Akrivou,German Scalzo,José Víctor Orón Semper,2019-01-17 How should we understand the self as well as personal
relational and systemic growth This volume proposes a radical new way of answering this question It rests on a non
representational theory of knowledge on how to approach and understand the self and action more broadly Although it has
never been lost the Aristotelian emphasis on excellence in moral character and practical reason as preconditions for
achieving happiness has gradually been degraded This book suggests that this has happened thanks to a split between
knowledge and action that can be traced back to the origins of modernity Modern academic disciplines in general and
psychology in particular are based on the idealisation of theoretical hypothetical and abstract reason suggesting that this
morally neutral ideal must guide human action This volume systematically integrates those domains in a more profound and
meaningful proposal relevant for current times and challenges Based on previous research bridging philosophy psychology
and neuroscience the contributors here identify two alternative paradigms for conceiving of the self and human development
the so called autonomous self AS and the inter processual self IPS The book considers the person as an ethical being and as
the foundational cornerstone of a new theory of self action and knowing that achieves decisive distance from modern theory s
limitations To keep on going dialogue on human development open the authors introduce a new theoretical model IPS which
can be scientifically measured and tested they also suggest its further application in concrete practical realms thus touching
on how the adoption of the IPS paradigm inspires a renewed view of human cognition education governance and business
