A diverse international region the Pyrenees has been characterized as a quintessential example of rural areas across Europe

science to integrate human agency and ecology across a landscape that moved from agricultural and pastoral production to

Richardson,2002 When Spanish dictator Francisco Franco legalized internal immigration in 1947 he unwittingly inaugurated
the greatest period of urban expansion and rural de population that Spain had known During the next two decades nearly
four million citizens would move from Spain s traditional pueblos perdidos to overburdened urban metropolises Along with
wooden trunks and baskets of chickens the immigrants or paletos as they were often called bore on their journey the weight
of centuries of ideological meaning tied to the geographic regions they were traversing To abandon rural Spain had come to
signify a rejection of manhood wealth Christian values and even Spanishness itself Paletos however innocent they may have
appeared were not ideologically neutral In the coming decades the weight and complexity of the meanings behind
immigration the country and the city would only grow as Spain advanced from economic under development social ignorance
and political reaction to full fledged participation in global economics and politics activities that would reshape what it meant
to be an immigrant and paleta both within and across the geographic border that had traditionally defined the Spanish nation
