**Studio Anywhere** Nick Fancher,2015 The concept for Studio Anywhere came from photographer Nick Fancher s experience trying to build model shots for his portfolio As a young professional photographer with a family he didn t have the money to rent out a studio and he wasn t familiar with all the areas around some of his models locations when he was traveling for example So he started shooting in the models living spaces Each place was different a penthouse here a dark art space there and they all forced him to think a bit outside the box and seek out photographic opportunities He also had to carry little gear traveling light All this gave him the idea for this book which highlights what one can do with a bit of portable gear a grasp of photographic basics and a lot of imagination in order to see the possibilities in any given situation In Studio Anywhere A Photographer s Guide to Shooting in Unconventional Locations Nick will cover different studios that can be created anywhere from a basement to a street from an office to a park from a living room to a backyard And he will do all this with just the following gear 1 3 Speedlites a foam core board a grid for the flash an umbrella an ND filter and gaffer tape And because his photos have a unique look to them Nick will also include his post processing in Lightroom with occasional pro tips as he jumps over to Photoshop for just a bit of heavier lifting in the digital darkroom Nick will also have a Deconstruct this photo thread running throughout the book one for each studio section which will help students be able to better read photos how many lights were used what kind of modifier was used where was the light placed in order to reverse engineer them so that they can recreate similar lighting scenarios themselves After reading Studio Anywhere students will be inspired

to get out and shoot in more unconventional locations and will be equipped with the knowledge and know how to do so
