standardised testing and sources e.g. self-report proxy for collecting information about clients are then reviewed and the main purposes of assessment e.g. descriptive, evaluative, predictive, discriminative presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Research Methods for Counseling Robert J. Wright, 2013-02-12

Research Methods for Counseling: An Introduction provides a rich, culturally sensitive presentation of current research techniques in counseling. Author Robert J. Wright introduces the theory and research involved in research design, measurement and assessment with an appealingly clear writing style. He addresses ways to meet the requirements of providing the data needed to facilitate evidence-based therapy and interventions with clients and also explains methods for the evaluation of counseling programs and practices. This comprehensive resource covers a broad range of research methods topics including qualitative research, action research, quantitative research including sampling and probability and probability-based hypothesis testing. Coverage of both action research and mixed methods research designs are also included.
