Speaking Out Stacie G. Goffin, Joan Lombardi, 1988 A GUIDE FOR THOSE WHO WANT CHANGES IN EDUCATION INCLUDES RESOURCES FOR ADVOCATES *Handbook of Research-Based Practice in Early Education* D. Ray Reutzel, 2014-07-09 Written expressly for early childhood educators and those who support their professional development this handbook distills essential knowledge about how to help all PreK 3 learners succeed Leading experts describe doable ways to create effective learning environments and implement instructional practices with a strong evidence base Engaging vignettes illustrate discussions of such topics as differentiated instruction response to intervention the Common Core standards social and emotional learning assessment and teaching across the curriculum Each chapter links cutting edge research to practical applications examples and professional development activities **Reframing the Early Childhood Curriculum** Jane M. Page, 2000 Argues that pre school children have a less apprehensive view of the future than adolescents and that an effective programme in the early years can counteract the difficulties youths experience *Reframing the Early Childhood Curriculum* Jane Page, 2002-01-04 Pre school children have fundamentally different attitudes towards the future and attendant notions of time and space For this reason early childhood professionals are optimally placed to lay important foundations for young children s long term development Children s flexibility of thought their positive and constructive outlook on life their sense of the continuity of time their creativity and imagination and their sense of personal connection with time and the future are all qualities that should be recognized and addressed in early childhood educational programmes as a means of counteracting the difficulty youths experience in knowing what to expect in their future lives and coming to understand their roles in shaping them Reframing the Early Childhood Curriculum offers fresh insight into examining futurists and early childhood theorists thinking of the relevance of planning for children s long term needs in early childhood identifying the skills attitudes and outlooks required to assist young children attending early childhood programmes in their long term growth and development exploring the means through which these skills attitudes and outlooks can be achieved in curriculum frameworks through specific goals and learning experiences against the background of youth and young children s views of the future *Spark a Revolution in Early Education* Rae Pica, 2022-11-22 Join the revolution in early childhood education Early childhood educators are facing a crucial inflection point in the profession Active learning for the whole child has been increasingly ignored by early childhood education decision makers Research shows that children need movement and play and joy to learn to their fullest potential yet the educational system pushes worksheets and takes away time outdoors among many other harmful and developmentally inappropriate teaching practices Educators everywhere are tired of witnessing unrealistic expectations and impossible attempts to accelerate child development stripping children of authentic learning and their giggles They are disturbed by the inequities that exist in education and want to see every child provided with the good foundation a quality early education can supply They are fed up with the

nonsense depriving children of childhood requiring them to teach in ways that they know aren't right Without an understanding of child development guiding ECE policies children have lost their love of learning and play and face growing health issues This book challenges and inspires early childhood professionals to advocate for change in the field while giving them the research underpinnings and tools they need to take real action and bring back active play based learning for the development and education of the whole child Including chapters on debunking myths in early childhood education advocacy basics and strategies for speaking up it dispels the fears associated with speaking up and banishes all doubts about the need to advocate bravely and widely proving the need to change course and providing practical and actionable steps for speaking to decision makers and convincing them to pursue change Spark a Revolution in Early Education busts four myths earlier is better children learn by sitting digital devices are important to learning and play time is not productive time to push for a Revolution and get educators everywhere to stand up for the children
