How Best to 'Go On'? Prospects for a 'Modern Synthesis' in the Sciences of Mind Kevin Moore, John Cromby, 2016-08-08 Psychology straddles areas from the biological to the social and cultural Within that vast range there have been recent explosions of interest in neuropsychology genetics and epigenetics and the evolutionary bases of mindedness Correspondingly there have been conceptual innovations and new empirical evidence in relation to the embodied social and discursive processes supporting mind and personhood Simultaneously awareness of developmental processes and their dynamic interweaving of genetic physiological neurological social and cultural elements has also increased Might such developments help connect the dots between diverse aspects of mindedness and the contexts within which it arises Whilst it seems clear that mind is co constituted of both biological and socio cultural processes how might we bring these disparate realms of knowledge together In a number of these areas suggestive integrative possibilities have been explored e g predictive processing embodied and situated cognition dynamic developmental systems theory and insights such as a focus on action knowledge as skills embeddedness and connectivity have been pursued across a range of disciplines This edited collection of articles bring together such possibilities and others in the same forum in order to provide an opportunity to re visit a recurring discussion within theoretical psychology The claimed lack of and potential for theoretical synthesis and unity While the chapters range over a number of areas of research this collection is focused on current prospects for conceptual synthesis within or convergence of research between aspects of mind and mindedness As is clear from the contributions it highlights integrative conceptual proposals that emphasize action orientation process embeddedness and connectivity especially between explanatory levels Beyond specific proposals for integration several of the contributions explicitly or implicitly expose broader questions about the purpose of psychological research the epistemological and ontological commitments required and the relevant social political and economic contexts within which such research is performed This is perhaps inevitable since any aim for synthesis of various understandings of mind will or should lead to consideration of the general implications beyond the science that follow from an integrated account of mind and mindedness Whether or not the contributions in this volume provide insights into profitable paths towards greater theoretical synthesis in the sciences of mind or alternatively provide grist for the mill of renewed skepticism over the potential or even desirability of such synthesis is unpredictable Whichever the outcome we feel sure that they will help provoke future productive research in

and thinking about the sciences of mind Kevin Moore and John Cromby Associate Guest Editors **Lethal Logic** Dennis A. Henigan, 2009-06-30 Guns don't kill people people kill people When guns are outlawed only outlaws will have guns An armed society is a polite society Who hasn't heard these engaging assertions time and time again Burned into the national consciousness by years of targeted disciplined messaging by the National Rifle Association and others they are just a few of the bumper sticker slogans that have defined the gun control debate in America Long ridiculed by gun control advocates they are the first words that come to mind for most Americans when the gun issue is discussed This is the first book both to acknowledge the profound and deadly impact of the gun lobby's bumper sticker logic on the gun control debate and to systematically expose the misguided thinking at the core of the pro gun slogans Indeed the author contends that the gun lobby's remarkable success in blocking passage of lifesaving gun laws is the result in large part of its relentless and effective use of these simple and resonant messages Their persuasive power has been a largely ignored influence on the current politics of gun control in which the gun lobby wields unprecedented power in the Republican Party while many Democratic Party leaders see the policy benefits of stronger gun laws as not worth the political risk of standing up to the NRA The book contends that the current political stalemate over guns will never be broken until the pro gun slogans are exposed as the cleverly disguised fallacies that they are **Radical Conflict** Andrew R. Smith, 2016-05-05 Radical Conflict addresses conflict at interpersonal and communal legal and rhetorical ethno-political global and geopolitical levels The conflicts analyzed are radical because in each some intense and often prolonged violence takes place The chapters address different kinds of violence's physical and gratuitous structural and socio-economic legal and symbolic all with significant ill effects and injustices that spiral in all directions All share an interest in exploring imaginatively and speculatively what can be done to attenuate such cycles of violence The volume analyzes how recurrent narratives mythologies media-ted constructions and other discourses of liberal democratic and authoritarian states play a significant role in exacerbating or thwarting violence exposing escalating legitimizing rationalizing propagating but also possibly mitigating violence in all of its forms Each contributor provides a critical interpretation of the status of the conflict under inquiry including a teacher verbally abusing and ridiculing a student then exposing it in social media a community torn apart by environmental disaster the incommensurate but not incommensurable conflict between Israelis and Palestinians the Muslim Brotherhood and the militarized states of Egypt and Libya urban discourses in cyberspace among Moroccan and Maghreb youth that have become counter-signifying publics against oppression of the state the role of media and violence in Zimbabwe's political struggle the impact of the Circassian diaspora in global politics especially in the United States India's soft power approach to the Kashmir conflict as a way to capitalize on it through tourism the agonistic discourses that pervade the conflict over the Sahara and deprive Sahrawi people of rights and how the liberal state is implicated in the gratuitous violence of ISIL The volume also offers a section on the rhetoric of exclusionary laws associated with intractable conflicts of the abortion conflict the right to
