Enlightenment Aberrations David W. Bates,2018-09-05 In Enlightenment Aberrations David W Bates shows that error was a complex important and by no means entirely negative concept in Enlightenment thought one that had a decisive influence in revolutionary debates on political identity and national history What can it mean to write a history of error In Bates s view all philosophy insofar as its project is the search for truth begins in error If truth is posited as a goal to be attained not as a given of some kind then error assumes a central role in the quest for truth Going beyond both liberal celebrations and postmodern critiques of Enlightenment reason Bates reveals just how crucial the problematic relation between human wandering and the mystery of truth was in eighteenth century thought The author draws on a wide range of Enlightenment thinkers including Etienne Bonnot de Condillac Jean d Alembert Marie Jean Antoine Nicolas Caritat Marquis de Condorcet Jean Jacques Rousseau and Charles Bonnet showing how they wrestled with the risk and promise of error He then demonstrates how the concept of error and its dialectical relationship to truth played out in the political culture of the French Revolution particularly in the Terror In the final chapters Bates looks at the post revolutionary transformations of the Enlightenment discourse of error and its subsequent history in modern European thought     **The Great Ages of Western Philosophy** ,1956     *Human Sciences* Jens Hoyrup,2000-06-08 Offers historical and philosophical arguments for treating the humanities as sciences     **Economics as Religion** Nelson, Robert H.,2014-05-01 Robert Nelson s Reaching for Heaven on Earth Economics as Religion and The New Holy Wars Economic Religion Versus Environmental Religion in Contemporary America read almost like a trilogy exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as Protestant and Roman and on into modern economic forms such as Marxism and capitalism as well as environmentalism Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times This edition of Economics as Religion situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology economics and other social sciences     **The William and Mary Quarterly** ,1957     The William and Mary Quarterly Richard Lee Morton,1957 Publishes refereed scholarship in history and related disciplines from initial Old World New World contacts to the early nineteenth century and beyond Its articles notes and documents and reviews range from British North America and the United States to Europe West Africa the Caribbean and the Spanish American borderlands Forums and topical issues address topics of active interest in the field     **The Great Ages of Western Philosophy: The age of enlightenment, by I.
