Office of Policy Development and Research, 1980 **Adaptive Reuse Handbook** , 1981 **The Adaptive Reuse Handbook** Robert W. Burchell, David Listokin, 1981 The dynamics of change in the uses and occupancy characteristics of cities has caught urban managers off guard The abandonment of central city realty in many locations is a fact which cannot be overlooked Yet within this reality there are the seeds of hope not of return to things past but to a series of new constructive efforts Bridging the gap between the city and or neighborhood of yesterday and the potentials of tomorrow requires a firm grasp of all the many required tools in terms of legal physical and strategic planning It is to these necessities that this handbook is dedicated The Adaptive Reuse Handbook is a basic urban revitalization manual for city managers zoning administrators urban planners architects lay planning zoning board members and interested citizens The handbook consists of procedures to gain control of and positively reemploy abandoned urban real estate This is the non architectural side of surplus property conversion the legal and administrative procedures necessary to garner structures and land and prepare them for reuse This book is divided into four sections planning inventory property control property management and disposition and physical revitalization Each section presents procedures and field experience to deal with a particular urban revitalization activity property inventory abandonment early warning systems reuse planning interim permanent property control tax sale foreclosure property management property disposition and physical revitalization This is a must have reference work for anyone in the field of urban studies **Adaptive Reuse** Liliane Wong, 2016-11-21 Building in existing fabric requires more than practical solutions and stylistic skills The adaptive reuse of buildings where changes in the structure go along with new programs and functions poses the fundamental question of how the past should be included in the design for the future On the background of long years of teaching and publishing and using vivid imagery from Frankenstein to Rem Koolhaas and beyond the author provides a comprehensive introduction to architectural design for adaptive reuse projects History and theory building typology questions of materials and construction aspects of preservation urban as well as interior design are dealt with in ways that allow to approach adaptive reuse as a design practice field of its own right Adaptive Reuse Rensselaer County, New York. Bureau of Planning, 1975 **Asian Revitalization** Katie Cummer, 2021-01-11 Adaptive reuse refers to reusing an old building for a purpose other than which it was originally built or designed This conservation approach has become increasingly popular around the world However there are few publications that focus on its application in Asia This book fills this gap by looking at both unique and shared aspects of adaptive reuse in three Asian urban centers Hong Kong Shanghai and Singapore Building on government policy documents and extensive field work this book contextualizes adaptive reuse in each city and reveals the impetus behind a wide range of projects from revitalization in Hong Kong commercial development in Shanghai to community building in Singapore The introductory chapter sets adaptive reuse within an international

perspective noting salient differences and similarities between Asia and other parts of the world It also anchors the discussion within a regional perspective focusing on the similarities and differences between Hong Kong Shanghai and Singapore Each of the following four essays addresses a specific topic about adaptive reuse including its relationship to urban development and sustainability how it benefits heritage buildings and how it reveals best practices in heritage conservation in Asia The subsequent three essays one for each city supplemented with timelines set out a clear framework for understanding the city specific case studies that follow the essays Afterwards fifteen representative projects across the three cities are presented as in depth case studies The pairing of essays and case studies provides a detailed understanding of each city s approach to adaptive reuse in the twenty first century a time when the need for sustainable development solutions are at the forefront Intended for classroom use and professional readership this book will be of considerable value in Asia as well as elsewhere providing material for stimulating and worthwhile discussion Asian Revitalization is a highly practical and accessible volume on the long established conservation practice of adaptive reuse in East Asia Its focus on real life issues examples and challenges posed by revitalization programs in the region is extremely relevant to researchers and practitioners in architectural conservation urban design and urban studies Miles Glendinning University of Edinburgh Scotland This is a superb well documented and original book written by some of the best known and highly respected authors in the field of heritage conservation The carefully examined case studies illustrate a wide variety of solutions that highlight the work of some of the best minds of the next generations Alastair Kerr University of Victoria Canada This is a most interesting set of essays informative and thought provoking The best way to save any heritage building is by keeping it in beneficial use and how to achieve this in a sensitive manner is what these essays are about They should be vital reading for anyone considering an adaptive reuse project in Asia Michael Morrison Purcell UK With cultural heritage firmly ensconced in the global development agendas of the United Nations this well grounded volume draws upon the experience of Hong Kong SAR Shanghai and Singapore to demonstrate to scholars and practitioners alike how historic properties can be sustained through savvy adaptive reuse in the midst of tremendous urban redevelopment pressures Montira Horayangura Unakul UNESCO Bangkok Thailand
