The Air Force Role In Developing International Out:

The Air Force Role in Developing International Outer Space Law Delbert R. Terrill, 1999 Colonel Terrill provides an in depth examination of the historical evolution of Air Force thinking and action on the development of international law as it applies to outer space He traces the Air Force s continual resistance to treaties and other conventions that would have defined the demarcation of the boundary between airspace and outer space He shows that the Air Force position was grounded in the unwillingness to define outer space narrowly before the military had thoroughly researched and tested technological capabilities that could be employed in space Terrill concludes by raising concerns about current issues that come into play on efforts to refine international law as it relates to outer space These issues include technological advances and possible future international cooperation in space ventures

[The Air Force Role in Developing International Outer Space Law](#) Delbert R. Terrill, Jr., Jr Colonel Terrill, Usafr Delbert R., 2012-08-06 The impact of the US defense and space initiatives on bilateral and multilateral treaties and on international outer space law in general a topic of much current discussion is better understood by an analysis of the development of that body of law Col Delbert Chip Terrill Jr discusses its early evolution and the Air Force contribution to it He describes the Air Force s ad hoc approach to international outer space law and its efforts to have this approach adopted by the United States and the international community Further the author details the profound impact that the surprise attack at Pearl Harbor on 7 December 1941 had on President Dwight D Eisenhower He vowed never again to allow the US to be similarly vulnerable to a surprise attack particularly in a nuclear environment As part of his efforts to preclude a surprise attack on the United States Eisenhower sought to establish the concept of free passage of intelligence gathering satellites as part of accepted international outer space law The author traces how the Eisenhower administration demonstrated a lack of concern about being first in space so long as the concept of free passage in outer space was universally accepted However the administration apparently and clearly underestimated the propaganda value that being first would have Colonel Terrill traces how the Eisenhower administration failed to fully communicate its policy goal of achieving such free passage to the uniformed services Although civilian leaders in the Defense Department were aware of the administration s position the Air Force and the other military services at times acted at cross purposes to the concept of free passage Chip Terrill describes the Air Force s continued efforts to resist the passage of most international outer space law conventions the restiveness of the Air Force judge advocate general JAG corps with a backseat role and how the JAG generally failed in its early attempt to have the Air Force become proactive in the development of the law Ironically Terrill illustrates how the Air Force s ad hoc approach essentially dovetailed with Eisenhower s goal of free passage Colonel Terrill relates how the Air Force s Project West Ford caused the passage of certain environmentally sensitive provisions of international outer space law The author

closes by examining the comment and coordination process leading to the passage of the Liability for Damages Convention Such was typical of the Air Force s lukewarm reactive posture regarding the passage of international conventions except for the Agreement on Rescue and Return of Astronauts which the Air Force strongly supported In short this superb work documents the interesting gestation period regarding the development of international outer space law It will undoubtedly contribute to the development of Air Force doctrine by providing a better understanding of the Air Force s involvement in the development of international outer space law *The Air Force Law Review* ,2000 **The Air Force role in low-intensity conflict** ,1986 **GAO Documents** United States. General Accounting Office,1986 Catalog of reports decisions and opinions testimonies and speeches **Air Force Journal of Logistics** ,1990 National Regulation of Space Activities Ram S. Jakhu,2010-07-23 The legal regime of outer space as enshrined in the Declaration of Legal Principles Governing the Activities of States in the Exploration and Use of Outer Space General Assembly Resolution 1962 XVIII adopted in 1963 and in the 1967 Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space including the Moon and Other Celestial Bodies while prohibiting the appropriation of space by any means envisages exploration for the bene t and in the interest of all countries on a basis of equality and in accordance with international law Freedom of scienti c investigation is also contemplated Elaborating on these instruments the Assembly in 1996 adopted the Declaration on International Cooperation in the Exploration and Use of Outer Space RES 51 122 in which it called for heightened international co operation with part ular attention to be given to the bene t for and the interests of developing countries and countries with nascent space programmes Thus it is self evident that the outer space regime including the 1972 Liability Convention envisages the conduct of national activities for the bene t and in the interests of all countries irrespective of their degree of economic or scienti c dev opment In this regard Article 6 of the 1967 Treaty not only provides for national activities in outer space but for international responsibility whether such activities are carried out by governmental agencies or non governmental entities and aims at ensuring that national activities are conducted in conformity with the Treaty
