Learning from Six Philosophers:

Volume 2 Jonathan Bennett, 2001-02-22 Jonathan Bennett engages with the thought of six great thinkers of the early modern period Descartes Spinoza Leibniz Locke Berkeley Hume While not neglecting the historical setting of each his chief focus is on the words they wrote What problem is being tackled How exactly is the solution meant to work Does it succeed If not why not What can we learn from its success or its failure These questions reflect Bennett s dedication to engaging with philosophy as philosophy not as museum exhibit and they require a close and demanding attention to textual details these being two features that characterize all Bennett s work on early modern philosophy For newcomers to the early modern scene this clearly written work is an excellent introduction to it Those already in the know can learn how to argue with the great philosophers of the past treating them as colleagues antagonists students teachers Volume 2 In this volume Jonathan

Bennett examines the views of Locke Berkeley and Hume on thought and sensation meaning language classification innate ideas and knowledge our knowledge of necessary truths bringing in Descartes and Leibniz as well the basis for our belief that we live in a world of material things causation the fundamental difference between colours and shapes the passage of time and our ability to live through it While finding much to criticize Bennett shows that we can learn much about these and other topics under the guidance and inspiration of the energy courage and insight of these three great British philosophers

Meaning in Life Thaddeus Metz,2013-11-07 What makes a person s life meaningful Thaddeus Metz offers a new answer to an ancient question which has recently returned to the philosophical agenda He proceeds by examining what if anything all the conditions that make a life meaningful have in common The outcome of this process is a philosophical theory of meaning in life He starts by evaluating existing theories in terms of the classic triad of the good the true and the beautiful He considers whether meaning in life might be about such principles as fulfilling God s purpose obtaining reward in an afterlife for having been virtuous being attracted to what merits attraction leaving the world a better place connecting to organic unity or transcending oneself by connecting to what is extensive He argues that no extant principle satisfactorily accounts for the three fold significance of morality enquiry and creativity and that the most promising theory is a fresh one according to which meaning in life is a matter of intelligence contoured toward fundamental conditions of human existence **God and the Meanings of Life** T. J. Mawson,2016-10-20 Some philosophers have thought that life could only be meaningful if there is no God For Sartre and Nagel for example a God of the traditional classical theistic sort would constrain our powers of self creative autonomy in ways that would severely detract from the meaning of our lives possibly even evacuate our lives of all meaning Some philosophers by contrast have thought that life could only be meaningful if there is a God God and the Meanings of Life is interested in exploring the truth in both these schools of thought seeking to discover what God could and couldn t do to make life meaningful as well as what he would and wouldn t do Mawson espouses a version of the amalgam or pluralism thesis about the issue of life s meaning in essence that there are a number of different legitimate meanings of meaning and indeed life in the question of life s meaning According to Mawson God were he to exist would help make life meaningful in some of these senses and hinder in some others He argues that whilst there could be meaning in a Godless universe there could be other sorts of meaning in a Godly one and that these would be deeper **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association,2001 List of members in v 1

The Aesthetics of Food Kevin W. Sweeney, 2017-12-29 The Aesthetics of Food sets out the continuing philosophical debate about the aesthetic nature of food The debate begins with Plato's claim that only objects of sight and hearing could be beautiful consequently food as something we smell and taste could not be beautiful Plato's sceptical position has been both supported and opposed in one form or another throughout the ages This book demonstrates how the current debate has evolved and critically assesses that debate showing how it has been influenced by the changing nature of critical theory and changes in art historical paradigms Expressionism Modernism and Post modernism as well as by recent advances in neuroscience It also traces changes in our understanding of the sensory experience of food and drink from viewing taste as a simple single sense to current views on its complex multi sensory nature Particular attention is paid to recent philosophical discussion about wine whether an interest in a wine reflects only a subjective or personal preference or whether one can make objective

judgments about the quality and merit of a wine Finally the book explores how the debate has been informed by changes in the cooking presenting and consuming of food for example by the appearance of the restaurant in the early nineteenth century as well as the rise of celebrity chefs
