The American Age

Douglas Jacobsen, Rhonda Jacobsen

The American Age:

Municipal Accountability in the American Age of Reform David Ressler, 2017-10-09 At the foundations of our modern conception of open government are a handful of disgruntled citizens in the Progressive Era who demanded accountability from their local officials were rebuffed and then brought their cases to court Drawing on newspaper accounts angry letters to editors local histories and court records David Ressler uncovers a number of miniature yet critical moments in the history of government accountability tracing its decline as the gap between citizens and officials widened with the idea of the community as corporation and citizens as consumers Together these moments tell the story of how a nation thought about democracy and the place of the individual in an increasingly complex society with important lessons for policy makers journalists and activists today

The American Age Walter LaFeber, 1994-01-01 Traces the evolution of U S foreign policy from its roots to the present considering the role of presidential power and surveying the world events which have shaped and continue to effect the United States political relations

The American University in a Postsecular Age Douglas Jacobsen, Rhonda Jacobsen, 2008-02-27 For much of the twentieth century it was assumed that higher education was and ought to be a secular enterprise but that approach no longer suffices The culture has shifted and contemporary college and university students are increasingly bringing religious and spiritual questions to campus In response college and university leaders are exploring anew the relationship between religion and higher education The American University in a Postsecular Age grapples with key questions How religious or irreligious are faculty and students today What level of religious literacy should be expected from students Can religion be allowed into the classroom without being disruptive Should colleges and universities help students reflect on their own faith Is religion antithetical to critical inquiry Can religion have a positive role to play in higher education This is a state of the art introduction to the national discussion about religion and higher education Leading scholars and top educators express a wide spectrum of opinions that reflect the best current thinking Introductory and concluding essays by the editors describe the postsecular character of our age and propose a comprehensive framework intended to facilitate ongoing conversation

The American Class Structure in an Age of Growing Inequality Dennis Gilbert, 2008 Why is social inequality in America increasing This text answers this question through a discussion of nine key variables and the best historical and contemporary empirical studies of class inequality in American society providing students with a broad overview of social inequality in America

The American Dream and American Cinema in the Age of Trump Graham S. Clarke, Ross Clarke, 2022-07-28 The American Dream and American Cinema in the Age of Trump uses both film theory and insights from object relations theory in order to examine how recent films address and reflect the state of the American Dream This fascinating book looks at how the American Dream is one of the organising ideas of American cinema and one of the most influential cultural outputs of the twenty first century at a time of internal crisis In an era characterised by populism climate change and economic uncertainty the book considers nine auteur

films in how they illustrate the challenges of contemporary America Graham S Clarke and Ross Clarke present a bifocal perspective on some of the most well received American films of recent years and how they relate to the American Dream in the context of the Trump presidency For each of the nine films discussed two different accounts are presented side by side so that each film is considered from an object relations psychoanalytic point of view internal world as well as a film and cultural theory perspective external world This unique approach is complemented by discussion of political and critical theory providing a thorough and engaging analysis Challenging and insightful *The American Dream and American Cinema in the Age of Trump* will be of great interest to scholars of cinema popular culture American studies and psychoanalytic studies

The Superpowers Paul Dukes,2002-01-04 *The Superpowers* traces the development of the USA and Russia later USSR from 1898 through to 2000 placing the Cold War from inception to ending into the wider social economic and political context This is the first history of the two major participants and their relationship throughout the twentieth century *The Superpowers* explores the intertwining history of the two powers chronologically and includes discussion of the inheritance of the two great powers and their imperial background World War One and the Russian Revolution Capitalism and Socialism World War Two and its impact the conflicts in Berlin Czechoslovakia Vietnam and Afghanistan Perestroika and the end of the USSR the significance of the events of 1991 and their legacy *American Science in an Age of Anxiety* Jessica

Wang,2000-11-09 No professional group in the United States benefited more from World War II than the scientific community After the atomic bombings of Hiroshima and Nagasaki scientists enjoyed unprecedented public visibility and political influence as a new elite whose expertise now seemed critical to America s future But as the United States grew committed to Cold War conflict with the Soviet Union and the ideology of anticommunism came to dominate American politics scientists faced an increasingly vigorous regimen of security and loyalty clearances as well as the threat of intrusive investigations by the notorious House Committee on Un American Activities and other government bodies This book is the first major study of American scientists encounters with Cold War anticommunism in the decade after World War II By examining cases of individual scientists subjected to loyalty and security investigations the organizational response of the scientific community to political attacks and the relationships between Cold War ideology and postwar science policy Jessica Wang demonstrates the stifling effects of anticommunist ideology on the politics of science She exposes the deep divisions over the Cold War within the scientific community and provides a complex story of hard choices a community in crisis and roads not taken **Age-Friendly Cities and Communities** Tine Buffel,Sophie Handler,Chris Phillipson,2018-01-17 This

important book provides a comprehensive survey of different strategies for developing age friendly communities and the extent to which older people themselves can be involved in the co production of age friendly policies and practices *The American Monthly Magazine* ,1911 **The State of the American Mind: Stupor and Pathetic Docility** Amechi Okolo PhD,2010-06-10 This book *The State of the American Mind Stupor and Pathetic Docility* Volume One begins to unravel some

of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

The American Century Robert D. Johnston, Walter LaFeber, Richard Polenberg, Nancy Woloch, 2024-10-18 The new edition of this classic text on modern U S history seamlessly

blends political social cultural intellectual and economic themes into an authoritative and readable account of America's national story since the 1890s Written by four highly respected scholars this book has been fully updated with new coverage of the Trump and Biden presidencies the culture wars deep political polarization and the crisis of democracy The text's most distinctive quality is its close attention to both history within the United States and the relationships the country has forged with the rest of the world The eighth edition remains engaging and approachable while continuing to include the most recent scholarship Each chapter contains a special feature section devoted to cultural topics including the arts and architecture sports and recreation technology and education Web links to additional online resources accompany each feature offering complementary learning opportunities to students While carefully attending to the complexity of history The American Century traces the long roots of some of the most pressing current issues in the United States and continues to be a compelling resource for students of recent American history

A Pentecostal Political Theology for American Renewal

Steven M. Studebaker, 2016-10-26 This book argues that Christians have a stake in the sustainability and success of core cultural values of the West in general and America in particular Steven M Studebaker considers Western and American decline from a theological and specifically Pentecostal perspective The volume proposes and develops a Pentecostal political theology that can be used to address and reframe Christian political identity in the United States Studebaker asserts that American Christians are currently not properly engaged in preventing America's decline or halting the shifts in its core values The problem he suggests is that American Christianity not only gives little thought to the state of the nation beyond a handful of moral issues like abortion but its popular political theologies lead Christians to think of themselves more as aliens than as citizens This book posits that the proposed Pentecostal political theology would help American Christians view themselves as citizens and better recognize their stake in the renewal of their nation The foundation of this proposed political theology is a pneumatological narrative of renewal a biblical narrative of the Spirit that begins with creation proceeds through Incarnation and Pentecost and culminates in the new creation and everlasting kingdom of God This narrative provides the foundation for a political theology that speaks to the issues of Christian political identity and encourages Christian political participation

The First Age of Industrial Globalization Maartje Abbenhuis, Gordon

Morrell, 2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War Through a combination of industrialization technological innovation and imperial expansion the industrializing powers of the world helped to create inter connected global space that left few regions untouched In ten concise chapters this book relays the major shifts in global power economics and society outlining the interconnections of global industrial imperial and economic change for local and regional experiences identities and politics It finishes with an exposé on the catastrophic impact of the First World War on this global system The First Age of Industrial Globalization weaves together the histories of

industrialization world economy imperialism international law diplomacy and war which historians usually treat as separate developments and integrates them to offer a new analysis of an era of fundamental historical change It shows that the revolutionary changes in politics society and international affairs experienced in the 19th century were inter connected developments It is essential reading for any student of modern global history Staging the Past in the Age of Thatcher Anthony P. Pennino,2018-08-07 This book investigates how the British theatrical community offered an alternative and oppositional historical narrative to the heritage culture promulgated by the Thatcher and Major Governments in the 1980s and early 1990s It details the challenges the theatre faced especially reductions in government funding and examines seminal playwrights of the period including but not limited to Caryl Churchill Howard Brenton Sarah Daniels David Edgar and Brian Friel who dramatized a more inclusive vision of history that gave voice to traditionally marginalized communities It employs James Baldwin s concept of witnessing as the means by which history could be deployed to articulate an alternative and emergent political narrative the history we haven t had This book will appeal to students and scholars of theatre and cultural studies as well as theatre practitioners and enthusiasts American Constitutionalism Heard Round the World, 1776-1989 George Athan Billias,2009-08 George Athan Billias traces the spread of American constitutionalism from the time of the American Revolution to the conclusion of the Cold War **Why American Foreign Policy Fails** D. Jett,2008-05-12 This book explores the recent changes in U S foreign policy examines the roles that the six primary actors the President the Congress the bureaucracy non governmental organizations the media and the public play in policy decisions and assesses the potential for improvement within this system *The Third Century* Mark T. Gilderhus,David C. LaFevor,Michael J. LaRosa,2017-01-05 This text focuses on U S relations with Latin America from the advent of the New Diplomacy late in the nineteenth century to the present Providing a balanced perspective it presents both the United States view that the Western Hemisphere needed to unite under a common democratic capitalistic society and the Latin American countries response to U S attempts to impose these goals on its southern neighbors The authors examine the reciprocal interactions between the two regions each with distinctive purposes outlooks interests and cultures They also place U S Latin American relations within the larger global political and economic context *Petroleum Age* ,1921 The Making of the American Landscape Michael P. Conzen,2014-06-03 The only compact yet comprehensive survey of environmental and cultural forces that have shaped the visual character and geographical diversity of the settled American landscape The book examines the large scale historical influences that have molded the varied human adaptation of the continent s physical topography to its needs over more than 500 years It presents a synoptic view of myriad historical processes working together or in conflict and illustrates them through their survival in or disappearance from the everyday landscapes of today **America's Textile Reporter** ,1908
