that impair their capacity to give appropriate care
- “Transgenerational violence”
 - Part of the family violence continuum
 - is based on the belief that violence is a learned behavior pattern. A child observes violence as an acceptable reaction to stress and then internalizes this as an acceptable behavior. In cases of elder abuse, violent behavior becomes cyclical: the abused – the child - becomes the abuser of the parent.

down the road by constructing clear lines of accountability and by protecting and representing children at risk by helping potential abusers and developing practice that avoids punishing victims through removing them from their homes

Violence against Girls and Women Janet A. Sigal, Florence L. Denmark, 2013-08-27 Sexual assault, sex trafficking and child abuse affect millions of women and girls globally each year. This two-volume set covers a broad scope of topics from violence against girls before birth in childhood and throughout women's adult lives. Millions of women around the world; some data suggests as many as three in every four women face violence against them throughout their lifetimes. Violence in the Home Karel Kurst-Swanger, Jacqueline L. Petcosky, 2003-03-27 Violence in the home is one of the most damaging and widespread of social problems. It is an issue that cuts across all socioeconomic, racial, ethnic, gender and age boundaries. It takes many forms including emotional, physical and sexual abuse as well as neglect. This important book reviews the most current theoretical explanations of family violence and then links theory to practice. It looks at the systems and institutions that interact with families which are mandated to provide protection and services and explores the current debates surrounding family violence and public policy. In addition, Kurst-Swanger explores the role of power in abusive relationships and considers the short and long-term consequences of abuse. This insightful book will be a practical resource for professionals and of interest to all those concerned with the far-reaching impact of family violence. **Parricide and**

Violence against Parents Marianna Muravyeva, Phillip Shon, Raisa Maria Toivo, 2020-12-30 *Parricide and Violence Against Parents* takes a historical and criminological approach to the research on parricide and violence against parents, placing the research in the context of social development from the 1500s to contemporary society and giving a global overview and comparison. The book examines parricide and violence against parents as historically and culturally sensitive phenomena. It offers evidence on a seemingly rare subject from different eras, areas and cultures and then uses the cross-disciplinary data to produce a new systematic insight for the reader. Case studies shift the discussion from the contemporary focus on adolescent to parent abuse to examining the sources of conflict during life cycles of parents and their offspring. A historical approach illuminates the variations in conflicts between parents and their offspring that are shaped by the life stages of the victims and offenders themselves across time. The book argues that parental authority has been marked by property ownership and tax-paying responsibilities throughout history. The continued possession of property resulted in power, the reluctance to part with it becoming a notable source of conflict across generations within families. Parental authority was protected by means of heavy penalties and punishments and didactic teachings in almost every society at every stage of

historical development It was also challenged constantly by children as a part of their coming into adulthood The abuse of parents has often been connected to situations where adult children were prevented from gaining the amount of independence appropriate to their position in life This led to disputes over authority and the legitimate grounds for that authority Offering an insight into complicated and interconnected histories of generational conflicts and how they affect modern families in different parts of the world this book will be of great interest to students and scholars of criminology history of crime history of the family family violence homicide studies gender studies history of emotions political violence and social work *Family Violence* Cliff Roberson,Paul Harvey Wallace,2016-08-04 Family Violence Legal Medical and Social Perspectives examines the entire spectrum of family violence focusing on social processes and social relationships The eighth edition is a multidisciplinary introduction to the study of domestic violence that guides readers to a better understanding of the challenges involved in reducing or eliminating violence The new edition includes more information on PTSD and head trauma a new section in children witnessing domestic violence more international perspectives which allow students to understand that family violence crosses borders and cultures and a series of Promising Practices boxes that bring professional knowledge and accomplishments into the classroom *Family Violence* Sandra J. Kaplan,Howard A.
