Fuzzy Rationality Kofi Kissi Dompere, 2009-07-22 Philosophy involves a criticism of scientific knowledge not from a point of view ultimately different from that of science but from a point of view less concerned with details and more concerned with the h many of the body of special sciences Here as elsewhere while the older logic shut out possibilities and imprisoned imagination within the walls of the familiar the newer logic shows rather what may happen and refuses to decide as to what must happen Bertrand Russell At any particular stage in the development of humanity knowledge comes up against limits set by the necessarily limited character of the experience available and the existing means of obtaining knowledge But humanity advances by overcoming such limits New experience throws down the limits of old experience new techniques new means of obtaining knowledge throw down the limits of old techniques and old means of obtaining knowledge New limits then once again appear But there is no more reason to suppose these new limits absolute and final than there was to suppose the old ones absolute and final

The Indies of the Setting Sun Ricardo Padrón, 2022-07-06

Although the tendency to depict America as a part of Asia is most often associated with the print cartography of Renaissance humanists living and working north of the Pyrenees it was actually the Spanish speaking world that was most committed to mapping the New World in terms of transpacific connectivity that is the notion that North America was actually an extension of East Asia and that the South Sea today s Pacific Ocean was actually much narrower than it in fact is Columbus s dream of reaching the East by sailing west did not fade as America began to take form in the European imagination On the contrary it nourished continued efforts to press westward from New Spain culminating in the establishment of a Spanish colony in the Philippine Islands during the 1560s and speculation about continued conquest both temporal and spiritual on the continent of Asia Throughout this westward push the space between Mexico and Malacca was most often theorized not as America or the New World but quite simply as las Indias an eminently flexible concept that served to keep Spain s transpacific ambitions alive even as various empirical realities regarding the true geography of the vast Pacific Basin slowly came into sharper focus over the century These and other theories kept the New World connected to Asia in a variety of ways subtending Spain s dreams ultimately failed of a transpacific empire Padr n here outlines the contours of a largely forgotten geopolitical imaginary whose existence and salience has only become visible from the perspective afforded by the twenty first century the Pacific Century

Multistrategy Learning Ryszard S. Michalski,1993-06-30 Most machine learning research has been concerned with the development of systems that implement one type of inference within a single representational paradigm Such systems which can be called monostrategy learning systems include those for empirical induction of decision trees or rules explanation based generalization neural net learning from examples genetic algorithm based learning and others Monostrategy learning systems can be very effective and useful if learning problems to which they are applied are sufficiently narrowly defined Many real world applications however pose learning problems that go beyond the capability of monostrategy learning methods In view of this recent years have witnessed a growing interest in developing multistrategy systems which integrate two or more inference types and or paradigms within one learning system Such multistrategy systems take advantage of the complementarity of different inference types or representational mechanisms Therefore they have a potential to be more versatile and more powerful than monostrategy systems On the other hand due to their greater complexity their development is significantly more difficult and represents a new great challenge to the machine learning community Multistrategy Learning contains contributions characteristic of the current research in this area
