The Handbook provides information on TVET models that occur in different parts of the world, reflects best and innovative practice and wherever possible uses case studies as examples. The 220 authors are representative of the various regions of the world and major international organisations involved in TVET. This volume presents the work of established researchers as well as the work of promising young researchers. Intended as the universally accepted resource for the field, the Handbook provides a comprehensive coverage of cutting edge developments in research, policy and practice in TVET within a single source.
