Specious Science How Genetics And Evolution Reveal Why Medical Research On Animals Harms Humans:

Specious Science C. Ray Greek, Jean Swingle Greek, 2002-01-01 Builds on the message of Sacred Cows and Golden Geese to understand why medical research on animals really harms humans *The Animal Experimentation Debate* David E. Newton, 2013-05-09 Reviewing the topic from antiquity to the present day this book examines the debate over the use of animals in research in a fair and balanced way The debate over the use of nonhuman animals in experimental research has gone on for centuries and it continues as vigorously today as it ever has In fact in the last decade the controversy has intensified making animal testing a topic at the highest level of debate of any socioscientific issue in the United States This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation and provides biographies of individuals and descriptions of organizations that have been involved in the debate over the centuries Additionally it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health **What Will We Do If We Don't Experiment on Animals?** Jean Swingle Greek, C. Ray Greek, 2004 Drs Greek have written 2 books on why using animals as models for humans is not the best way to conduct medical research and drug testing During their lectures and debates the most commonly asked question was Well What will we use if we don't use animals What Will We Do If We Don't Experiment On Animals Medical Research for the Twenty first Century is the answer to that question Drs Greek explain briefly why one species cannot predict drug response for another and describe what research and testing methods should be used today instead of animals They also describe where our biomedical research dollars should be spent if we are to have cures for cancer AIDS and Alzheimer's This book will appeal to science trained and general audiences animal lovers and science readers public policy analysts students patients and patient support groups and government watchdog groups What Will We Do If We Don't Experiment On Animals Medical Research for the Twenty first Century takes medical research out of the nineteenth and into the 21st century **Animal Ethics for Veterinarians** Andrew Linzey, Clair Linzey, 2017-08-15 Veterinarians serve on the front lines working to prevent animal suffering and abuse For centuries their compassion and expertise have improved the quality of life and death for animals in their care However modern interest in animal rights has led more and more people to ask questions about the ethical considerations that lie behind common veterinary practices This Common Threads volume drawn from articles originally published in the Journal of Animal Ethics JAE offers veterinarians and other interested readers a primer on key issues in the field Essays in the first section discuss aspects of veterinary oaths how advances in animal cognition science factor into current ethical debates and the rise of complementary and alternative veterinary medicine and its relationship to traditional veterinary medicine The second section continues with an essay that addresses why veterinarians have an obligation to educate animal caregivers to look past cuteness in order to treat all

animals with dignity The collection closes with three short sections focusing on animals in farming trade and research areas where veterinarians encounter conflicts between their job and their duty to advocate and care for animals Contributors Judith Benz Schwarzburg Vanessa Carli Bones Grace Clement Simon Coghlan Priscilla N Cohn Mark J Estren Elisa Galgut Eleonora Gullone Matthew C Halteman Andrew Knight Drew Leder Andrew Linzey Clair Linzey Kay Peggs Megan Schommer Clifford Warwick and James W Yeates

Animal Rights, Human Wrongs Tom Regan, 2003-11-22 What gives an animal rights What makes product testing on animals wrong In *Animal Rights Human Wrongs* prominent activist and philosopher Tom Regan skillfully puts forth the argument for animal rights through the exploration of two questions central to moral theory What makes an act right What makes an act wrong Taking into consideration moral theories such as contractarianism utilitarianism and Kantian ethics Regan provides the theoretical framework that grounds a responsible pro animal rights perspective and ultimately explores how asking moral questions about other animals can lead to a better understanding of ourselves The necessity of making a transition from moral theory to moral practice becomes startlingly clear as Regan examines the commonplace everyday choices that would be affected by believing in a moral theory that affirms the rights of animals For the many people who have ever wondered what difference does it make if animals have rights *Animal Rights Human Wrongs* provides a provocative and intriguing answer For a discussion of animal rights tailored to a more general audience see *Empty Cages Facing the Challenge of Animal Rights* Rowman Littlefield 2003

Issues in Green Criminology Piers Beirne, Nigel South, 2013-09-05 Explores the ways in which governments transnational corporations military apparatuses and ordinary people routinely harm environments other animals and humanity

The ^AEthics of Animal Experimentation Donna Yarri, 2005-08-18 The ethical treatment of animals has become an issue of serious moral concern Many people are challenging long held assumptions about animals and raising questions about their status and treatment What is the relationship between humans and animals Do animals have moral standing Do we have direct or indirect duties to animals Does human benefit always outweigh animal suffering The use of animals for experimentation raises all of these questions in a particularly insistent way Donna Yarri gives an overview of the current state of the discussion and presents an argument

for significantly restricted animal experimentation Pointing to the similarities between humans and animals she argues that the actual differences are differences of degree rather than kind Animal cognition and animal sentience together are the basis for the claim that experimental animals do have rights Examining arguments in the disciplines of ethology philosophy science and theology Yarri makes a case for placing substantial restrictions on animal experimentation Grounding her examination in Christian theology she formulates a more humane approach to animal experimentation She concludes with a concrete burden benefit analysis that can serve as the foundation for informed decision making The Ethics of Animal Experimentation serves as both a handbook of animal rights theory and a practical guide to navigating the complexities of animal experimentation As animal experimentation features in an increasing number of scientific endeavors it is an ethical issue that requires our immediate attention Yarri s unique contribution forges a path toward an ethical practice of animal experimentation

The Oxford Handbook of Animal Ethics Tom L. Beauchamp,(1941-2012) R.G. Frey,2011-03-01 Humans encounter and use animals in a stunning number of ways The nature of these animals and the justifiability or unjustifiability of human uses of them are the subject matter of this volume Philosophers have long been intrigued by animal minds and vegetarianism but only around the last quarter of the twentieth century did a significant philosophical literature begin to be developed on both the scientific study of animals and the ethics of human uses of animals This literature had a primary focus on discussion of animal psychology the moral status of animals the nature and significance of species and a number of practical problems This Oxford Handbook is designed to capture the nature of the questions as they stand today and to propose solutions to many of the major problems Several chapters in this volume explore matters that have never previously been examined by philosophers The authors of the thirty five chapters come from a diverse set of philosophical interests in the History of Philosophy the Philosophy of Mind the Philosophy of Biology the Philosophy of Cognitive Science the Philosophy of Language Ethical Theory and Practical Ethics They explore many theoretical issues about animal minds and an array of practical concerns about animal products farm animals hunting circuses zoos the entertainment industry safety testing on animals the status and moral significance of species environmental ethics the nature and significance of the minds of animals and so on They also investigate what the future may be expected to bring in the way of new scientific developments and new moral problems This book of original essays is the most comprehensive single volume ever published on animal minds and the ethics of our use of animals

Empty Cages Tom Regan,2005-07-07 Described by Jeffrey Masson as the single best introduction to animal rights ever written this new book by Tom Regan will structure the animal rights debate for generations to come In a style at once simple and elegant Regan dispels the negative image of animal rights advocates perpetrated by the mass media unmasks the fraudulent rhetoric of humane treatment favored by animal exploiters and explains why existing laws function to legitimize institutional cruelty Written by the leading philosophical spokesperson for animal rights Tom Regan s shocking expos of animal abuse makes an essential and lasting contribution that will

significantly impact the history of animal rights advocacy in America
