

The Philippine Challenge: Sustainable and Equitable Development in the 1990s

To be born into the Philippines today is to face a future that is, at best, uncertain. The nation's forests, coral reefs and productive soil are being destroyed at a rate that is among the fastest in the world. For the tens of millions of Filipinos that live off the land and the sea, this means steadily declining yields of rice, corn and fish.

Degrading poverty remains the basic characteristics of most families. Born into poverty, most children are quickly thrown into the workforce, and are denied those most basic of human rights: a decent education and rudimentary health care. Alarming numbers of those who do develop working skills are pushed toward delivering those skills overseas.

Secretary of Trade and Industry Jose Concepcion speaks for the Aquino administration as he decries the poverty and lack of opportunities. In their place, he offers a vision of the Philippines joining the ranks of South Korea, Taiwan and the other "newly industrializing countries" (NICs) by the year 2000. The vision, however, is vague, and concentrates on rapid growth rates in output and exports.

Unfortunately for the majority, growth in the Philippine economy is currently occurring at the terrific expense of the environment, of democracy for and participation by the majority, and of equity. The vision of what Philippines the next generation will inherit needs to be soundly grounded in the principles of ecological sustainability, participatory democracy, and equity.

State of the nation: Philippines Temario C. Rivera, 1996 Southeast Asia State of the Nation Monograph Series This study seeks to evaluate the most significant events in the country during the last two decades in order to understand better the structures and forces underpinning the process of change and continuity in three interlinked historical periods the struggle against the authoritarian rule of Marcos the Aquino presidency and the first three years of the Ramos administration The monograph also seeks to identify the important trends and developments that help shape events and conjunctures in the future

Community Theatre Eugene van Erven, 2002-09-11 Community theatre is an important device for communities to collectively share stories to participate in political dialogue and to break down the increasing exclusion of marginalised groups of citizens It is practised all over the world by growing numbers of people Published at the same time as a video of the same name this is a unique record of these theatre groups in action Based on van Erven's own travels and experiences working with community theatre groups in six very different countries this is the first study of their work and the methodological traditions which have developed around the world

Struggling With Development Lynn Kwiatkowski, 2019-05-20 Struggling with Development is a study of the complex relationships among international development hunger and gender in the context of political violence in the Philippines This ethnography demonstrates that gender specific international development which has among its main goals the alleviation of hunger in women and children and the raising

The Green Tiger Barbara Goldoftas, 2006 The Philippines was once famous for the beauty of its reef ringed islands white beaches and lush forests In less than a half century its forests were felled its oceans over fished and its coral reefs destroyed The rapid harvest of once abundant resources has brought droughts deadly flash floods and the collapse of vital fisheries As the rural economy weakened and millions migrated to cities they overwhelmed the urban infrastructure Today the Philippines stands as an example of the profound and sweeping consequences of ecological decline In The Green Tiger Barbara Goldoftas documents this tragic trajectory But hers is not a story of hopelessness and inevitable defeat In lyrical unflinching prose she traces the struggle for conservation in the Philippines from isolated villages to large cities and in the process illustrates the surprising ways in which conservation and economic growth can effectively co exist

The Challenge of Slums United Nations Human Settlements Programme, 2012-05-23 The Challenge of Slums presents the first global assessment of slums emphasizing their problems and prospects Using a newly formulated operational definition of slums it presents estimates of the number of urban slum dwellers and examines the factors at all level from local to global that underlie the formation of slums as well as their social spatial and economic characteristics and dynamics It goes on to evaluate the principal policy responses to the slum challenge of the last few decades From this assessment the immensity of the challenges that slums pose is clear Almost 1 billion people live in slums the majority in the developing world where over 40 per cent of the urban population are slum dwellers The number is growing and will continue to increase

unless there is serious and concerted action by municipal authorities governments civil society and the international community This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes The Global Report on Human Settlements is the most authoritative and up to date assessment of conditions and trends in the world s cities Written in clear language and supported by informative graphics case studies and extensive statistical data it will be an essential tool and reference for researchers academics planners public authorities and civil society organizations around the world

Plundering Paradise Robin Broad,John Cavanagh,2023-11-15 This gripping portrait of environmental politics chronicles the devastating destruction of the Philippine countryside and reveals how ordinary men and women are fighting back Traveling through a land of lush rainforests the authors have recorded the experiences of the people whose livelihoods are disappearing along with their country s natural resources The result is an inspiring informative account of how peasants fishers and other laborers have united to halt the plunder and to improve their lives These people do not debate global warming they know that their very lives depend on the land and oceans so they block logging trucks protest open pit mining and replant trees In a country where nearly two thirds of the children are impoverished the reclaiming of natural resources is offering young people hope for a future *Plundering Paradise* is essential reading for anyone interested in development the global environment and political life in the Third World This gripping portrait of environmental politics chronicles the devastating destruction of the Philippine countryside and reveals how ordinary men and women are fighting back Traveling through a land of lush rainforests the authors have recorded the exp
