Public Opinion and the Political Future of the Nation's Capital Edward M. Meyers, 1996-06-01 Despite widespread agreement that the District of Columbia's political system has collapsed there is a serious lack of thoughtful proposals addressing the political future of the nation's capital In this book Edward M Meyers examines the opinions of average Americans about Washington D C in order to understand how many Americans are likely to approach the question of what reforms are needed Meyers first explores the political economic and social conditions of the District providing an informed context for understanding and evaluating its political options Presenting the results of in depth qualitative research with

focus groups held across the country Meyers reveals that regardless of the participants knowledge about the District their beliefs in six basic concepts or schemata such as respect for democratic rights attitudes about race and aversion to an intrusive federal government molded their opinions about various options for District self governance The book concludes with insights into the District by local and national political leaders including OMB Director Alice Rivlin Jesse Jackson Representatives Eleanor Holmes Norton Thomas Davis and James Walsh and Marion Barry

Religion in Liberal Political Philosophy Cécile Laborde, Aurélia Bardon, 2017-05-19 Until now there has been no direct and extensive engagement with the category of religion from liberal political philosophy Over the last thirty years or so liberals have tended to analyze religion under proximate categories such as conceptions of the good in debates about neutrality or culture in debates about multiculturalism US constitutional lawyers and French political theorists both tackled the category of religion head on under First Amendment jurisprudence and the political tradition of *la cit* respectively but neither of these specialized national discourses found their way into mainstream liberal political philosophy This is somewhat paradoxical because key liberal notions state sovereignty toleration individual freedom the rights of conscience public reason were elaborated as a response to 17th Century European Wars of Religion and the fundamental structure of liberalism is rooted in the western experience of politico religious conflict So a reappraisal of this tradition and of its validity in the light of contemporary challenges is well overdue This book offers the first extensive engagement with religion from liberal political philosophers The volume analyzes from within the liberal philosophical tradition itself the key notions of conscience public reason non establishment and neutrality Insofar as the contemporary religious revival is seen as posing a challenge to liberalism it seems more crucial than ever to explore the specific resources that the liberal tradition has to answer it
