Cross,2017-06-19 This

volume provides a comprehensive catalog of how various ethnic groups in the United States of America have differently shaped their cultural landscape. Author John Cross links an overview of the spatial distributions of many of the ethnic populations of the United States with highly detailed discussions of specific local cultural landscapes associated with various ethnic groups. This book provides coverage of several ethnic groups that were omitted from previous literature including Italian Americans, Chinese Americans, Japanese Americans, and Arab Americans, plus several smaller European ethnic populations. The book is organized to provide an overview of each of the substantive ethnic landscapes in the United States. Between its introduction and conclusion, which looks towards the future, the chapters on the various ethnic landscapes are arranged roughly in chronological order such that the timing of the earliest significant surviving landscape contribution determines the order the groups will be viewed. Within each chapter, the contemporary and historical spatial distribution of the ethnic groups are described, the historical geography of the group's settlement is reviewed, and the salient aspects of material culture that characterize or distinguish the group's ethnic landscape are discussed. *Ethnic Landscapes of America* is designed for use in the classroom as a textbook or as a reader in a North American regional course or a cultural geography course. This volume also can function as a detailed summary reference that should be of interest to geographers, historians, ethnic scholars, other social scientists, and the educated public who wish to understand the visible elements of material culture that various ethnic populations have created on the landscape.

Conversations with Barry Lopez William E. Tydeman, 2013-08-26. Known as an advocate for the endangered earth, Barry Lopez is one of America's preeminent writers on nature. This invigorating book invites readers to sit down with Lopez and his friend William E. Tydeman to engage with their conversations about activism, the life of the mind, and all things literary. Even readers who think they know everything there is to know about Lopez will learn much from this richly informative book, both from Tydeman's concise biography of Lopez and from the dialogue about Lopez's ideas and experiences. The three interviews and Tydeman's reflections on other discussions with Lopez gathered here address nature, human beings' relationship to the land, the tension between political activism and the life of the intellectual, memory and reconciliation, the artist's social responsibility, and the business of authorship. What is the nature of the relationship between the writer and the reader? Lopez asks. It's reciprocal, contractual, and moral. Lopez's thoughts on the importance of authenticity will resonate with every reader or writer, as will his deep commitment to story in all his work. He and Tydeman engage in illuminating exchanges on style and genre, the publication process, and relationships among authors, editors, and publishers. Both men are interested in photography and its relationship to writing, a subject on which they offer thought-provoking comments. A comprehensive annotated bibliography of Lopez's writings by archivist Diane Warner rounds out the volume.

Landscape is a term frequently used to describe a multidimensional phenomenon What this actually comprises is hard to
define Precisely this question is addressed in this volume The holy landscape depends on people s Weltanschauung and is
influenced by their respective culture and ethos It is not just a question of religious buildings and rituals nor is a mere matter
of explicating terms such as pure and impure magic and myths it is about an expressive space in which the ceremony and
mood of rites and cults take place The contributions also deal with the emergence and continuing development of the term

Landscapes of Origin in the Americas Jessica Joyce Christie,2009-09-27 Landscape is a powerful factor in the operation of memory because of the associations narrators make between the local landscape and the events of the stories they tell Ancestors and mythological events often become fixed in a specific landscape and act as timeless reference points In conventional anthropological literature landscape is the term applied to the meaning local people bestow on their cultural and physical surroundings In this work the authors explore the cultural and physical landscapes an individual or cultural group has constructed to define the origins or beginnings of that cultural group as revealed through shared or traditional memory The cultural landscapes of origins in diverse sites throughout the Americas are investigated through multidisciplinary research not only to reveal the belief system and mythologies but also to place these origin beliefs in context and relationship to each other In a continual interaction between the past present and future time is subordinate to place and history as defined in Western academic terms does not exist
