Special Issue Of The International Journal Of Human Computer Interaction

Andrew Sears, Julie A. Jacko

Special Issue Of The International Journal Of Human Computer Interaction:

Human-Computer Interaction Julie A. Jacko, Constantine Stephanidis, 2003-09-01 This four volume set provides the complete proceedings of the 10th International Conference on Human Computer Interaction held June 2003 in Crete Greece. A total of 2 986 individuals from industry, academia, research institutes and governmental agencies from 59 countries submitted their work for presentation at the conference. The papers address the latest research and development efforts as well as highlight the human aspects of design and use of computing systems. Those accepted for presentation thoroughly cover the entire field of human computer interaction including the cognitive, social, ergonomic and health aspects of work with computers. The papers also address major advances in knowledge and effective use of computers in a variety of diversified application areas including offices, financial institutions, manufacturing, electronic publishing, construction, health care and disabled and elderly people. *Longitudinal Studies of Human-computer Interaction* Pascale Carayon, 1998-04-01

Though the importance of longitudinal research is regularly discussed and emphasized, there is a scarcity of longitudinal studies on human aspects of computing. Even though longitudinal research is rare and difficult, it can lead to many benefits. Attention to conceptual and methodological issues is both interesting and important for other types of research and for the users of such research in improving the understanding of the human aspects of computing, especially considering the dynamic nature of today's work environment.

Human-Computer Interaction Fundamentals Andrew Sears, Julie A. Jacko, 2009-03-02 Hailed on first publication as a compendium of foundational principles and cutting edge research, the Human Computer Interaction Handbook has become the gold standard reference in this field. Derived from select chapters of this groundbreaking and authoritative resource, Human Computer Interaction Fundamentals emphasizes emerging topics such as sen

Www Usability Andrew Sears, 2000-07-01 Hypertext research provides insights into many issues that are also important in the context of the WWW. However, user knowledge and expectations, technology and the material being delivered have all changed, suggesting that many issues need be revisited. Researchers must explore the effects of media, network delays, design decisions, navigation strategies, user characteristics and user tasks on the usability of WWW based systems. The five articles in this special issue address some of these issues. These articles provide insights on navigation, internationalization and WWW design for older computer users while highlighting the variety of research methodologies that can be employed as we seek a greater understanding of the issues affecting the usability of the WWW. This special issue highlights the variety of issues being studied and research methodologies being used in an attempt to better understand the concept of usability in the context of the WWW. Providing users with appropriate information about their temporal and structural location with a WWW site, ensuring the availability of task appropriate navigational aides, understanding internationalization in the context of the WWW and designing for the diversity of WWW users are just a few of the areas in need of research. The articles in this special issue are based upon solid empirical research and therefore add to our

Interaction Stéphane Chatty,Prasun Dewan,2013-06-05 The aim of IFIP Working Group 2.7.13.4 for User Interface Engineering is to investigate the nature concepts and construction of user interfaces for software systems The group's scope is developing user interfaces based on knowledge of system and user behaviour developing frameworks for reasoning about interactive systems and developing engineering models for user interfaces Every three years the group holds a working conference on these issues The conference mixes elements of a regular conference and a workshop As in a regular conference the papers describe relatively mature work and are thoroughly reviewed As in a workshop the audience is kept small to enable in depth discussions The conference is held over 5 days instead of the usual 3 days to allow such discussions Each paper is discussed after it is presented A transcript of the discussion is found at the end of each paper in these proceedings giving important insights about the paper Each session was assigned a notes taker whose responsibility was to collect transcribe the questions and answers during the session After the conference the original transcripts were distributed via the Web to the attendees and modifications that clarified the discussions were accepted **Human-computer**

Interaction and Management Information Systems: Foundations Ping Zhang,Dennis F. Galletta,2015-03-26 Human Computer Interaction and Management Information Systems Foundations offers state of the art research by a distinguished set of authors who span the MIS and HCI fields The original chapters provide authoritative commentaries and in depth descriptions of research programs that will guide 21st century scholars graduate students and industry professionals Human Computer Interaction or Human Factors in MIS is concerned with the ways humans interact with information technologies and tasks especially in business managerial organizational and cultural contexts It is distinctive in many ways when compared with HCI studies in other disciplines The MIS perspective affords special importance to managerial and

organizational contexts by focusing on analysis of tasks and outcomes at a level that considers organizational effectiveness. With the recent advancement of technologies and development of many sophisticated applications, human centeredness in MIS has become more critical than ever before. This book focuses on the basics of HCI with emphasis on concepts, issues, theories, and models that are related to understanding human tasks and the interactions among humans, tasks, information, and technologies in organizational contexts in general.
