Gloria Robinson

Research Associate in History of Medicine

Yale University, New Haven, Connecticut

"In this many-faceted account of the biological sciences as they have developed in America over four centuries, [Doctor Hughes] takes a broad view and tells of the character of science, of individuals in science and of collaborative efforts, of the founding and growth of educational and scientific institutions in the New World, and in his narrative treats of the growth of each of the life sciences. Placing his subjects against the background of all of Western science and in the context of history, he follows individual influences and connections between scientists and between European and American science. He presents a picture of how science was pursued and of the American endeavors particularly, to the present, in which he sees American science as merged into world science, with the implications for the future."

The American Biologist Through Four Centuries:

The American Biologist Through Four Centuries Arthur Frederick William Hughes,1982 *Zoo and Aquarium History* Vernon N. Kisling,2000-09-18 As one of the world s most popular cultural activities wild animal collections have been attracting visitors for 5 000 years Under the direction of Vernon N Kisling an expert in zoo history an international team of authors has compiled the first comprehensive global history of animal collections menageries zoos and aquariums *Zoo and Aquar* National Library of Medicine Current Catalog National Library of Medicine (U.S.),1982 *Biographical Dictionary of American and Canadian Naturalists and Environmentalists* George A. Cevasco,Lorne Hammond,Richard Harmond,Keir B. Sterling,1997-12-09 Casting a wide net this volume provides personal and professional information on some 445 American and Canadian naturalists and environmentalists who lived from the late 15th century to the late 20th century It includes explorers who published works on the natural history of North America conservationists ecologists environmentalists wildlife management specialists park planners national park administrators zoologists botanists natural historians geographers geologists academics museum scientists and administrators military personnel travellers government officials political figures and writers and artists concerned with the environment Some of the subjects are well known The accomplishments of others are little known Each entry contains a succinct but careful evaluation of the subject s career and contributions Entries also include up to date bibliographies and information concerning manuscript sources **Zoo and Aquarium History** Vernon N. Kisling, Jr,2022-07-11 Wild animals have been housed in zoos and aquariums for 5 000 years fascinating people living in virtually every society Today these institutions are at a new milestone in their history This second edition of *Zoo and Aquarium History* takes the reader on a journey through the transition of private collections to menageries to zoos then zoological gardens and more recently conservation centers and sanctuaries Under the direction of Vernon N Kisling an expert in zoo history an international team of authors has thoroughly updated the only comprehensive global history of animal collections menageries zoos and aquariums The resulting book documents the continuum of efforts in maintaining wild animal collections from ancient civilizations through today explaining how modern zoos have developed their mission statements around the core aims of conservation education research and recreation This new edition pulls together regional information including new chapters on zoological gardens of Canada Latin America China Israel the Middle East and New Zealand along with the cultural aspects of each region to provide a foundation upon which further research can be based It presents a chronological listing of the world s zoos and aquariums and features many never before published photographs Sidebars present supplementary information on pertinent personalities events and wildlife conservation issues The original Appendix has been expanded to include over 1 200 zoos and aquariums providing an invaluable resource This is an extensive chronological introduction to the subject highlighting the published and archival resources for those who want to know more **Current Catalog** National Library of Medicine (U.S.),1982 First multi year cumulation covers six years

1965 70 *Proceedings of The Academy of Natural Sciences (Vol. 147. 1997)* , *Encyclopedia of Library and Information Science* Allen Kent, Harold Lancour, 1997-09-16 The Biological Literature to An Uncertainty Principle for Information Seeking A Qualitative Approach Four Centuries of Clinical Chemistry Louis Rosenfeld, 2018-10-08 The origin and early years of any rapidly changing scientific discipline runs the risk of being forgotten unless a record of its past is preserved In this the first book length history of clinical chemistry those involved or interested in the field will read about who and what went before them and how the profession came to its present state of clinical importance The narrative reconstructs the origins of clinical chemistry in the seventeenth century and traces its often obscure path of development in the shadow of organic chemistry physiology and biochemistry until it assumes its own identity at the beginning of the twentieth century The chronological development of the story reveals the varied roots from which modern clinical chemistry arose **Beyond History of Science** Elizabeth Garber, 1990 This collection focuses on the intellectual development of the sciences their relationships with technology and their place in culture in general including a proposed realignment of science technology and art **Bibliography of the History of Medicine** , 1984 *Four Centuries of Special Geography* O.F.G. Sitwell, 2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula The Artificial disc Mario Brock, Heinz-Michael Mayer, Klaus Weigel, 1991-05-01 *Four Centuries of Geological Travel* Patrick Wyse Jackson, Geological Society of London, 2007 Four Centuries of Geological Travel The Search for Knowledge on Foot Bicycle Sledge and Camel focuses on the complexities of geological exploration and will be of particular interest to earth scientists historians of science and to the general reader interested in science Joseph Leidy , 1998-10-11 **New Worlds, New Animals** R. J. Hoage, William A. Deiss, 1996-05-07 Illustrated with nearly 100 photographs New Worlds New Animals gives readers a new respect for and understanding of the role of zoos in social and cultural history *How Old is Time?* Saso Dolenc, 2024 I travel a lot around the world I regularly follow the world s most notable news sources and I often socialize with prominent intellectuals in various parts of the world but the best

short stories about science I encounter are those I find at home in my native Slovenia The essays on science by my colleague Sa o Dolenc are not only fresh exciting and entertaining but also very diverse as they cover various topics from the social sciences and philosophy as well as technology mathematics and the natural sciences His books come closest to what we could call the royal road to knowledge Renata Salecl philosopher and author of *The Tyranny of Choice* *New York Magazine* ,1994-02-28 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea End the Biggest Educational and Intellectual Blunder in History Norman W. Edmund,2005 This book discusses misunderstandings related to the scientific method of creative problem solving and decision making The author has conducted extensive research in this field for more than 15 years and shows that the misunderstandings have created great harms in the educational field and in most other fields This book will be important reading for all those interested in better education better thinking and a better society *Building the Worlds That Kill Us* David Rosner,Gerald Markowitz,2024-11-05 Across American history the question of whose lives are long and healthy and whose lives are short and sick has always been shaped by the social and economic order From the dispossession of Indigenous people and the horrors of slavery to infectious diseases spreading in overcrowded tenements and the vast environmental contamination caused by industrialization and through climate change and pandemics in the twenty first century those in power have left others behind Through the lens of death and disease *Building the Worlds That Kill Us* provides a new way of understanding the history of the United States from the colonial era to the present David Rosner and Gerald Markowitz demonstrate that the changing rates and kinds of illnesses reflect social political and economic structures and inequalities of race class and gender These deep inequities determine the disparate health experiences of rich and poor Black and white men and women immigrant and native born boss and worker Indigenous and settler This book underscores that powerful people and institutions have always seen some lives as more valuable than others and it emphasizes how those who have been most affected by the disparities in rates of disease and death have challenged and changed these systems Ultimately this history shows that unequal outcomes are a choice and we can instead collectively make decisions that foster life and health
